The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

This Key Information Memorandum is dated 30 May 2025

INVESTMENT OBJECTIVE

The objective of the Fund is to provide a financial planning tool for long term financial security for investors based on their retirement planning goals.

However, there can be no assurance that the investment objective of the fund will be realized, as actual market movements may be at variance with anticipated trends.

The scheme does not assure or guarantee any returns.

ASSET ALLOCATION PATTERN OF THE SCHEME

Under normal circumstances, the asset allocation of the scheme will be as follows:

Progressive Plan:

Instruments	Indicative allocations (% to total assets)		Risk Profile
	Minimum	Maximum	
Equity and Equity related instruments	85	100	High
Debt & Money Market instruments	0	15	Low to Medium
Other Securities#	0	10	High

The plan level will have maximum derivative gross notional position of 100%^ of the net assets of the plan. Investment in derivative instruments may be done for trading as well as for hedging and Portfolio balancing.

^ For calculation of Gross Derivative Exposure, all types of derivative exposure i.e. long and short position (excluding short positions created for hedging) will be aggregated. The aggregate exposure to derivative position, equity / equity related instruments, debt instruments and money market instruments (excluding Tri-Party Repo, REPO and others cash equivalents instruments with residual maturity of less than 91 days) will not exceed 100% of the net assets of the plan.

Other securities shall include: Domestic Exchange Traded Funds, Overseas Exchange Traded Funds / Foreign Securities / Foreign Funds as may be permitted under the extant SEBI Regulations.

Indicative Table (Actual instrument/percentages may vary subject to applicable SEBI circulars)

Sl. no	Type of Instrument	Percentage of exposure	SEBI Master Circular on Mutual Fund dated June 27, 2024 Reference
1.	Securities Lending/ Short Selling	Not more than 25% of the net assets of the plan shall be deployed in securities lending & single intermediary limit is 5%. The Fund may engage in short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by SEBI.	Provision no. 12.11
2.	Equity Derivatives for non- hedging purposes	The plan level will have maximum derivative gross notional position of 100%^ of the net assets of the plan. Investment in derivative instruments may be done for trading as well as for hedging and Portfolio balancing	Provision no. 12.25
3.	Securitized Debt	Investment by the plan in securitized debt will not normally exceed 15% of the net asset of the plan	Provision no. 12.15

As per clause 4 of Seventh Schedule of SEBI (Mutual Funds) Regulations 1996, the scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

Please Note:

- The above Asset Allocation Patterns are only indicative. The investment manager in line with the investment objective as may alter the above patterns for short term and on defensive consideration. The allocation between debt and equity will be decided based upon the prevailing market conditions, macro-economic environment and the performance of corporate sector, the equity market and other considerations.
- All the three plans under the fund may have similar securities. However, the exact proportion of such securities will depend upon the asset allocation of the respective plan.
- Investment in Foreign Securities / Overseas Financial Assets:
Provision 12.19 of SEBI Master Circular on Mutual Funds dated June 27, 2024 permitted mutual fund to invest overseas , as follows :
Mutual Funds can make overseas investments subject to a maximum of US \$ 1 billion per Mutual Fund, within the overall industry limit of US \$ 7 billion. US \$ 50 million would be reserved for each Mutual Fund individually, within the overall industry limit of US \$ 7 billion.
Mutual Funds can make investments in overseas Exchange Traded Fund (ETF(s)) subject to a maximum of US \$ 300 million per Mutual Fund, within the overall industry limit of US \$ 1 billion
Provision 12.19 of SEBI Master Circular on Mutual Funds dated June 27, 2024 has permitted mutual funds to invest in following types of foreign securities:
 - ADRs/GDRs issued by Indian companies or foreign companies, Equity of overseas companies listed on recognized stock exchanges overseas
 - Initial and follow on public offering for listing at recognized stock exchange overseas
 - Foreign debt securities in the countries with fully convertible currencies, short term as well as long term debt instruments with rating not below investment grade by accredited/registered credit rating agencies
 - Money market instruments rated not below investment grade

- Repos in the form of investment, where the counterparty is rated not below investment grade; repos should not however, involve any borrowing of funds by mutual funds
- Government securities where the countries are rated not below investment grade
- Derivatives traded on recognized stock exchanges overseas only for hedging and portfolio balancing with underlying as securities
- Short term deposits with banks overseas where the issuer is rated not below investment grade
- Units/securities issued by overseas mutual funds or unit trusts registered with overseas regulators and investing in (a) aforesaid securities, (b) Real Estate Investment Trusts (REITs) listed in recognized stock exchanges overseas or (c) unlisted overseas securities (not exceeding 10% of their net assets).

Portfolio of overseas / foreign securities (if any) shall be managed by a dedicated Fund Manager, while selecting the securities the Fund Manager may rely on the inputs received from internal research or research conducted by external agencies in various geographies. The fund may also appoint overseas investment advisors / managers to advise / manage portfolio of foreign securities.

The investment in such Overseas Financial Assets shall not exceed the limit as may be imposed by SEBI/ RBI from time to time.

AMC believes that overseas securities offer new investment and portfolio diversification opportunities into multi-market and multicurrency products. However, such investments also entail additional risks. The Fund may, where necessary, appoint other intermediaries of repute as advisors, sub-managers, or sub custodians for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements, if any, of SEBI.

To the extent that the assets of the plans will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets may be adversely affected by changes in the value of certain foreign currencies relative to the Indian rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances or any other restriction applicable to it. To manage risk associated with foreign currency and interest rate exposure and for efficient portfolio management, the fund may use derivatives such as cross currency swaps etc. The use of derivatives would be in accordance with the prevailing regulations.

