

TATA ARBITRAGE FUND

(An open ended scheme investing
in arbitrage opportunities)

(SCHEME CODE - TATA/O/H/ARB/18/06/0030)

This product is suitable for investors who are seeking*:

- Income over a short term investment horizon.
- Investments predominantly in arbitrage opportunities in the cash and derivative segments of the equity markets and by investing the balance in debt and money market instruments.

***Investors should consult their financial advisors if in doubt about whether the product is suitable for them.**

It may be noted that risk-o-meter specified above is based on internal assessment. The same shall be updated as per provision no. 17.4.1.i of SEBI Master Circular on Mutual Fund dated 27.06.2024, on Product labelling in mutual fund schemes on ongoing basis.

Units were offered at Rs. 10/- each for cash during the New Fund Offer & Continuous offer for units at NAV based prices, subject to applicable load.

New Fund Offer Opened On	10.12.2018
New Fund Offer Closed On	17.12.2018
Scheme Re-opened On	18.12.2018

Name of Mutual Fund	Name of Trustee Company	Name of Asset Management Company
Tata Mutual Fund 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051	Tata Trustee Co. Pvt. Ltd. 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051 CIN: U65991-MH-1995-PTC-087722	Tata Asset Management Pvt. Ltd. 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051 CIN: U65990-MH-1994-PTC-077090

This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. **For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, ,penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investor Service Centres or distributors or from the website www.tatamutualfund.com**

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

This Key Information Memorandum is dated 30 May 2025

INVESTMENT OBJECTIVE

The investment objective of the Scheme is to seek to generate reasonable returns by investing predominantly in arbitrage opportunities in the cash and derivatives segments of the equity markets and by investing balance in debt and money market instruments.

There is no assurance that the objective of the Scheme will be realised and the Scheme does not assure or guarantee any returns.

ASSET ALLOCATION PATTERN OF THE SCHEME

Under normal circumstances, when arbitrage opportunities are available and accessible, the asset allocation of the Scheme will be as follows:

Instruments	Indicative allocations (% of net assets)	
	Minimum	Maximum
Equity and equity related securities and equity derivatives ⁵	65	100
Debt, Money market instruments and cash (including units of liquid schemes of Tata Mutual Fund)	0	35

\$ The exposure to derivative shown in the above asset allocation table is exposure taken against the underlying equity investments i.e. in case the scheme shall have a long position in a security and a corresponding short position in the same security, then the exposure for the purpose of asset allocation will be counted only for the long position. The intent is to avoid double counting of exposure and not to take additional asset allocation with the use of derivative. If suitable arbitrage opportunities are not available in the opinion of the Investment manager, the Scheme may hedge the equity portfolio by using derivatives or may invest in short term debt / money market instruments.

The scheme will not invest in stock lending and short selling.

Indicative Table (Actual instrument / percentages may vary subject to applicable SEBI circulars):

Sr. No.	Type of Instrument	Percentage of Exposure	SEBI Master Circular on Mutual Fund dated June 27, 2024 Reference
1	Securities Lending	Will not invest	Provision no. 12.11
2	Equity Derivatives for non-hedging Purposes	The Scheme may invest upto 90% of its net assets in equity derivatives.	Provision no. 12.25
3	Securitized Debt	Will not invest	Provision no. 12.15
4	Overseas Securities	Will not invest	Provision no. 12.19
5	ReITS and InVITS	Will not invest	Provision no. 12.21 & clause no. 13 of Seventh Schedule of SEBI (MF) Regulation, 1996.
6	AT1 and AT2 Bonds	Will not invest	Provision no. 12.2
7	Any other instrument α) Credit Default Swaps (CDS) β) Equity linked debentures. γ) Repo / reverse repo in corporate debt securities	Will not invest	Provision no. 12.18

The Scheme will comply with all the applicable circulars issued by SEBI as regard to derivatives viz. provision no. 5.2, 7.5, 7.6, 12.25, of SEBI Master Circular on Mutual Fund dated June 27, 2024. The cumulative gross exposure to equity, equity related instruments, debt, money market instruments and derivatives shall not exceed 100% of the net assets of the scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. Cash equivalent includes CBLO or any other instrument as allowed by SEBI, Reverse Repos, Fixed Deposits with Schedule Commercial Banks upto 91 day maturity and money market instruments upto 91 days maturity. Cash Equivalent shall consist Government Securities, T-Bills & Repo on Government Securities

The scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund

The margin money requirement for the purposes of derivative exposure will be held in the form of Term Deposits, cash or cash equivalents or as may be allowed under the Regulations.

Change in Investment Pattern / Portfolio Rebalancing

The Investment Patterns as outlined above are indicative. Investment strategy and pattern may be deviated from time to time, provided such modification is in accordance with the Scheme(s) objective and Regulations as amended from time to time, the intent being to protect the Net Asset Value of the scheme and unitholders' interests. In case of deviation due to passive breaches, the AMC will achieve a normal asset allocation pattern in a maximum period of 30 business days. In case deviation in investment pattern in not rebalanced within the period indicated above then justification in writing for such delay including details of efforts undertaken to rebalance of portfolio shall be placed before the investment committee. The Investment Committee if so desires, can extend the timelines upto sixty (60) business days from the date of mandated completion of rebalancing period.

In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:

- not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- not to levy exit load, if any, on the investors exiting the scheme.

Credit Evaluation Process for the investments in Debt Securities:

In-house credit evaluation team has the necessary capability of conducting independent due diligences of credit risk. From credit evaluation perspective, companies are broadly classified under two sectors - Industrials and Financial Institutions. Industrials include Manufacturing and trading companies, while Financial Institutions include Banks and Non-Banking Financial Companies (NBFCs). The set of parameters for evaluation of credits for these sectors are different.

