

TATA FLEXI CAP FUND

(An open ended dynamic equity scheme investing across large cap, mid cap, small cap stocks.)

(SCHEME CODE - TATA/O/E/FCF/18/05/0029)

This product is suitable for investors who are seeking*:

- Capital Appreciation over long term.
- Investment in a diversified portfolio consisting of equity and equity related instruments across market capitalization.

***Investors should consult their financial advisors if in doubt about whether the product is suitable for them.**

Scheme Riskometer

Benchmark Riskometer

It may be noted that risk-o-meter specified above is based on internal assessment. The same shall be updated as per provision no. 17.4.1.i of SEBI Master Circular on Mutual Fund dated 27.06.2024, on Product labelling in mutual fund schemes on ongoing basis.

Units were offered at Rs. 10/- each for cash during the New Fund Offer & Continuous offer for units at NAV based prices, subject to applicable load.

This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. **For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, ,penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investor Service Centres or distributors or from the website www.tatamutualfund.com**

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

Note: Pursuant to SEBI approval dated November 18, 2024, Tata Quant Fund is merged with Tata Flexi Cap Fund w.e.f. March 21, 2025

This Key Information Memorandum is dated 30 May 2025

INVESTMENT OBJECTIVE

The investment objective of the Scheme is to generate capital appreciation over medium to long term.

However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved. The scheme does not assure or guarantee any returns.

ASSET ALLOCATION PATTERN OF THE SCHEME

Under normal circumstances, the asset allocation of the Scheme will be as follows:

| | Indicative allocations (% of total assets) | | Risk Profile |
|--|---|---|-------------------------|
| | Instruments | Indicative allocations (% of total assets) | Risk Profile |
| | Minimum | Maximum | High/ Medium/ Low |
| Equity and Equity related instruments | 65 | 100 | High |
| Debt (including money market instruments & units of debt and liquid category schemes*) | 0 | 35 | Low to Medium |
| Units of REITs & InvITs | 0 | 10 | Medium to High |

*The scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under

Indicative Table (Actual instrument / percentages may vary subject to applicable SEBI circulars):

| Sr. No. | Type of Instrument | Percentage of Exposure | SEBI Master Circular on Mutual Fund dated June 27, 2024 Reference |
|---------|--|--|---|
| 1 | Securities Lending | Not more than 20% of the net assets of the Scheme can be deployed in stock lending and Not more than 5% of the net assets of the scheme will be deployed with any single intermediary | Provision no. 12.11 |
| 2 | Equity Derivatives for non-hedging Purposes | The scheme net assets will have a maximum derivative net position of 50% of the net assets of the scheme. | Provision no. 12.25 |
| 3 | Securitized Debt | Will not invest | Provision no. 12.15 |
| 4 | Overseas Securities | Will not invest | Provision no. 12.19 |
| 5 | REITs and InvITs | A mutual fund may invest in the units of REITs and InvITs subject to the following: (a) No mutual fund under all its schemes shall own more than 10% of units issued by a single issuer of REIT and InvIT; and (b) The scheme shall not invest – i. more than 10% of its NAV in the units of REIT and InvIT; and ii. more than 5% of its NAV in the units of REIT and InvIT issued by a single issuer. | Provision no. 12.21 & clause no. 13 of Seventh Schedule of SEBI (MF) Regulation, 1996. |
| 6 | AT1 and AT2 Bonds | Will not invest | Provision no. 12.2 |
| 7 | Any other instrument a) Credit Default Swaps (CDS) b) Repo / reverse repo in corporate debt securities c) Structured Obligations / Credit Enhancement d) Covered Call Option | a) Will not invest. b) Will not invest. c) Will not invest. d) Will not invest. | Provision no. 12.24 Provision no. 12.18 Provision no. 12.3 Provision no. 12.25.8 |

Change in Investment Pattern/Portfolio Rebalancing

Pursuant to provision 1.14.1.2.b of SEBI Master Circular on Mutual Funds dated June 27, 2024, the tentative portfolio break-up mentioned above with minimum and maximum asset allocation can be altered for a short-term period on defensive considerations. In this event where the asset allocation falling outside the limits specified in the asset allocation table due to defensive considerations, the Scheme will rebalance the portfolio within thirty (30) calendar days.

Pursuant to provision 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024, in the event where the asset allocation is falling outside the limits specified in the asset allocation table due to passive breaches (occurrence of instances not arising out of omission and commission of AMC), the Scheme will rebalance the portfolio within thirty (30) business days. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme within the stipulated period of thirty (30) business days, justification in writing including details of efforts taken to rebalance the portfolio for the same shall be provided to the Investment Committee. The Investment Committee shall then decide on the course of action and if they so desires can extend the timelines up to sixty (60) business days from the date of completion of the mandated rebalancing period. Further, compliances relating to disclosures etc. shall be adhered in line with the said circular.