4. The plans under the fund will purchase securities in the public offerings and rights issues, as well as those traded in the secondary markets. On occasions, if deemed appropriate, the plans will invest in securities sold directly by the issuer, or acquired in a negotiated transaction or issued by way of private placement. The moneys collected under various plans of the fund shall be invested only in transferable securities.
5. As per SEBI (Mutual Funds) Regulations 1996, the Fund shall not make any investments in any un-listed securities of associate / group companies of the Sponsors. The Fund will also not make investment in privately placed securities issued by associate / group companies of the Sponsors. The Fund may invest not more than 25% of the net assets in listed securities of Group companies.
6. The AMC may from time to time for a short term period on defensive consideration invest upto 100% of the funds available in Money Market Instruments, the primary motive being to protect the Net Asset Value of the plans and protect unitholders interests so also to earn reasonable returns on liquid funds maintained for redemption/repurchase of units.

Change in Investment Pattern - Pursuant to provision 1.14 of SEBI Master Circular on Mutual Funds dated June 27, 2024, the tentative portfolio break-up mentioned above with minimum and maximum asset allocation can be altered for a short-term period on defensive considerations. In this event where the asset allocation falling outside the limits specified in the asset allocation table due to defensive considerations, the Scheme will rebalance the portfolio within thirty (30) calendar days.

Pursuant to provision 1.14 of SEBI Master Circular on Mutual Funds dated June 27, 2024, in the event where the asset allocation is falling outside the limits specified in the asset allocation table due to passive breaches (occurrence of instances not arising out of omission and commission of AMC), the Scheme will rebalance the portfolio within thirty (30) business days. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme within the stipulated period of thirty (30) business days, justification in writing including details of efforts taken to rebalance the portfolio for the same shall be provided to the Investment Committee. The Investment Committee shall then decide on the course of action and if they so desires can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. Further, compliances relating to disclosures etc. shall be adhered in line with the said circular.

In case the portfolio of schemes is not rebalanced within the mandated plus extended timelines, AMCs shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.

- ii. not to levy exit load, if any, on the investors exiting such scheme.

AMC shall adhere to SEBI guidelines regarding the rebalancing of asset allocation norms as stipulated from time to time. However, at all times the portfolio will adhere to the overall investment objectives of the scheme.

INVESTMENT STRATEGY

Everyone wants to lead a comfortable retirement. However, without adequate planning it probably won't happen. People are living longer than ever before, which is obviously good news, but that means retirement is becoming more expensive.

Retirement planning means setting aside of money or assets for the purpose of deriving some income during old age. This is to be done before reaching retirement age. But the process of retirement planning is based on a person's desired retirement age and lifestyle.

The importance of retirement planning cannot be overstated. Retirement planning begins with setting clearly defined life goals and putting together a financial plan to achieve those goals upon retirement.

Apart from starting early which gives the advantage of compound growth, the next most important thing is to select the appropriate asset classes and appropriate allocation of savings over various asset classes which ensure a smooth fulfillment of the pre-set goals.

Concept of retirement planning has changed over the years. Retirement planning in the 21st century needs a different set of considerations from what it used to be. The current employment conditions have changed. In the past, Social Security Benefits, Personal savings and Defined Benefit Pension were considered main resources for leading a comfortable retired life. In present scenario, one cannot solely depend on these resources.

"Tata Retirement Savings Fund" is a carefully structured suite of Plans designed to meet investment needs for retirement planning. Not only do unitholders have a choice of three plans within the Fund, but also it is easier for unitholders to move between Plans as their needs change.

Each plan under the Fund shall follow a different investment pattern / style to cater the need different investor classes at different stages of their lifecycle. Accordingly:

Progressive Plan shall focus on the need & risk appetite of young age people and shall aim to provide long term growth by investing at-least 85% of its net assets in equity and equity related instruments. This plan may also invest upto 15% of its net assets into debt securities.

Moderate Plan shall focus on the need and risk appetite of middle age people shall aim to provide growth along with the increased exposure towards debt securities as compare to the Progressive Plan. This plan shall, at-least 15% of its net assets, compulsory invest into debt securities and restricts its exposure to equity to a maximum of 85% of the net assets.

Conservative Plan shall focus on the need & risk appetite of elder age people and shall aim on the preservation of capital along with the steady income stream by investing at least 70% of its net assets into debt and money market instruments. However, in order to get a long term investment advantage, this plan may also invest in to equities to a maximum extent of 30% of its net assets.

Depending upon the investment opportunities as may arise from time to time; plans under the fund may also invest in overseas securities.

The plans may also use the derivatives to manage the risks and to take the advantage of price differentiation in two segments and to rebalance the portfolios.

While investing in equities, the Fund will emphasise on investment in well managed, quality companies with above average growth prospects that can be purchased at a reasonable price. Typically, these companies will be highly competitive, with a large and growing market share. In selecting specific stocks, the Asset Management Company will consider and evaluate amongst various criteria network, consistent growth, strong cash flows, high return on capital etc. Investment in fixed income securities (wherever possible) will be mainly in investment grade listed / unlisted securities. In case of investment in debt instruments that are not rated, specific approval of the Board of AMC and Trustee Company will be taken.

While investing in debt securities, the Fund would invest in companies based on various criteria including sound professional management, track record, industry scenario, growth prospectus, liquidity of the securities, etc. The Fund will emphasise on well managed, quality companies with above average growth prospectus whose securities can be purchased at a good yield and whose debt securities are concerned investments (wherever possible) will be mainly in securities listed as investments grade by a recognised authority like The Credit Rating and Information Services of India Limited (CRISIL), ICRA Limited (formerly, Investment Information and Credit Rating Agency of India Limited), Credit Analysis and Research Limited (CARE) etc. In case of investments in debt instruments that are not rated, specific approval of the Board will be taken except in case of Government Securities being sovereign bonds. However, in case of investment in unrated securities prior board

approval is not necessary if investment is within the parameters as stipulated by the board.

All the three plans under the fund may have similar securities. However, the exact proportion of such securities will depend upon the asset allocation of the respective plan.