Broad guidelines for the appraisal of Industrials for short-term and long-term exposure include, but are not restricted to:

- External Ratings threshold: Investment is made only if the issuer credit rating is at least investment grade for long-term debt by a credit rating agency recognized by SEBI. In the short-term, investment is made in top notch (A1+ or equivalent) rated debt instruments. However, this is subject to review from time to time and investment committee / Board of AMC approval is required for any exception.
- Each company is internally appraised based on various parameters including, but not restricted to:
 - Business Fundamentals: Product/Service offerings, Market Position, Competitive Landscape, and Product cycle etc.
 - Regulatory environment: Support/intervention, developmental stage of industry, level of regulation
 - Financial Analysis: Margins, Profitability, Leverage, Working Capital requirement and cycle, Cash-flows etc. This is also seen in light of historic trend.
 - Management Track Record: Management track record, performance of company through economic cycle, promoters' background, other group companies.
 - Macro-Economic Environment: Economic cycle, Credit cycle

In the short-term, the focus is more on the working capital cycle, near-term cash-flows and existing business position, while in the long-term the focus is more on the outlook of the business, capital expenditure program, profitability etc.

The credit evaluation policy is subject to review from time to time. Any material change in the credit evaluation policy will be updated by way of an addendum to the scheme information document.

The asset allocation among the various debt securities will be decided based upon the prevailing market conditions, macro economic environment and the performance of corporate sector, the debt market and other considerations.

The investment policies mentioned in this SID are in conformity with the provisions of various constitutional documents VIZ.MOA/AOA of the TAMPL/ Trustee Company, IMA and the Trust Deed. Any change in the asset allocation affecting the investment profile of the scheme shall be effected only in accordance with the provisions of regulations 18-15A of SEBI (Mutual Funds) Regulations, 1996.

Note: The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

INVESTMENT STRATEGY

The investment strategy would be aimed at meeting the investment objective of the scheme. The investment strategy includes identifying and investing into arbitrage opportunities between spot/cash and futures prices of individual stocks and arbitrage opportunities available within the derivative segment. The Scheme may also invest in debt and money market securities instruments.

The Investment Strategy of the scheme is to invest primarily in arbitrage opportunities between spot and futures prices of exchange traded equities and the arbitrage opportunities available within the derivative segment. If suitable arbitrage opportunities are not available in the opinion of the Investment manager, the Scheme may hedge the equity portfolio by using derivatives or invest in short term debt and money market securities.

As arbitrage opportunities are dependent on ensuing market conditions, there will be a part of the portfolio, which will be invested in debt and money market securities. This component of the portfolio will provide the necessary liquidity to meet redemption needs and other liquidity requirements of the Scheme.

The list is not exhaustive, and the Fund could use similar strategies and any other strategies as available in the markets.

1. Index / Stock spot - Index / Stock Futures

The pricing of the futures is derived from underlying Index spot or the underlying stock. It is the cost of carry that binds the value of the futures to the underlying portfolio. When the two go out of sync, there are opportunities.

The cost of carry links the futures price to the price of the underlying asset. The price of the futures at any given instance should typically be more than the level of the spot price at that point. Theoretically, the fair value of the futures is equal to the spot price of the underlying plus the cost of carry i.e. the interest rate prevailing for an equivalent credit risk. Cash and carry trades at times provide higher than the prevailing interest rates. There is an opportunity to exploit by selling the overpriced futures and buying the underlying portfolio. It may also happen that the Index / Stock Future may be at a discount. In such cases, the Scheme may buy the future and sell the stock after borrowing the same. The Scheme shall enter into a combination of these transactions simultaneously.

If the Scheme has to unwind the positions prior to the expiry on account of redemptions or any other reason, the returns would depend on the spread between the spot and futures price at which the position is unwound. If the price differential between the spot and futures position of the subsequent month maturity is attractive near the expiry date, then the scheme may rollover the futures position and continue with the position in the spot market. The Scheme shall endeavour to deploy its assets through transactions in the above pattern, which may involve Index Futures with Stock Futures or Futures of the same stock with different expiry months.

2. Cash Futures Arbitrage Strategy

The fund would look for market opportunities between the spot and the futures market. The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock. The fund would first buy the stocks in cash market and then sell in the futures market to lock the spread.

Buying the stock in cash market and selling the futures results in a hedge where the fund portfolio has locked in a spread and is not affected by the price movements in the spot and futures markets. The arbitrage position can be continued till expiry of the futures contracts. The futures contracts are settled based on the last half an hour's weighted average trade of the cash market. There is a convergence between the cash market and the futures market on expiry and this convergence results in the portfolio being able to generate the arbitrage return locked in earlier. However, the position may even be closed earlier in the event of the price differential being realized before expiry or better opportunities being available in other stocks / indexes. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of capital.

Illustration of a Cash Futures Arbitrage Strategy:-

Buy 100 shares of Company X at Rs 1000 and sell the same quantity of stock's futures of the Company X at Rs 1100.

- Market goes up and the price on the expiry day is Rs 2000.
At the end of the month (expiry day) the futures expire automatically:
Settlement price of futures = closing spot price = Rs 2000
Gain on stock is $100 \times (2000 - 1000) = \text{Rs } 100,000$
Loss on futures is $100 \times (1100 - 2000) = \text{Rs } -90,000$
Net gain is $100,000 - 90,000 = \text{Rs } 10,000$
- Market goes down and the price on the expiry day is Rs 500.
At the end of the month (expiry day) the futures expire automatically:
Settlement price of futures = closing spot price = Rs 500
Loss on stock is $100 \times (500 - 1000) = \text{Rs } -50,000$
Gain on futures is $100 \times (1100 - 500) = \text{Rs } 60,000$
Net gain is $60,000 - 50,000 = \text{Rs } 10,000$

Unwinding the position:

Buy 100 shares of Company X at Rs 1000 and sell the same quantity of stock's futures of the Company X at Rs 1100.

