The scheme will invest only in securities which are part of Shariah Compliant Universe. **The investment policies mentioned in this SID are in conformity with the provisions of various constitutional documents viz. MOA/ AOA of the TAMPL/Trustee Company, IMA and the Trust Deed. Moneys collected under these Schemes shall be invested only in transferable securities.**

## Portfolio Turnover

"Portfolio Turnover" is the term used by any Mutual Fund for measuring the amount of trading that occurs in a Scheme's portfolio during the year.

The funds available will be invested in companies which are extensively researched Shariah Compliant. The fund while at all times emphasizing a long term investment approach will also undertake trading with a view to booking short term profits depending on market conditions. The overall portfolio turnover rate is expected to be 80%-100% so as to achieve the optimum balance between long term investing and short term profit booking so as to enable portfolio restructuring when warranted. The AMC will endeavour to optimize portfolio turnover to optimize risk adjusted return keeping in mind the cost associated with it.

## RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

### Scheme Specific Risk Factors:

#### Liquidity and Settlement Risks

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain securities of certain companies, industries, sectors, etc. based on certain investment parameters as adopted

internally by TAMPL. While at all times the Asset Management Company will endeavour that excessive holding/investment in certain securities of industries, sectors, etc. by the Scheme is avoided, the funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio. Furthermore, from time to time, the Asset Management Company, the Custodian, the Registrar, any Associate, any Distributor, Dealer, any Company, Corporate Bodies, Trusts, any Retirement and Employee Benefit Funds or any Associate or otherwise, any scheme / mutual fund managed by the Asset Management Company or by any other Asset Management Company may invest in the Scheme. While at all times the Trustee Company and the Asset Management Company will endeavour that excessive holding of Units in the Scheme among a few Unitholders is avoided, however, the funds invested by these aforesaid persons may acquire a substantial portion of the Scheme's outstanding Units and collectively may constitute a majority unitholder in the Scheme. Redemption of Units held by such persons may have an adverse impact on the value of the Units of the Scheme because of the timing of any such redemptions and this may impact the ability of other Unitholders to redeem their respective Units.

#### Investment Risks

The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme's investment objective will be attained or that the Scheme be in a position to maintain the model percentage of investment pattern particularly under exceptional circumstances.

Different types of securities in which the scheme would invest in, as mentioned in this SID, carry different levels and types of risk.

The scheme may use certain techniques and instruments (as disclosed in the clause "portfolio turnover") for efficient portfolio management approved by its Shariah Advisor to attempt to manage the risk of such fluctuations. However, these techniques and instruments if imperfectly used have the risk of the scheme incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any).

#### Regulatory Risk

The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation and other developments in the laws and regulations.

#### Risk associated with to be listed Securities

Securities which are not quoted on the stock exchanges are inherently liquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including the put options. The AMC may choose to invest in to be listed domestic securities if allowed under Shariah principles. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the scheme's investments due to its holdings of to be listed securities may be affected if they have to be sold prior to the target date of disinvestment.

#### Risk Associated with Shariah Compliance

Securities may from time to time be classified as non Shariah compliant. The scheme will invest only in securities which are part of Shariah Compliant Universe. In case of change of Shariah Compliance status of any company post investment by the scheme, the fund manager will exit from the scrip within the time limit permitted by the Shariah advisor. This may restrict the ability of scheme to sell such securities at a desired price.