Writing of call options under covered call strategy (Applicable for Progressive & Moderate Plan)

The scheme may write call options under covered call strategy subject to conditions specified by SEBI which includes the following:

- 1) Call option writing under a cover call strategy is allowed for constituent stocks of NIFTY 50 and BSE SENSEX.
- 2) The total notional value (taking into account strike price as well as premium value) of call options written by a scheme shall not exceed 15% of the total market value of equity shares held in that scheme.
- 3) The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrance.
- 4) In no case, the scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
- 5) The total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.
- 6) The call option written shall be marked to market daily and the respective gains or losses factored into the daily NAV of the respective scheme(s) until the position is closed or expired

Benefit of Writing of Call Option Under a Cover Call Strategy

- a. Holders with Long term view on the stock can write options and reduce the portfolio costs.
- b. Writing can also act as a good alternative for playing relative outperformance for stocks held in portfolios within same sector.
- c. Stocks held in the portfolio can be effectively hedged in extreme volatility in the market

Illustration

For example, if the scheme buy a stock A at Rs.900, receive a Rs.100 option premium from writing a Rs.1050 strike price call of stock A, then it can maintain the stock position as long as the stock price stays below Rs.1150 at expiry. If the stock price moves above Rs.1150, the scheme may have to give delivery of long position to meet obligation of call writing. The scheme can only profit if stock price remains below Rs.1150 on expiry.

For detailed risk associated with use of derivatives, please refer paragraph "Scheme Specific risk factors".

For detailed derivative strategies, please refer to SAI.

RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Scheme Specific Risk Factors:

Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the fund invests fluctuates, the value of your investment in the fund / plans may go up or down
- Mutual Funds and securities investments are subject to market risks and there can be no assurance and no guarantee that the fund / plans will achieve its objective.
- As with any investment in stocks, shares and securities, the NAV of the Units under this fund / plans can go up or down, depending on the factors and forces affecting the capital markets.
- Past performance of the previous Schemes, the Sponsors or its Group / Affiliates / AMC / Mutual Fund is not indicative of and does not guarantee the future performance of the fund / plans.
- The sponsors are not responsible or liable for any loss resulting from the operations of the fund beyond the initial contribution of Rs. 1 lakh made by them towards setting up of the mutual fund.
- 'Tata Retirement Savings Fund- Progressive Plan', 'Tata Retirement Savings Fund- Moderate Plan' and 'Tata Retirement Savings Fund- Conservative

Plan' are only the names of the scheme / plan under the fund and does not in any manner indicate either the quality of the Fund / plans, its future prospects or the returns. Investors therefore are urged to study the terms of the Offer carefully and consult their tax and Investment Advisor before they invest in the Fund / plans.

- Mutual Fund investments are subject to market risks, read all scheme related documents carefully.
- The present fund / plans under the fund are not guaranteed or assured return fund / plans.

Other Risk Factors:

Risk Related to the Overseas Investments:

The plans under the fund may invest in overseas securities and overseas investments are prone to following risks:

In respect of the corpus of the plan under the fund that is invested in overseas mutual fund schemes, investors shall bear the proportionate recurring expenses of such underlying scheme(s), in addition to the recurring expenses of the plan. Therefore, the returns attributable to such investments by the plan may be impacted or may, at times, be lower than the returns that the investors could obtain by directly investing in the said underlying scheme.

To the extent the assets of the plans under the fund are invested in overseas financial assets, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market. Further, the repatriation of capital to India may also be hampered by changes in regulations or political circumstances as well as the application to it of other restrictions on investment. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilization of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.

The plans under the fund may also invest in ADRs / GDRs / Foreign Debt Securities as permitted by Reserve Bank of India and Securities and Exchange Board of India. To the extent that some part of the assets of the plans may be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

As the investments may be made in stocks of different countries, the portfolio shall be exposed to the political, economic and social risks with respect to each country. However, the portfolio manager shall ensure that his exposure to each country is limited so that the portfolio is not exposed to one country. Investments in various economies will also diversify and reduce this risk.

Currency Risk: The plans under the fund may invest in securities denominated in a broad range of currencies and may maintain cash in such currencies. As a consequence, fluctuations in the value of such currencies against the currency denomination of the relevant scheme will have a corresponding impact on the value of the portfolio. Furthermore, investors should be aware that movements in the rate of exchange between the currency of denomination of a fund and their home currency will affect the value of their shareholding when measured in their home currency.

Liquidity and Settlement Risks

The liquidity of the Fund's / plans' investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the various plans under the fund will invest in certain securities of certain companies, industries, sectors, etc. based on certain investment parameters as adopted internally by TAMPL. While at all times the Asset Management Company will endeavour that excessive holding/investment in certain securities of industries, sectors, etc. by the Fund/plans is avoided, the funds invested by the Fund / plans in certain securities of industries, sectors, etc. may acquire a substantial portion of the Fund's / plans' investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. Reduced liquidity in the secondary market may have an adverse impact on market price and the Fund's / plans' ability to dispose of particular securities, when necessary, to meet the Fund's / plans' liquidity needs or in response to a specific economic event or during restructuring of the Fund's / plans' investment portfolio. Furthermore, from time to time, the Asset Management Company, the Custodian, the Registrar, any Associate, any Distributor, Dealer, any Company, Corporate Bodies, Trusts, any Retirement and Employee Benefit Funds or any Associate or otherwise, any scheme / mutual fund managed by the Asset Management Company or by any other Asset Management Company may invest in the Fund / plans. While at all times the Trustee Company and the Asset Management Company will endeavour that excessive holding of Units in the Fund / plans among a few Unitholders is avoided, however, the funds invested by these aforesaid persons may acquire a substantial portion of the Fund's / plans' outstanding Units and collectively may constitute a majority unitholder in the Fund / plans. Redemption of Units held by such persons may have an adverse impact on the value of the Units

of the Fund / plans because of the timing of any such redemptions and this may impact the ability of other Unitholders to redeem their respective Units.