The market goes up and at some point of time during the month (before expiry) the stock trades at Rs 1200 and the futures trades at Rs 1190 then we unwind the position: Buy back the futures at Rs 1190: loss incurred is $(1100 - 1190) \times 100 = \text{Rs } -9,000$ Sell the stock at Rs 1200: gain realized: $(1200 - 1000) \times 100 = \text{Rs } 20,000$

Net gain is $20,000 - 9,000 = \text{Rs } 11,000$

Rolling over the futures:

The Scheme may continue to stay invested in the stock in the Cash market. Close to expiry, if the stock's price is at Rs 1500 then the stock's futures is close to Rs 1500 as well. Also if the price of the current month stock futures is below the current price of the next month stock futures, the scheme may roll over the futures position to the next expiry:

The price of the stock futures next month contract is at Rs 1510

The price of the stock futures current month contract is at Rs 1500

Then sell the futures next month contract at Rs 1510 and buy back current month futures contract at Rs 1500 = gain of $100 \times (1510 - 1500) = \text{Rs } 9,000$ and the arbitrage position is rolled over.

3. Use of derivative for other Arbitrage Opportunities

a. Dividend Arbitrage

At the time of declaration of dividend, the stock futures / options market can provide a profitable opportunity. Generally, the stock prices decline by the dividend amount when the stock becomes ex-dividend.

b. Buy-Back / Open Offer Arbitrage

When the Company announces the buy-back or open offer of its own shares, there could be opportunities due to price differential in buyback price and traded price.

c. Weighted average price of futures on expiry.

The fund manager will aim at liquidating the cash market position in the last half an hour on expiry day at a rate that will be closed to weighted price in the spot market. However the extreme volatility in last half an hour may effect the price and accordingly affect the return. Accordingly fund will aim at taking exposure to those stocks where the bid and ask spread is minimum.

d. Reverse cash and carry arbitrage

If permitted by SEBI, the scheme may enter into reverse cash and carry arbitrage. This will involve borrowing stock for a defined period from a recognized counter-party and selling it in the market while simultaneously taking a long position in the stock futures. The above trade will be remunerative in scenarios where the stock/ index futures are trading at a discount to the underlying cash market. Once the discount narrows or converts to a premium, the position is unwound by buying back the stock/index and squaring off the futures transaction. The purchased stock/ index is returned to the lender as per the agreed terms.

The scheme may use fixed income derivative instruments like Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced from time to time and as may be permitted under the SEBI (Mutual Fund) Regulations.

Interest Rate Swaps (IRS): An Interest Rate Swap is an agreement whereby two parties agree to exchange periodic interest payments. The amount of interest payments exchanged is based on some predetermined principal, called notional principal amount. The amount each counterparty pays to the other upon periodic interest rate multiplied by the notional principal amount. The only amount that is exchanged between the parties is the interest payment, not the notional principal amount.

Example: Use of IRS

The Plans of the fund are reasonably invested, and the view of the fund manager is interest rates are expected to move up due to certain negative events which have occurred. In such cases the plans can enter into a paid position (IRS) where the plans will pay a fixed rate for a specified maturity and receive the floating rate of interest. This is illustrated below:

Example A: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is bearish and call rates are likely to spurt over the next three months. The fund manager would therefore prefer to pay fixed rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days floating interest rate from overnight fixed rate.

- Say Notional Amount: Rs. 2 crores
- Benchmark: NSE MIBOR
- Tenor: 91 Days
- Fixed Rate: 9.90%
- At the end of 91 days;
- The Scheme pays: fixed rates for 91 days is 9.90%

7. TMF receives: compounded call rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. 2,00,00,000 x 0.35% x91 / 365 = 17,452. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

In view of the fund manager interest rates are expected to move down due to certain positive events which have occurred. In such cases the scheme can enter into a received position (IRS) where the scheme will receive a fixed rate for a specified maturity and pay the floating rate of interest. This is illustrated below:

Example B: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is soft and call rates are unlikely to spurt over the next three months. The fund manager would therefore prefer to receive a higher rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days fixed interest rate from overnight floating rate.

1. Say Notional Amount: Rs. 2 crores
2. Benchmark: NSE MIBOR
3. Tenor: 91 Days
4. Fixed Rate: 10.25%
5. At the end of 91 days;
6. The Scheme pays: compounded call rates for 91 days is 9.90%
7. TMF receives: Fixed rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. 2,00,00,000 x 0.35% x91 / 365 = 17,452. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

Forward Rate Agreements (FRA):

This is an agreement between two counterparties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date based on the notional amount, for an agreed period.

Illustration:

Assume that on March 21, 2023, the 30-day commercial paper (CP) rate is 7.75% and the Scheme has an investment in a CP of face value Rs. 50 crores, which is going to mature on April 20, 2023. If the interest rates are likely to remain stable or decline after April 20, 2023, and if the fund manager, who wants to re-deploy the maturity proceeds for 1 more month, does not want to take the risk of interest rates going down, he can then enter into a following forward rate agreement (FRA) say as on April 20, 2023:

He can receive 1 X 2 FRA on April 20, 2023 at 7.75% (FRA rate for 1-month lending in 2 months' time) on the notional amount of Rs.50 crores, with a reference rate of 30 day CP benchmark. If the CP benchmark on the settlement date i.e. April 20, 2023 falls to 7.50%, then the Scheme receives the difference 7.75 - 7.50 i.e. 25 basis points on the notional amount Rs. 50 crores for 1 month. The maturity proceeds are then reinvested at say 7.50% (close to the benchmark). The scheme, however, would have locked in the rate prevailing on April 20, 2023 (7.75%) as it would have received 25 basis points more as settlement amount from FRA. Thus the fund manager can use FRA to mitigate the reinvestment risk.

In this example, if the rates move up by 25 basis points to 8% on the settlement date (April 20, 2023), the Scheme loses 25 basis points but since the reinvestment will then happen at 8%, effective returns for the Scheme is unchanged at 7.75%, which is the prevailing rate on April 20, 2023.

Risks associated with Forward Rate Contracts:

When entering into an FRA, both parties to the contract entail credit risk exposure. The additional risks could be on account of lack of opportunity, illiquidity.