In case the portfolio of schemes is not rebalanced within the mandated plus extended timelines, AMCs shall:

the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund

The scheme will invest across large cap, mid cap and small cap stocks. Large Cap, Mid Cap, Small Cap companies are those companies which are classified as such by Securities and Exchange Board of India (SEBI) or Association of Mutual Funds in India (AMFI) from time to time. In case of subsequent updation /change suggested by SEBI/AMFI, fund manager will rebalance the portfolio within the stipulated period (at present 1 month).

The cumulative gross exposure through equities, other debt securities, REITs & InvITs and derivatives shall not exceed 100% of the net assets of the Scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. Cash Equivalent shall consist Government Securities, T-Bills & Repo on Government Securities

At present the large Cap, Mid Cap & Small Cap companies are classified as below:

- Large Cap:** 1st -100th company in terms of full market capitalization.
- Mid Cap:** 101st -250th company in terms of full market capitalization.
- Small Cap:** 251st company onwards in terms of full market capitalization.

The scheme net assets will have a maximum derivative net position of 50% of the net assets of the scheme.

The Scheme will comply with all the applicable circulars issued by SEBI as regard to derivatives viz. provision no. 5.2, 7.5, 7.6 and 12.25 of SEBI Master Circular on Mutual Fund dated June 27, 2024.. Investment in derivatives/futures/options may be done for trading, hedging and portfolio balancing.

The scheme may write call options under covered call strategy.

- not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- not to levy exit load, if any, on the investors exiting the scheme.

Credit Evaluation Process for the investments in Debt Securities:

In-house credit evaluation team has the necessary capability of conducting independent due diligences of credit risk. From credit evaluation perspective, companies are broadly classified under two sectors - Industrials and Financial Institutions. Industrials include Manufacturing and trading companies, while Financial Institutions include Banks and Non-Banking Financial Companies (NBFCs). The set of parameters for evaluation of credits for these sectors are different.

Broad guidelines for the appraisal of Industrials for short-term and long-term exposure include, but are not restricted to:

- External Ratings threshold: Investment is made only if the issuer credit rating is at least investment grade for long-term debt by a credit rating agency recognized by SEBI. In the short-term, investment is made in top notch (A1+ or equivalent) rated debt instruments. However, this is subject to review from time to time and investment committee / Board of AMC approval is required for any exception.

- Each company is internally appraised based on various parameters including, but not restricted to:
 - Business Fundamentals: Product/Service offerings, Market Position, Competitive Landscape, and Product cycle etc.
 - Regulatory environment: Support/intervention, developmental stage of industry, level of regulation
 - Financial Analysis: Margins, Profitability, Leverage, Working Capital requirement and cycle, Cash-flows etc. This is also seen in light of historic trend.
 - Management Track Record: Management track record, performance of company through economic cycle, promoters' background, other group companies.
 - Macro-Economic Environment: Economic cycle, Credit cycle

In the short-term, the focus is more on the working capital cycle, near-term cash-flows and existing business position, while in the long-term the focus is more on the outlook of the business, capital expenditure program, profitability etc.

The credit evaluation policy is subject to review from time to time. Any material change in the credit evaluation policy will be updated by way of an addendum to the scheme information document.

The asset allocation among the various debt securities will be decided based upon the prevailing market conditions, macro economic environment and the performance of corporate sector, the debt market and other considerations.

- The investment policies mentioned in this SID are in conformity with the provisions of various constitutional documents VIZ.MOA/AOA of the TAMPL/Trustee Company, IMA and the Trust Deed. Any change in the asset allocation affecting the investment profile of the scheme shall be effected only in accordance with the provisions of regulations 18-15A of SEBI (Mutual Funds) Regulations, 1996.

INVESTMENT STRATEGY

The Scheme aims to generate capital appreciation by investing in a diversified portfolio of equity & equity related instruments across market capitalization. The scheme will predominantly invest in equity and equity related instruments of well researched and growth oriented companies.

The Scheme would invest in companies based on various criteria including sound professional management, track record, industry scenario, growth prospects, liquidity of the securities, etc. The Scheme will emphasise on well managed, good quality companies with above average growth prospects.

The Fund may invest in derivatives instruments such as Futures, Options or such other instruments as may be permitted under the regulations.

Any change in the asset allocation affecting the investment profile of the scheme shall be effected only in accordance with the provisions of sub-regulation 15A of regulations 18 of SEBI (Mutual Funds) Regulations 1996.

Trading in Derivatives by the Scheme

Subject to SEBI (Mutual Fund) Regulations, 1996, the Scheme may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio. In accordance with the guidelines issued by the SEBI, exposure to derivative instruments will be restricted to the limit as specified in the para on asset allocation pattern of the scheme.

A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements, Futures, Options, etc.