Investment Risks

The value of, and income from, an investment in the Fund can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the fund's / plan's portfolio of securities. The returns of the individual plan's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Fund's investment objective will be attained or that the Fund be in a position to maintain the model percentage of investment pattern particularly under exceptional circumstances.

The fund may use techniques and instruments for efficient portfolio management and to attempt to hedge or reduce the risk of such fluctuations. However, these techniques and instruments if imperfectly used have the risk of the fund incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any). The use of these techniques is dependent on the ability to predict movements in the prices of securities being hedged and movements in interest rates. There exists an imperfect correlation between the hedging instruments and the securities or market sectors being hedged. Besides, the fact that skills needed to use these instruments are different from those needed to select the Fund's / plan's securities. There is a possible absence of a liquid market for any particular instrument at any particular time even though the futures and options may be bought and sold on an organised exchange. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase / redemption requests or other short-term obligations because of the percentage of the Fund's assets segregated to cover its obligations.

Securities Lending by the Mutual Fund

The Scheme may participate in securities lending and borrowing scheme in accordance with Securities Lending Scheme, 1997, Regulation 44 (4) of SEBI (Mutual Funds) Regulations ,1996, provision 12.11 of SEBI Master Circular on Mutual Funds dated June 27, 2024,. The Scheme shall also follow other relevant regulations /guidelines issued by stock exchange(s) from time to time. The Scheme shall participate in Securities Borrowing and Lending only with the SEBI approved intermediaries.

Stock Lending means the lending of securities to SEBI Intermediaries for a tenure of 1 to 12 months at a negotiated compensation in order to enhance returns of the fund portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The AMC will adhere to the following strict internal limits should it engage in Stock Lending.

Not more than 25% of the net assets of the fund can generally be deployed in stock lending & single intermediary limit is 5%. Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, and government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis.

Example:

A fund has a security of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the security, from time to time if any, on the exchange. If the fund is enabled to lend the said security to a borrower who would be wanting to take advantage of the market fluctuations in its price, the borrower would return the security to the lender (fund) at a stipulated time or on demand for a negotiated compensation. The fund's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost of the security. Thus it is in the interest of the investors that returns can be enhanced by way of stock lending rather than hold the security only for capital appreciation potential.

Thus the scenario under which the fund would participate in stock lending would be:

1. There is a holding of security e.g. of XYZ Ltd in the fund which the fund manager wants to be the core holding of the fund for approximately 6 to 12 months.
2. There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs the said security of XYZ Ltd to settle it) who is willing to put up a proper collateral for the same (In all cases higher than the price of the script).

3. The borrower is represented by a proper recognized intermediary.
4. The agreement is to return the security or the amount so negotiated at a particular period of time or on demand.

Then the security will be lent by the fund and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, stock lending would be done by the fund only in the following circumstances:

- a) If permitted by trustees and the extent SEBI regulations in that regard, from time to time.
- b) If such activity generates additional returns for the fund and helps to enhance the fund returns.
- c) If considering the above and other factors all considered in totality, such activity is in the interest of unitholders in the fund.

Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Fund. Besides, there is also be temporary illiquidity of the securities that are lent out and the fund will not be able to sell such lent out securities until they are returned.

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the fund and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

Interest Rate Risk

As with debt instruments, changes in interest rate may affect the Fund's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the plans are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Counterparty Risk

This is the risk of failure of counterparty to the transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the scheme in case of counterparty default.

Derivatives carry the risk of adverse changes in the market price. The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Although for exchange traded derivatives, the risk is mitigated as the exchange provides the guaranteed settlement however in OTC trades the possibility of settlement is limited.

Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way

of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

Risk Factors Concerning Floating Rate Debt Instruments and Fixed Rate Debt Instruments Swapped for Floating Rate Return

1. **Basis Risk (Interest Rate Movement):** During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These type of events may result in loss of value in the portfolio.
2. **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions the spreads may move adversely or favourably leading to fluctuation in NAV.
3. In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".

Risk of Writing of Call Option Under a Covered Call Strategy (Applicable for Progressive & Moderate Plan)

Under a delivery settlement a call writer will have to part with the physical holding of security which was originally intended for long term holding.

Risks associated with Segregated Portfolio (Applicable for Moderate & Conservative Plan)

Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.

Security comprises of segregated portfolio may not realise any value.

Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risks Associated with Investments in REITs and InvITs:(Applicable for Moderate & Conservative Plan)

- **Market Risk:** REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. AMC/Fund Manager's will do the necessary due diligence, but actual market movements may be at variance with the anticipated trends.
- **Liquidity Risk:** As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Regulatory/Legal Risk:** REITs and InvITs being new asset classes, rights of unit holders such as right to information etc. may differ from existing capital market asset classes under Indian Law.

Disclosures / Risk Factors with respect to investment in Securitized Debt:

Securitized Debt such as Mortgage Backed Securities ("MBS") or Asset Backed Securities ("ABS") is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. Asset Securitization is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitization involves sale of specific receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company.

The SPV in turn issues financial instruments (promissory notes, participation certificates or other debt instruments) also referred to as "Securitized Debt" to the investors evidencing the beneficial ownership of the investors in the receivables. The financial instruments are rated by an independent credit rating agency.

Risks Associated with Securitized Debt

Risk due to prepayment: In case of securitized debt, changes in market interest rates and pre-payments may not change the absolute amount of receivables for the investors but may have an impact on the reinvestment of the periodic cash flows that an investor receives on securitized papers.

In the event of pre-payment of the underlying debt, investors may be exposed to changes in tenor and yield.