Mutual funds are allowed to hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio, is as per the formula given below:

$$\text{(Portfolio Modified Duration} \times \text{Market Value of the Portfolio)}$$

$$\text{(Futures Modified Duration} \times \text{Futures Price/PAR)}$$

The above derivative exposure limits shall be subject to following Exposure Limits (to be applicable for the schemes) as specified under provision no. 12.25.11.1 of SEBI Master Circular on Mutual Fund dated June 27, 2024:

1. The cumulative gross exposure through equity, debt and derivative positions shall not exceed 100% of the net assets of the scheme.
2. Mutual Funds shall not write options or purchase instruments with embedded written options.
3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
4. Cash or cash equivalents with residual maturity of less than 91 days shall be treated as not creating any exposure.
5. Exposure due to hedging positions shall not be included in the above mentioned limits subject to the following:
 - a) Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b) Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.
 - c) Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - d) The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
6. Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
7. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.

Definition of Exposure in case of Derivative Positions:

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price*Lot Size*Number of Contracts
Short Future Futures Price*Lot Size* Number of Contracts	Futures Price*Lot Size* Number of Contracts
Option Bought	Option Premium Paid*Lot Size* Number of Contracts.

In Addition to the above, SEBI has also prescribed following derivative limits:

As per provision no. 5.2, 7.5, 7.6, 12.25, of SEBI Master Circular on Mutual Fund dated June 27, 2024 Mutual Funds are allowed to trade in derivatives Mutual Funds can trade in index futures, index options, stock options and stock futures contracts. Earlier Mutual Funds were only allowed to use derivatives for hedging and portfolio balancing.

Presently, the position limits for trading in derivatives by Mutual Fund specified by SEBI are as follows:

Position Limits for Mutual Fund and its scheme

Position limit for Index Options and Index Futures contracts	
Index Options Contract*	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index options contracts, whichever is higher.
Index Futures Contract**	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index futures contracts, whichever is higher.

* This limit would be applicable on open positions in all options contracts on a particular underlying index.

** This limit would be applicable on open positions in all futures contracts on a particular underlying index.

Additional position limit for hedging	
In addition to the position limits as mentioned above, Mutual Funds may take exposure in equity index derivatives subject to the following limits:	Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.

Position limit for Stock Options and Stock Futures contracts
The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).
This limit would be applicable on aggregate open positions in all futures and all option contracts on a particular underlying stock.

Position limit for each scheme of a Mutual Fund

The scheme-wise position limit requirements shall be:

- For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of:
 - 1% of the free float market capitalization (in terms of number of shares). Or
 - 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts)
- This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
- For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

For detailed derivative strategies, kindly refer SAI.

Portfolio Turnover Policy:

Portfolio Turnover" is the term used by any Mutual Fund for measuring the amount of trading that occurs in a Fund's portfolio during the given period of time. As the scheme is an open ended equity scheme, it is expected that there would be a number of subscriptions and repurchase on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. However, a high turnover would not significantly affect the brokerage and transaction costs. The Fund will endeavor to balance the increased cost on account of higher portfolio turnover with the benefits derived thereof. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of arbitrage opportunities that exist for scrips/securities held in the portfolio rather than an indication of a change in Fund view on a scrip, etc.

RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Scheme Specific Risk Factors:

a. Risk associated with the Scheme's Strategy

The Scheme proposes to invest in equity and equity related instruments by identifying and exploiting price discrepancies in cash and derivative segments of the market. These investments by nature are volatile as the prices of the underlying securities are affected by various factors such as liquidity, time to settlement date, news flow, spreads between cash and derivatives market at different points of time, trading volumes, etc. There is no guarantee that the Fund Manager will be able to spot investment opportunities or correctly exploit price discrepancies in the different segments of the market. The Scheme is also expected to have a high portfolio churn, especially in a volatile market. There is an execution risk while implementing arbitrage strategies across various segments of the market, which may result in missed investment opportunities, or may also result in losses. In case of a large outflow from the Scheme, the Scheme may need to reverse the spot-futures transaction before the settlement of the futures trade. While reversing the spot-futures transaction on the Futures and Options settlement day on the exchange, there could be a risk of volume-weighted-average-price of the market being different from the price at which the actual reversal is processed resulting in basis risk.

There may be instances, where the price spread between cash and derivative market is insufficient to meet the cost of carry. In such situations, the fund manager due to lack of opportunities in the derivative market may not be able to outperform liquid / money market funds

Though the constituent stocks of most indices are typically liquid, liquidity differs across stock. Due to heterogeneity in liquidity in the capital market segment, trades on this segment do not get implemented instantly. This often makes arbitrage expensive, risky and difficult to implement.

b. Risks associated with investing in equities

Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro-economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.

The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment

opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the schemes portfolio.

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments. This may impact the ability of the unit holders to redeem their units. In view of this, the Trustee has the right, in its sole discretion to limit redemptions (including suspending redemptions) under certain circumstances.

Investments in equity and equity related securities involve high degree of risks and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

c. Risks related to Arbitrage Strategy

- In case of a large redemption, the scheme may need to reverse the spot-futures transaction before the date of futures' settlement. This eventuality may lead to the basis risk. While reversing the spot-futures transaction on the Futures & Options settlement day on the Exchange, there could be a risk of volume-weighted-average-price of the market being different from the price at which the actual reversal is processed. This may result in basis risk.
- On the date of expiry, when the arbitrage is to be unwound, it is not necessary for the stock price and its future contract to coincide. There could be a discrepancy in their prices even a minute before the market closes. Thus, there is a possibility that the arbitrage strategy gets unwound at different prices.