Liquidity Risk: Presently, despite recent legal developments permitting the listing of securitized debt instruments, the secondary market for securitized debt in India is not very liquid. Even if a more liquid market develops in the future, secondary transactions in such instruments may be at a discount to initial issue price due to changes in the interest rate structure.

Limited Recourse and Credit Risk: Certificates issued on investment in securitized debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors and thereby, adversely affect the NAV of the Fund. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low.

Bankruptcy Risk: If the originator of securitized debt instruments in which the Fund invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', then the Fund could experience losses or delays in the payments due. Normally, care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'.

Risk of Co-mingling: Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the Servicer fails to remit such funds due to investors, investors in the Fund may be exposed to a potential loss.

1. Risk profile of securitized debt vis a vis risk appetite of the fund:

Securitized Debt is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. In line with the investment strategy of the Fund and considering that there would be no intermediate redemption pressures for the Fund Manager, the Fund may take exposure to rated Securitized Debt with the intent to enhance portfolio yield without compromising on credit quality.

Further as a prudent measure of risk control, Investment in Securitized Debt will not exceed 50% of the net assets of the Fund.

Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc

The evaluation parameters of the originators are as under:

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
 - Outlook for the economy (domestic and global)
 - Outlook for the industry
 - Company specific factors

Track record

We ensure that there is adequate past track record of the Originator before selection of the pool including a detailed look at the number of issuances in past, track record of issuances, experience of issuance team, etc. We also look at the credit profile of the Originator for its own debt. We normally invest only if the Originator's credit rating is at least 'AA' (+/- or equivalent) or above by a credit rating agency recognized by SEBI.

Willingness to pay

As the securitized structure has underlying collateral structure, depending on the asset class, historical NPA trend and other pool / loan characteristics, a credit enhancement in the form of cash collateral, such as fixed deposit, bank guarantee etc. is obtained, as a risk mitigation measure.

Ability to pay

This assessment is based on a detailed financial risk assessment.

A traditional SWOT analysis is used for identifying company specific financial risks. One of the most important factors for assessment is the quality of management based on its past track record and feedback from market participants. In order to assess financial risk a broad assessment of the issuer's financial statements is undertaken to review its ability to undergo stress on cash flows and asset quality.

Business risk assessment, wherein following factors are considered:

- Outlook for the economy (domestic and global)
- Outlook for the industry
- Company specific factors

In addition a detailed review and assessment of rating rationale is done including interactions with the company as well as agency.

Typically we would avoid investing in securitization transaction (without specific risk mitigant strategies / additional cash/security collaterals/ guarantees) if we have concerns on the following issues regarding the originator / underlying issuer:

- High default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios - both on a standalone basis as well on a consolidated level/ group level. This is very important in case of single borrower loan sell down
- Higher proportion of re-schedulement of underlying assets of the pool or loan
- Higher proportion of overdue assets of the pool or the underlying loan
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan

Minimum retention period of the debt by originator prior to securitization

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements. In addition, RBI has proposed minimum holding period of between nine and twelve months for assets before they can be securitized. The minimum holding period depends on the tenor of the securitization transaction. The Fund will invest in securitized debt that are compliant with the laws and regulations.

Minimum retention percentage by originator of debts to be securitized

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements, including maximum exposure by the originator in the PTCs. In addition, RBI has proposed minimum retention requirement of between five and ten percent of the book value of the loans by the originator. The minimum retention requirement depends on the tenor and structure of the securitization transaction. The Fund will invest in securitized debt that are compliant with the laws and regulations.

The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund

An investment by the fund in any security is done after detailed analysis by the Fixed Income team and in accordance with the investment objectives and the asset allocation pattern of a fund. All investments are made on an arms length basis without consideration of any investments (existing/potential) in the fund made by any party related/involved in the transaction. The robust credit process ensures that there is no conflict of interests when a scheme invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme. Normally the issuer who is securitizing instrument is in need of money and is unlikely to have long term surplus to invest in mutual fund scheme.

Furthermore, there is clear cut segregation of duties and responsibilities with respect to Investment function and Sales function. Investment decisions are being taken independently based on the above mentioned parameters and investment by the originator in the fund is based on their own evaluation of the fund vis a vis their investment objectives.

The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

The risk assessment process for securitized debt, as detailed in the preceding paragraphs, is same as any other credit. The investments in securitized

debt are done after appropriate research by credit analyst. The ratings are monitored for any movement.

The resources for and mechanisms of individual risk assessment with the AMC for monitoring investment in securitized debt are as follows:

- Fixed Income Team - Risk assessment and monitoring of investment in Securitized Debt is done by credit team.
- Ratings are monitored for any movement - Based on the cash-flow report and analyst view, periodic review of utilization of credit enhancement shall be conducted and ratings shall be monitored accordingly.
- Wherever the fund's portfolio is disclosed, the AMC may give a comprehensive disclosure of Securitized debt instruments held in line with SEBI requirement.

Note: The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

Note: The Risk Profile will be Medium to High.

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risk Associated with investment in Instruments having Special Features:

Credit Risk/Principal at risk: The issuer has the option to write off the principal in times of severe financial stress. Since these bonds are unsecured investor will have any recourse to recover money in case issuer write off the principal. Such bonds may get converted into equity on happening of certain pre-defined event.

Central Bank may instruct issuer of the bonds to write down the entire value of its outstanding AT1 bonds, if it thinks the bank has passed the Point of Non Viability (PONV), or requires a capital infusion to remain a going concern.

Also, issuer may not pay interest under certain circumstances. Such interest can not be recovered in future also.

Interest Rate Risk: where there is no defined maturity, it may yield lower interest especially when the interest rates are rising.

Liquidity Risk: There is no surety that bond holder will get your principal back on the call date as the issuer may choose to extend the tenure of bonds at a future date. Bond holder has the option of selling these bonds in the secondary market but bond holder may have to exit at a loss as the bond's price may differ from the cost price. Also, some of these are bonds are thinly traded, which means there are limited buyers.

The above risk factors may result in losses to the scheme.

Risk associated with investing in Repo of Corporate Bond Securities (Applicable for Conservative Plan)

To the extent the scheme invests in Repo of Corporate Bond Securities, the scheme will be subject to following risks -

- Corporate Bond Repo will be subject to counter party risk.
- The Scheme will be exposed to credit risk on the underlying collateral-downward migration of rating. The scheme may impose adequate haircut on the collateral to cushion against any diminution in the value of the collateral. Collateral will require to be rated AA and above rated where potential for downgrade/default is low. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

Liquidity of collateral: In the event of default by the counterparty, the scheme would have recourse to recover its investments by selling the collateral in the market. If the underlying collateral is illiquid, then the Mutual Fund may incur an impact cost at the time of sale (lower price realization).

A. Risk mitigation strategies

Risk Mitigation Strategies - Investments in securitized debt will be done based on the assessment of the originator which is carried out by the Fixed Income team based on the in-house research capabilities as well as the inputs from the independent credit rating agencies.

In order to mitigate the risk at the issuer/originator level, the Fixed Income team will consider various factors which will include:

- size and reach of the originator
- the infrastructure and follow-up mechanism
- quality of information disseminated by the issuer/originator; and
- the Credit enhancement for different type of issuer/originator
- the originator's track record in that line of business

The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

Majority of securitized debt investments shall be in asset backed pools wherein the underlying assets could be Medium and Heavy Commercial Vehicles, Light Commercial Vehicles (LCV), Cars, and Construction Equipment, Mortgages etc.

The Fund Manager will invest in securitized debt which are rated 'AA' (+/- or equivalent) or above by a credit rating agency recognized by SEBI. While the risks mentioned above cannot be eliminated completely, they may be minimized by considering the diversification of the underlying assets as well as credit and liquidity enhancements.

Table 1: illustrates the framework that will be applied while evaluating investment decision relating to a pool securitization transaction:

Characteristics/Type of Pool	Mortgage Loan	Commercial Vehicle and Construction Equipment	CAR	2 wheelers	Micro Finance Pools	Personal Loans	Single Sell Downs	Others
Approximate Average maturity (in Months)	Up to 120 months	Up to 60 months	Up to 60 months	Up to 60 months	Up to 12 months	Up to 36 months	Case by case basis	Any other class of securitized debt would be evaluated on a case by case basis
Collateral margin (including cash, guarantees, excess interest spread, subordinate tranche)	In excess of 3%	In excess of 5%	In excess of 5%	In excess of 5%	In excess of 10%	In excess of 10%	Case by case basis	
Average Loan to Value Ratio	95% or lower	100% or lower*	95% or lower	95% or lower	Unsecured	Unsecured	Case by case basis	
Average seasoning of the Pool	Minimum 3 months	Minimum 6 months	Minimum 6 months	Minimum 6 months	Minimum 1 month	Minimum 2 months	Case by case basis	
Maximum single exposure range	5%	5%	1%	1%	<1%	<1%	Case by case basis	
Average single exposure range %	<5%	<5%	<1%	<1%	<1%	<1%	Case by case basis	

* LTV based on chasis value

Note: The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

In addition to the framework as per the table above, we also take into account following factors, which are analyzed to ensure diversification of risk and measures identified for less diversified investments:

- **Size of the loan:** The size of each loan is generally analyzed on a sample basis and an analysis of the static pool of the originator is undertaken to ensure that the same matches with the static pool characteristics. It also indicates whether there is high reliance on very small ticket size borrower which could result in delayed and expensive recoveries.
- **Average original maturity of the pool:** The analysis of average maturity of the pool is undertaken to evaluate whether the tenor of the loans are generally in line with the average loans in the respective industry and repayment capacity of the borrower.
- **Default rate distribution:** The Fixed Income team generally ensures that all the contracts in the pool are current to ensure zero default rate distribution.
- **Geographical Distribution:** The analysis of geographical distribution of the pool is undertaken to ensure prevention of concentration risk.
- **Risk Trenching:** Typically, we avoid investing in mezzanine debt or equity of Securitized debt in the form of sub ordinate tranche, without specific risk mitigant strategies / additional cash / security collaterals/ guarantees, etc.
- **Credit enhancement facility** - credit enhancement facilities in the form of cash collateral, such as fixed deposits, bank guarantee etc. could be obtained as a risk mitigation measure.

- **Liquid facility** - these parameters will be evaluated based on the asset class as mentioned in the table above
- **Structure of the pool of underlying assets** - The structure of the pool of underlying assets would be either single asset class or combination of various asset classes as mentioned in the table above. We could add new asset class depending upon the securitization structure and changes in market acceptability of asset classes

Investment in the Single Loan Securitization would be done based on the assessment of credit risk associated with the underlying borrower as well as the originator. The Fixed Income team will adhere internal credit process and perform a detailed review of the underlying borrower prior to making investments.

Risk mitigation measures for equity and related investments:

Investment in equity has an inherent market risk which can not be mitigated generally. However, following measures have been implemented with an objective to mitigate /control other risks associated with equity investing:

Nature of Risk	Measures to Mitigate Risk
Regulatory Risk	Online monitoring of various exposure limits by the Front Office System. Also as a back up, manual controls are also implemented.
Poor Portfolio Quality	Pre approved universe of stocks based on strong fundamental research. New stock addition only with the prior approval of investment committee.
Performance Risk	Periodical review of stock wise profit & loss. Review of fund performance vis. a vis. benchmark index as well as peer group.
Liquidity Risk	Periodical review of the liquidity position of each scrip (Market capitalization, average volume in the market vis. a vis. Portfolio Holding)
Concentration Risk	Cap on maximum single sector exposure. Cap on maximum single stock exposure. Exposure to minimum 'X' number of stocks / sectors in a portfolio.