d. Risks associated with investing in debt securities

- Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet the principal payments. Additionally, money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Money market instruments are also subject to price volatility due to factors such as changes in interest rates (when interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline), general levels of market liquidity, market perception of credit worthiness of the issuer of such instruments and risks associated with settlement of transactions and re-investment of intermediate cash flows. The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will consequently be affected by the aforesaid factors. The AMC endeavours to manage such risk by the use of in house credit analysis.
- The performance of the Scheme may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems.
- Investments in different types of securities are subject to different levels and kinds of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern. E.g. investments in corporate bonds carry a higher level of risk than investments in Government Securities Further, even among corporate bonds, bonds which have a higher rating are comparatively less risky than bonds which have a lower rating.
- Interest rate/price risk:** As with all debt securities, changes in interest rates may affect the NAV of the Scheme since the price of a fixed income instrument falls when the interest rates move up and vice versa. The effect is more prominent when the duration of the instrument is higher. Hence the NAV movement of the Scheme consisting of predominantly fixed income securities is likely to have inverse correlation with the movement in interest rates. In case of a floating rate instrument, this risk is lower as a result of periodic reset of the coupon. During the life of floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.
- Government securities do carry price risk depending upon the general level of interest rates prevailing from time to time. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price of the Government securities (existing and new) is influenced only by movements in interest rates in financial systems.
- Floating rate securities issued by the Government (coupon linked to treasury bill benchmark or an inflation linked bond) have the least sensitivity to interest rate movements compared to other securities. Some of these securities are already in issue and the fund manager believes that more such securities may become available in future. These securities can play an important role in minimising interest rate risk in a portfolio.
- Spread risk:** Though the sovereign yield curve might remain constant, investments in corporate bonds are exposed to the risk of spread widening between corporate bonds and gilts. Typically, if this spread

widens, the prices of the corporate bonds tend to fall and so could the NAV of the Scheme. Similar risk prevails for the investments in the floating rate bonds, where the benchmark might remain unchanged, but the spread over the benchmark might vary. In such an event, if the spread widens, the price and the NAV of a Scheme could fall.

- **Sovereign risk:** The Central Government of a country is the issuer of the local currency in that country. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since payment of interest and principal amount has a sovereign status implying no default, such securities are known as securities with sovereign credit. For domestic borrowers and lenders, the credit risk on such Sovereign credit is near zero and is popularly known as "risk free security" or "Zero Risk security". Thus Zero-Risk is the lowest risk, even lower than a security with "AAA" rating and hence commands a yield, which is lower than a yield on "AAA" security.
- **Credit risk or default risk:** This refers to inability of the issuer of the debt security to make timely payments of principal and/or interest due. In case of investments in government securities, the credit risk is minimal. It is reflected in the credit rating of the issuer. Hence if the credit rating of the issuer is downgraded, the price of the security will suffer a loss and the NAV will fall. Credit risk factors pertaining to lower rated securities also apply to lower rated zero coupon and deferred interest kind bonds. Lower rated zero coupon and deferred interest kind bonds carry an additional risk in that, unlike bonds that pay interest through the period of maturity, the Scheme by investing in these bonds will realize no cash till the cash payment date and if the issuer defaults, the Scheme may obtain no return on its investment.
- **Liquidity risk:** This represents the possibility that the realised price from selling the security might be lesser than the valuation price as a result of illiquid market. If a large outflow from the Scheme is funded by selling some of the illiquid securities, the NAV could fall even if there is
- No change in interest rates. Illiquid securities are typically quoted at a higher yield than the liquid securities and have higher bid offer spreads. Investment in illiquid securities results in higher current yield for the portfolio. Liquidity risk is a characteristic of the Indian fixed income market today. In addition, money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- The corporate debt market is relatively illiquid vis-a-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.
- **Re-investment risk:** This is associated with the fact that the intermediate cash flows (coupons or principal payment in case a security gets called or repurchased) may not be reinvested at the same yield as assumed in the original calculations.
- **Settlement risk:** Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme, to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to such Scheme in the event of a subsequent decline in the value of securities held in the portfolio of the Scheme.
- **Market risk:** Lower rated or unrated securities are more likely to react to developments affecting the market and the credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated or unrated securities also tend to be more sensitive to economic conditions than higher rated securities.
- In addition to the factors that affect the values of securities, the NAV of Units of the Scheme will fluctuate with the movement in the broader fixed income market, money market and derivatives market and may be influenced by factors influencing such markets in general including but not limited to economic conditions, changes in interest rates, price and volume volatility in the bond and stock markets, changes in taxation, currency exchange rates, foreign investments, political, economic or other developments and closure of the stock exchanges.
- Investments in different types of securities are subject to different levels and kinds of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern. E.g. investments in corporate bonds carry a higher level of risk than investments in Government securities. Further, even among corporate bonds, bonds which have a higher rating are comparatively less risky than bonds which have a lower rating.

e. Risks associated with investing in derivatives

- The Scheme will invest in derivative products in accordance with and to the extent permitted under the Regulations and by RBI. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.
- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".
- The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility to the values.
- The Scheme(s) may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme(s) may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme(s) may face a liquidity issue.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- The Scheme(s) bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.
- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. The counter party may default on a transaction before settlement and therefore, the Scheme(s) are compelled to negotiate with another counterparty at the then prevailing (possibly unfavourable) market price.
- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.
- Where derivatives are used for hedging, such use may involve a basic risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

f. Trading through mutual fund trading platforms of BSE and/ or NSE

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

g. Other Scheme Specific Risk factors:

• Performance Risk:

The Scheme's performance can decrease or increase, depending on a variety of factors, which may affect the values and income generated by a Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in government and Reserve Bank of India policy, taxation, political, economic or other developments and closure of the stock exchanges. Investors should understand that the investment pattern indicated for the Scheme, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there can be no assurance that the Scheme's investment objective will be attained nor will the Scheme be in a position to maintain the model percentage of investment pattern/ composition particularly under exceptional circumstances so that the interest of the unit holders are protected. The AMC will endeavour to invest in highly researched growth companies, however the growth associated with equities may be generally high as also the erosion in the value of the investments/ portfolio in the case of the capital markets passing through a bearish phase is a distinct possibility. A change in the prevailing rates of interest is likely to affect the value of the Scheme's investments and thus the value of the Scheme's Units. The value of money market instruments held by the Scheme generally will vary inversely with the changes in prevailing interest rates.

• Changes in Government Regulations:

The businesses in which companies operate are exposed to a range of government regulations, related to tax benefits, liberalization, provision of infrastructure and the like. Changes in such regulations may affect the prospects of companies.

• Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

PLANS AND OPTIONS

Regular Plan (For applications routed through Distributors):

- Growth Option
 - Monthly Income Distribution cum capital withdrawal option (IDCW-Monthly)
- (Monthly Income Distribution cum capital withdrawal option is not assured and is subject to the availability of the distributable surplus)

Direct Plan (For applications not routed through Distributors):

- Growth Option
 - Monthly Income Distribution cum capital withdrawal option (IDCW-Monthly)
- (Monthly Income Distribution cum capital withdrawal option is not assured and is subject to the availability of the distributable surplus).

Income Distribution cum capital withdrawal option Sub Options are:

- **Payout** of Income Distribution cum capital withdrawal option (IDCW-Payout)
- **Reinvestment** of Income Distribution cum capital withdrawal option (IDCW- Reinvestment)

Transfer of Income Distribution cum capital withdrawal option (IDCW-Transfer) facility also available for investors who opt for Reinvestment of Income Distribution cum capital withdrawal option (IDCW-Reinvestment).

Record date for IDCW - Monthly option:

Record date for Monthly Income Distribution cum capital withdrawal option shall be 25th day of each month. (i.e. 25th January, 25th February and so on)

Since the record date for the income distribution is already fixed, notice advertisement for announcement of income distribution shall not be published/released. Unitholders will be intimated in case monthly income distribution is not declared for any month.

Trustees reserve the right to introduce more options at a later stage.

Please note that the income distribution shall be distributed at the discretion of the Trustees subject to availability of distributable surplus.

Investor should appropriately tick the 'option' (Income Distribution Cum Capital Withdrawal or growth) and sub-options (Payout of Income Distribution Cum Capital Withdrawal (IDCW- Payout), Reinvestment of Income Distribution Cum Capital Withdrawal (IDCW- Reinvestment) and Transfer of Income Distribution Cum Capital Withdrawal (IDCW-Transfer)) in the application form

while investing in the Scheme. If no option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Direct Plan- Growth Option. If no Income Distribution Cum Capital Withdrawal sub-option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Reinvestment of Income Distribution Cum Capital Withdrawal Option (IDCW- Reinvestment).

Default Plan:

Investors are requested to note the following scenarios for the applicability of "Direct Plan (application not routed through distributor) or Regular Plan (application routed through distributor)" for valid applications received under the scheme:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct Plan	Direct Plan
3	Not mentioned	Regular Plan	Direct Plan
4	Mentioned	Direct Plan	Direct Plan
5	Direct Plan	Not Mentioned	Direct Plan
6	Direct Plan	Regular Plan	Direct Plan
7	Mentioned	Regular Plan	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

The monthly income distribution payout for an amount of less than Rs 100/- will be compulsorily reinvested in the same sub-option at ex-dividend NAV.

APPLICABLE NAV (after the scheme opens for subscriptions and redemptions)

Applicable NAV for Subscription / Switch-in: Cut Off Timing 3.00 pm

Particulars	Applicable NAV
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the scheme before the cut-off time.	The closing NAV of the same day.
Valid applications received (time-stamped) after 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme either on the same day or before the cut-off time of the next Business Day i.e. available for utilization before the cut-off time of the next Business Day.	The closing NAV of the next Business Day.
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme after the cut-off time on the same day i.e. available for utilization after the cut-off time of the Day.	The closing NAV of the next Business Day.
Where the application is time stamped any day before the credit of the funds to the scheme but the funds for the entire amount are credited to the bank account of the scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on such subsequent Business Day.	The closing NAV of such subsequent Business Day on which funds are available for utilisation.

Realisation of funds means funds available to the AMC Scheme Account and not date and time of debit from Investor's account.

In case application is time stamped after cut off timing on any day, the same will be considered as deemed to be received on the next business day.

In case funds are realised after cut-off timing on any day, the same will be considered as deemed to be realised / available for utilisation on the next business day.

For Switch-ins including Systematic Investment Plan (SIP), Systematic Transfer Plan (STP) of any amount:

For determining the applicable NAV, the following shall be ensured:

- Application for switch-in is received before the applicable cut-off time.
- Funds for the entire amount of subscription / purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time, and the funds are available for utilization before the cut-off time.

- In case of switch/STP transactions, funds will be made available for utilization in the switch-in- scheme based on the redemption payout cycle of the switch out

Scheme Redemption /Switch Out: In respect of application received upto 3 p.m., closing NAV of the day of receipt of application shall be applicable and in respect of application received after 3 p.m. closing NAV of next business day.

Outstation cheques/demand drafts will not be accepted.

Valid application for "switch out" shall be treated as redemption and for "switch in" shall be treated as purchases and the relevant NAV of "Switch in" and "Switch Out" shall be applicable accordingly.

MINIMUM APPLICATION AMOUNT / NUMBER OF UNITS UNDER EACH PLAN

Purchase: Minimum subscription amount for the scheme: Rs 5,000/- and in multiple of Re.1/- thereafter

Additional Purchase: Rs.1000/-& in multiples of Re.1/-thereafter.

Redemption: Redemption request can be made for a minimum of Rs.500/50 units or folio balance whichever is lower.

There is no minimum amount requirement, in case of investors opting to switch "all units" from any existing schemes of Tata Mutual Fund to this Scheme.

DESPATCH OF REDEMPTION REQUEST

The redemption proceeds will be dispatched to the unit holders within three working days from the date of redemption or repurchase, subject to exceptional circumstances as mentioned further in Scheme Information Document.