Further, with respect to investments in overseas securities, apart from other risks, there is an inherent risk of currency fluctuation which can not be mitigated. However, the fund will strive to minimize such risk by hedging in the FOREX market as and when permitted.

Risk Mitigation measures for Debt and related Investments:

Nature of Risk	Measures to mitigate risk
Liquidity Risk	<ul style="list-style-type: none"> • Focus on good quality paper at the time of portfolio construction • Portfolio exposure spread over various maturity buckets.
Credit Risk	<ul style="list-style-type: none"> • In house dedicated team for credit appraisal • Issuer wise exposure limit • Rating grade wise exposure limit • Independent rating of fund portfolio by recognized rating agency. • Periodical portfolio review by the Board of AMC
Interest Rate Risk	<ul style="list-style-type: none"> • Close watch on the market events • Active duration management • Cap on Average Portfolio maturity depending upon the fund objective and strategy • Portfolio exposure spread over various maturities.
Regulatory Risk	Online monitoring of various exposure limits by the Front Office System also as a back up, manual control are implemented.

Further, the Investment Manager endeavours to invest in REITs/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on their own research as well as third party research. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.

PLANS AND OPTIONS

The Fund offers three plans viz. Progressive Plan, Moderate Plan and Conservative Plan.

Regular Plan (For applications routed through Distributors) : Growth

Direct Plan (For applications not routed through Distributors): Growth

Default Plan: Investors are requested to note the following scenarios for the applicability of "Direct Plan (application not routed through distributor) or Regular Plan (application routed through distributor)" for valid applications received under the plan of the scheme:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct Plan	Direct Plan
3	Not mentioned	Regular Plan	Direct Plan
4	Mentioned	Direct Plan	Direct Plan
5	Direct Plan	Not Mentioned	Direct Plan
6	Direct Plan	Regular Plan	Direct Plan
7	Mentioned	Regular Plan	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

Investor should appropriately tick the 'plan' (Progressive / Moderate / Conservative) in the application form while investing in the fund. If plan is not indicated by the investor, then units shall, by default, be allotted as under:

- If, at the time of investment, investor's age is less than 45 years then "Progressive Plan" shall be considered as a default plan and units shall be allotted accordingly.
- If, at the time of investment, investor's age is 45 years or greater but less than 60 years then "Moderate Plan" shall be considered as a default plan and units shall be allotted accordingly.
- If, at the time of investment, investor's age is 60 years or greater then "Conservative Plan" shall be considered as a default plan and units shall be allotted accordingly.

For detailed disclosure on default plans and options, kindly refer SAI.

APPLICABLE NAV (after the scheme opens for subscriptions and redemptions)

Applicable NAV for Subscription / Switch-in: Cut Off Timing 3.00 pm

Particulars	Applicable NAV
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the scheme before the cut-off time.	The closing NAV of the same day.
Valid applications received (time-stamped) after 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme either on the same day or before the cut-off time of the next Business Day i.e. available for utilization before the cut-off time of the next Business Day.	The closing NAV of the next Business Day.
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme after the cut-off time on the same day i.e. available for utilization after the cut-off time of the Day.	The closing NAV of the next Business Day.
Where the application is time stamped any day before the credit of the funds to the scheme but the funds for the entire amount are credited to the bank account of the scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on such subsequent Business Day.	The closing NAV of such subsequent Business Day on which funds are available for utilisation.

Realisation of funds means funds available to the AMC Scheme Account and not date and time of debit from Investor's account.

In case application is time stamped after cut off timing on any day, the same will be considered as deemed to be received on the next business day.

In case funds are realised after cut-off timing on any day, the same will be considered as deemed to be realised / available for utilisation on the next business day.

For Switch-ins including Systematic Investment Plan (SIP), Systematic Transfer Plan (STP) of any amount:

For determining the applicable NAV, the following shall be ensured:

- Application for switch-in is received before the applicable cut-off time.
- Funds for the entire amount of subscription / purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time, and the funds are available for utilization before the cut-off

time.

- In case of switch/STP transactions, funds will be made available for utilization in the switch-in- scheme based on the redemption payout cycle of the switch out

Scheme Redemption /Switch Out: In respect of application received upto 3 p.m., closing NAV of the day of receipt of application shall be applicable and in respect of application received after 3 p.m. closing NAV of next business day.

Outstation cheques/demand drafts will not be accepted.

Valid application for "switch out" shall be treated as redemption and for "switch in" shall be treated as purchases and the relevant NAV of "Switch in" and "Switch Out" shall be applicable accordingly.

MINIMUM APPLICATION AMOUNT / NUMBER OF UNITS UNDER EACH PLAN

Progressive, Moderate & Conservative Plan:

Minimum Amount for Purchase / switch in:

Rs. 5,000/- and in multiples of Re. 1/- thereafter.

For additional investment by existing investor Rs. 1,000/- and in multiples of Re.1/- thereafter.

The repurchase / switch-in request can be made for a minimum of Rs. 500/- / 50 units or folio balance whichever is lower.

The minimum application amount and minimum redemption amount wherever specified in the concerned SIDs & KIMs will not be applicable for investment made in schemes of the Fund in compliance with the provision 6.10 of SEBI Master Circular on Mutual Funds dated June 27, 2024 on(Alignment of interest of Designated Employees of Asset Management Companies (AMCs) with the Unitholders of the Mutual Fund Schemes).

There is no minimum amount requirement, in case of investors opting to switch "all units" from any existing schemes of Tata Mutual Fund to this Scheme.

DESPATCH OF REDEMPTION REQUEST

The redemption proceeds will be dispatched to the unit holders within three working days from the date of redemption or repurchase, subject to exceptional circumstances as mentioned further in Scheme Information Document.