BENCHMARK INDEX

Nifty 50 Arbitrage Index (TRI)

DIVIDEND POLICY

Growth Option:

The income / profits received / earned would be accumulated by the Fund as capital accretion, aimed at achieving capital growth.

Income Distribution cum capital withdrawal Policy:

The profits received / earned and so retained and reinvested may be distributed as income distribution at appropriate rates (after providing for all relevant ongoing expenses, dividend distribution tax or statutory levy if any etc.) and at appropriate intervals as may be decided by the AMC and/or Trustee Company. It will be distributed to the unitholders who hold the units on the record date of declaration of the income distribution.

Please note that the income distribution and its frequency is subject to availability of distributable surplus and at the discretion of the trustees .The Fund reserves a right to modify the periodicity and manner of payout of such Income Distribution as they deem fit without giving any further notice to unitholders.

Unitholders shall note that when units are sold, and sales price (NAV) is higher than the face value of the unit, a portion of sales prices that represent realized gains shall be credited to an Equalization Reserve Account, which can be used to pay income distribution hence income distribution amount can be distributed out of investor capital (Equalization Reserve), Which is part of sale price that represent realized gains.

Income distribution will be subject to availability of distributable surplus and at the discretion of the trustees from time to time.

The Fund does not assure any targeted annual return / income nor any capitalization ratio. Accumulation of earnings and / or capitalization of units and the consequent determination of NAV, may be suspended temporarily or indefinitely under any of the circumstances as stated in the clause "Suspension of Ongoing Sale, Repurchase or Switch out of Units".

Income distribution will be subject to availability of distributable surplus and at the discretion of the trustees from time to time.

The Trustee has the discretion to change the periodicity of declaration of income distribution /introduce new income distribution options from time to time.

The IDCW- payout for amount less than Rs 100/- will be compulsorily reinvested in the same sub-option at ex-dividend NAV.

Reinvestment of Income Distribution cum capital withdrawal option :

Unitholders under this Option also have the facility of reinvestment of the income so declared, if so desired. Income Distribution Warrants will not be dispatched to such Unitholders. The income declared would be reinvested in the Scheme on the immediately following ex-dividend date

Transfer of Income Distribution cum capital withdrawal plan :

Under this facility investor can opt for reinvestment of income distribution into any other scheme of Tata Mutual Fund. This facility is available only for those investors who have opted for IDCW- reinvestment facility. This facility is not available to those investors who have opted for IDCW- payout facility. Under this facility, the net income distribution amount (i.e. net of statutory

levy / taxes if any) will be automatically invested on the ex-dividend date into other scheme of Tata Mutual Fund specified by the investor at the applicable NAV of that scheme & accordingly equivalent units will be allotted in lieu of income distributed, subject to the terms of the scheme. The minimum and maximum amount is not applicable for this facility. No entry load or exit load will be levied on the units issued in lieu of income distributed. AMC reserves the right to modify or withdraw this facility without prior notice.

In case income distribution (IDCW) option is not mentioned than income distribution amount shall be compulsorily reinvested in the same scheme/ option at applicable ex-dividend NAV.

NAME OF THE FUND MANAGER

Sailesh Jain (managing Since 10-12-2018)

NAME OF THE TRUSTEE COMPANY

Tata Trustee Company Private Limited

PERFORMANCE OF THE SCHEME

Scheme Performance as on 31.03.2025

Compounded Annualized Returns (as on 31.03.2025)	Scheme Returns % (Direct – Growth)	Benchmark Returns %	Scheme Returns % (Regular – Growth)	Benchmark Returns %
Returns for last 1 year	8.07	7.65	7.23	7.65
Returns for the last 3 years	7.38	6.99	6.53	6.99
Returns for the last 5 years	6.24	5.41	5.41	5.41
Returns since inception	6.48	5.58	5.66	5.58
Scheme's Plan Inception Date	18-Dec-2018		18-Dec-2018	

Absolute Returns for the Last 5 Financial Years

Year to Year (31st March)	Scheme Returns % (Direct – Growth)	Scheme Returns % (Regular – Growth)	Benchmark Returns (%)
2024-2025	8.07	7.23	7.65
2023-2024	8.29	7.44	8.12
2022-2023	5.80	4.95	5.24
2021-2022	4.49	3.68	3.82
2020-2021	4.62	3.83	2.34

Note:

Past performance of the scheme may or may not be sustained in future.

ADDITIONAL SCHEME RELATED DISCLOSURES

- Scheme's portfolio holdings (top 10 holdings by issuer and fund allocation towards various sectors to be provided through a functional website link - <https://www.tatamutualfund.com/statutory-disclosures/other-statutory-disclosures>)
- Disclosure of name and exposure to Top 7 issuers, stocks, groups and sectors as a percentage of NAV of the scheme in case of debt and equity ETFs/index funds through a functional website link - <https://www.tatamutualfund.com/statutory-disclosures/other-statutory-disclosures>)
- Portfolio Turnover Ratio as on 31.03.2025 (for 13 Months) is 5.09 times (excluding derivatives).

EXPENSES OF THE SCHEME

(i) Load Structure

Continuous Offer

Entry Load: Not Applicable (Pursuant to provision no. 10.4.1.a of SEBI Master Circular on Mutual Fund dated June 27, 2024, no entry load will be charged by the Scheme to the investor)

Exit Load: 0.25 % of the applicable NAV, if redeemed/ switched out/ withdrawn on or before expiry of 30 Days from the date of allotment.

Effective from 23.04.2025, Investors are requested to note that pursuant to AMFI's communication dated 09th April 2025, Exit Load will not be charged on any Switch/Systematic transfer transaction from Regular plan to Direct plan of the same scheme.

Slab wise break up depending on the assets under management:

As per provision no. 52.6.c of SEBI (Mutual Funds) Regulations, 1996 the total expense ratio of open-ended scheme shall not exceed the following limits. The AMC has estimated that upto 2.25 % (excluding additional permissible limits as per Regulation 52(6A)(b) & 52(6A)(c)) of the daily average net assets of the scheme will be charged to the scheme as expenses.