BENCHMARK INDEX

Progressive Plan – Nifty 500 TRI (Tier I)

Moderate Plan – CRISIL Hybrid 25+75 Aggressive Index (Tier I)

Conservative Plan – CRISIL Short Term Debt Hybrid 75+25 Index (Tier I)

DIVIDEND POLICY

Income Distribution cum Capital Withdrawal Policy

At present the Fund does not envisage any income distribution under any of the plan. The income / profits received / earned would be accumulated by the Fund as per the objective of the Fund as capital accretion, aimed at achieving medium to long term capital growth and reflected in the NAV. Guided by the philosophy of value-oriented returns, the Trustee Company may periodically capitalise net earnings of the Fund (including interest income and realised gains and losses on the Securities) by way of allotment/ credit to the Unitholders Accounts, the intent being to protect the Net Asset Value of the Fund and Unitholders' interests.

The Fund does not assure any targeted annual return / income or any capitalisation ratio. Normally the Fund will have positive net earnings at the time of each determination of earnings and the consequent NAV. However, accumulation of earnings and / or capitalisation of units and the consequent determination of NAV, may be suspended temporarily or indefinitely under any of the circumstances as stated in the clause "Suspension of Ongoing Sale, repurchase or switch of units" under General Information section of SAI"

However, the fund may introduce Income Cum Withdrawal options subsequently.

EXPENSES OF THE SCHEME

Load Structure

Continuous Offer

For Progressive, Moderate & Conservative Plans:

Entry Load: N.A. for all the plans under the fund.

Exit Load:

- If redeemed / switched-out on or after attainment of retirement age i.e. 60 years of age - Nil
- In case of Auto switch-out of units on occurrence of "Auto-switch trigger event" - Nil
- For Redemption of units before completion of 61 months from the date of allotment: 1% of the applicable NAV

[Not applicable for those who have attained the retirement age i.e 60 years of age)]

Pursuant to AMFI's communication dated 09th April 2025, Exit Load will not be charged on any Switch/Systematic transfer transaction from Regular plan to Direct plan of the same scheme w.e.f. 23rd April 2025.

Exit Load Free Switch-outs*: After completion of 5 years from the date of allotment or attainment of 60 years of age, investors can avail exit load free switch from one plan to other plan of 'the Fund. However, this facility is available for a maximum six occasions during the tenure of investment in the Fund.

Calculation of holding period - In case of switch-out (auto switch or otherwise) of units, before attainment of the retirement age, to other plans of this fund, holding period for the purpose of exit load will be the overall holding period in "Tata Retirement Savings Fund" (i.e. aggregate of the holding period in switch out plan as well as switch in plan).

*It may please be noted that, those investors who avail this exit load free switch-out facility are required to re-register for the auto-switch facility form the plan to which they switch-in. However, auto-SWP facility shall remain in force and will be activated, upon attainment of the age of 60 years, from the plan to which they switch-in and units issued on reinvestment of IDCW shall not be subject to exit load.

Slab wise break up depending on the assets under management:

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

As per provision no. 52.6.c of SEBI (Mutual Funds) Regulations, 1996 the total expense ratio of open-ended scheme shall not exceed the following limits. The AMC has estimated that upto 2.25% (for equity oriented schemes and 2% for other than equity oriented schemes (excluding additional permissible limits as per Regulation 52(6A)(b) & 52(6A)(c)) of the daily average net assets of the scheme will be charged to the scheme as expenses.

Assets under management Slab (In Rs. crore)	Total expense ratio limits for equity-oriented schemes	Total expense ratio limits for other than equity-oriented schemes
On the first Rs.500 crores of the daily net assets	2.25%	2.00%
On the next Rs.250 crores of the daily net assets	2.00%	1.75%
On the next Rs.1,250 crores of the daily net assets	1.75%	1.50%
On the next Rs.3,000 crores of the daily net assets	1.60%	1.35%
On the next Rs.5,000 crores of the daily net assets	1.50%	1.25%
On the next Rs.40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof.	
On balance of the assets	1.05%	0.80%

For the actual current expenses being charged, the investor should refer to functional Weblink: <https://www.tatamutualfund.com/expense-ratio/total-expense-ratio>.

Annual Recurring expenses

Actual Expenses % to daily net assets for the F.Y. 2023-2024		
	Direct Plan	Regular Plan
Tata Retirement Savings Fund - Progressive	0.49%	1.55%
Tata Retirement Savings Fund - Moderate	0.54%	1.94%
Tata Retirement Savings Fund - Conservative	0.83%	2.04%

The maximum limit of recurring expenses that can be charged to the Scheme would be as per Regulation 52 of the SEBI (MF) Regulation, 1996. Investors are requested to read "Section-Annual Scheme Recurring Expenses" in the SID.

TAX TREATMENT FOR THE INVESTORS (UNITHOLDERS)

Investor will be advised to refer to the details in the Statement of Additional Information and also independently refer to his tax advisor.

DAILY NET ASSET VALUE (NAV) PUBLICATION

The NAVs will be calculated and disclosed on every Business Day. The AMC will prominently disclose the NAVs under a separate head on the website of the Fund (www.tatamutualfund.com) and of the Association of Mutual Funds in India-AMFI (www.amfiindia.com) by 11 P.M. on every business day[^].

However, due to inability in capturing same day valuation of underlying investments, the NAV shall be disclosed by 11 P.M. of the next business day[^].

[^] If the NAVs are not available before the commencement of Business Hours on the following day (i.e., next day after the respective business day) due to any reason, the Mutual Fund shall issue a press release giving reasons for the delay and explain by when the Mutual Fund would be able to publish the NAV.

In case NAV of Corporate Debt Market Development Fund ('CDMDF') units is not available by 9:30 p.m. of same Business Day, NAV declaration timing for Mutual Fund Schemes holding units of CDMDF shall be 10 a.m. on next business day instead of 11 p.m. on same Business Day.