Assets under management Slab (In Rs. crore)	Total expense ratio limits for equity-oriented schemes	Total expense ratio limits for other than equity-oriented schemes
On the first Rs.500 crores of the daily net assets	2.25%	2.00%
On the next Rs.250 crores of the daily net assets	2.00%	1.75%
On the next Rs.1,250 crores of the daily net assets	1.75%	1.50%
On the next Rs.3,000 crores of the daily net assets	1.60%	1.35
On the next Rs.5,000 crores of the daily net assets	1.50%	1.25%
On the next Rs.40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof.	
On balance of the assets	1.05%	0.80%

For the actual current expenses being charged, the investor should refer to functional Weblink: <https://www.tatamutualfund.com/expense-ratio/total-expense-ratio>.

(ii) Annual Recurring expenses

Actual Expenses % to daily net assets for the F.Y. 2024-2025		
Tata Arbitrage Fund	Direct Plan	Regular Plan
	0.27%	1.05%

The maximum limit of recurring expenses that can be charged to the Scheme would be as per Regulation 52 of the SEBI (MF) Regulation, 1996. Investors are requested to read "Section-Annual Scheme Recurring Expenses" in the SID.

TAX TREATMENT FOR THE INVESTORS (UNITHOLDERS)

Investor will be advised to refer to the details in the Statement of Additional Information and also independently refer to his tax advisor.

DAILY NET ASSET VALUE (NAV) PUBLICATION

The NAVs will be calculated and disclosed on every Business Day. The AMC will prominently disclose the NAVs under a separate head on the website of the Fund (www.tatamutualfund.com) and of the Association of Mutual Funds in India-AMFI (www.amfiindia.com) by 11 P.M. on every business day^.

However, due to inability in capturing same day valuation of underlying investments, the NAV shall be disclosed by 11 P.M. of the next business day^.

^ If the NAVs are not available before the commencement of Business Hours on the following day (i.e., next day after the respective business day) due to any reason, the Mutual Fund shall issue a press release giving reasons for the delay and explain by when the Mutual Fund would be able to publish the NAV.

In case NAV of Corporate Debt Market Development Fund ("CDMDF") units is not available by 9:30 p.m. of same Business Day, NAV declaration timing for Mutual Fund Schemes holding units of CDMDF shall be 10 a.m. on next business day instead of 11 p.m. on same Business Day.

UNITHOLDERS' INFORMATION

Account Statement:

The AMC will send an allotment confirmation specifying the units allotted by way of email and/or SMS within 5 working days of receipt of valid application/ transaction to the Unit holders registered e-mail address and/ or mobile number (whether units are held in demat mode or in account statement form).

A Consolidated Account Statement (CAS) detailing all the transactions across all mutual funds (including transaction charges paid to the distributor) and holding at the end of the month shall be sent to the Unit holders in whose folio(s) transaction(s) have taken place during the month by mail or email on or before 15th of the succeeding month.

Half-yearly CAS shall be issued at the end of every six months (i.e. September/ March) on or before 21st day of succeeding month, to all investors providing the prescribed details across all schemes of mutual funds and securities held in dematerialized form across demat accounts, if applicable

For further details, refer SAI.

Portfolio Disclosure:

Tata Mutual Fund shall disclose portfolio (along with ISIN) in user friendly and downloadable spreadsheet format, as on the last day of the month/half year for all their schemes on its website www.tatamutualfund.com and on the website of AMFI www.amfiindia.com within 10 days from the close of each month/half year.

In case of unitholders whose email addresses are registered, Tata Mutual Fund will send via email both the monthly and half yearly statement of scheme portfolio within 10 days from the close of each month /half year respectively.

Tata Mutual Fund will publish an advertisement every half-year, in all India edition of at least two daily newspapers, one each in English and Hindi, disclosing the hosting of the half yearly statement of the schemes portfolio on the AMC's website www.tatamutualfund.com and on the website of AMFI (www.amfiindia.com). Tata Mutual Fund will provide physical copy of the statement of scheme portfolio without any cost, on specific request received from a unitholder.

For portfolio disclosure of schemes of Tata Mutual Fund, kindly visit functional Weblink: <https://www.tatamutualfund.com/schemes-related>.

Unaudited Financial Results:

Tata Mutual Fund/ Tata Asset Management Pvt Ltd shall within one month from the close of each half year, that is on 31st March & on 30th September, host a soft copy of its unaudited financial results on its website in the format specified in Twelfth Schedule of SEBI(Mutual Funds) Regulations 1996.

Tata Mutual Fund / Tata Asset Management Pvt Ltd shall publish an advertisement disclosing the hosting of such financial results on their website, in atleast one English daily newspaper having nationwide circulation & in a newspaper having wide circulation published in the language of the region where the Head Office of the fund is situated.

For Unaudited Financial Results of Tata Mutual Fund, kindly visit functional Weblink: <https://www.tatamutualfund.com/about-us>.

Annual Report:

Annual report or Abridged Summary, in the format prescribed by SEBI, will be hosted on AMC's website, functional Weblink: <https://www.tatamutualfund.com/about-us> www.amfiindia.com.

The scheme wise annual report or an abridged summary thereof, in the format prescribed, shall be sent by way of e-mail to the investor's registered e-mail address not later than four months from the date of closure of the relevant accounts year.

Investors who have not registered their email id, will have an option of receiving a physical copy of the Annual Report or Abridged Summary thereof.

Tata Mutual Fund will provide a physical copy of the abridged summary of the Annual Report, without charging any cost, on specific request received from a unitholder. Physical copies of the report will also be available to the unitholders at the registered offices at all times.

Tata Mutual Fund will publish an advertisement every year, in the all India edition of at least two daily newspapers, one each in English and Hindi, disclosing the hosting of the scheme wise annual report on the AMC website and on the website of AMFI.