The Scheme may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio. A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements, Futures, Options, etc. The Scheme may purchase call and put options in securities in which it invests and on securities indices based on securities in which the scheme invests. Through the purchase and sale of futures contracts and purchase of related options on those contracts the Scheme would seek to hedge against a decline in securities owned by the Scheme or an increase in the prices of securities which the Scheme plans to purchase. The Scheme would sell futures contracts on securities indices in anticipation of a fall in stock prices, to offset a decline in the value of its equity portfolio. When this type of hedging is successful, the futures contract increase in value while the Scheme's investment portfolio declines in value and thereby keep the Scheme's net asset value from declining as much as it otherwise would. Similarly, when the Fund is not fully invested, and an increase in the price of equities is expected, the Scheme would purchase futures contracts to gain rapid market exposure that may partially or entirely offset increase in the cost of the equity securities it intends to purchase.

Writing of call options under covered call strategy

The scheme may write call options under covered call strategy subject to conditions specified by SEBI which includes the following:

- Call option writing under a cover call strategy is allowed for constituent stocks of NIFTY 50 and BSE SENSEX.
- The total notional value (taking into account strike price as well as premium value) of call options written by a scheme shall not exceed 15% of the total market value of equity shares held in that scheme.
- The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrance.
- In no case, the scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
- The total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.
- The call option written shall be marked to market daily and the respective gains or losses factored into the daily NAV of the respective scheme(s) until the position is closed or expired.

Benefit of Writing of Call Option Under a Covered Call Strategy

- Holders with Long term view on the stock can write options and reduce the portfolio costs.
- Writing can also act as a good alternative for playing relative outperformance for stocks held in portfolios within same sector.
- Stocks held in the portfolio can be effectively hedged in extreme volatility in the market

Illustration

For example, if the scheme buy a stock A at Rs.900, receive a Rs.100 option premium from writing a Rs.1050 strike price call of stock A, then it can maintain the stock position as long as the stock price stays below Rs.1150 at expiry. If the stock price moves above Rs.1150, the scheme may have to give delivery of long position to meet obligation of call writing. The scheme can only profit if stock price remains below Rs.1150 on expiry.

Derivative Instruments & Related Examples:

Futures:

A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific future date. The price at which the underlying asset would change hands in the future is agreed upon at the time of entering into the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfill the terms of the contract. Currently, futures contracts have a maximum expiration cycle of 3-months. A futures contract on the stock market index gives its owner the right and obligation to buy or sell the portfolio of stocks characterized by the index. Stock index futures are cash settled; there is no delivery of the underlying stocks.

Example:

| | |
|---|----------------------|
| Index Future | |
| Assume, 1-month Nifty Future price on day 1: | 10110 |
| Scheme Buys | 100 Future Contracts |
| (1 lot = Nominal Value equivalent to 75 units of the underlying index) | |
| Scenario 1 | |
| On the date of Settlement, the future price (closing spot price of the index) | 10200 |
| Profit for the scheme (10200-10110) *100*75 | 675000 |
| Scenario 2 | |
| On the date of Settlement, the future price (closing spot price of the index) | 10050 |
| Loss for the scheme (10050-10110) *100*75 | -450000 |

Risks associated with Future Contracts: Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks. The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets. Additional risks could be on account of illiquidity and potential mispricing of the futures.

Options:

An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts

an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

Example:

| | |
|--|----------|
| Call Option | |
| Say, Scheme buys 1 lot of Nifty Index | 75 Units |
| Spot price | 10000 |
| Strike price | 10100 |
| Premium | 100 |
| Total amount paid as premium (Rs.) (100X75) | Rs.7500 |
| Scenario 1: The Nifty Index goes up (i.e Nifty Spot) | 10250 |
| Scheme has reversed the position before expiry of the contract | |
| Current Premium at the time of reversal | 200 |
| Net Gain Rs. (200-100) | 100 |
| Total gain on 1 lot of Nifty (75 units) Rs.(75x100) | Rs.7500 |
| Scheme has reversed the position (i.e Nifty Option) at expiry | |
| Nifty Spot on expiry | 10275 |
| Premium Paid(Rs.) | 100 |
| Exercise price | 10100 |
| Receivables on Exercise (10275-10100) | 175 |
| Total gain (Rs.) (175 -100) *75 | Rs.5625 |
| Scenario 2: The Nifty index moves to the level below 10100 | |
| Scheme does not gain anything but the loss to the scheme (limited to the actual premium paid) | Rs. 7500 |

| | |
|---|----------|
| Put Option | |
| Say, Scheme buys 1 lot of Nifty Index | 75 Units |
| Spot Price | 10000 |
| Strike Price | 9450 |
| Premium | 50 |
| Total Amount Paid by the Scheme (75*50) | 3750 |
| Scenario 1: Nifty Index goes down | |
| Scheme has reversed the position before expiry of the contract | |
| Nifty Spot | 9300 |
| Current Premium at the time of reversal | 80 |
| Premium Paid (Rs.) | 50 |
| Net Gain (Rs.80-50) | 30 |
| Total Gain on 1 lot of Nifty (Rs.) (75x30) | Rs.2250 |
| Scheme has reversed the position at expiry | |
| Nifty Spot | 9375 |
| Premium Paid (Rs.) | 50 |
| Exercise Price | 9450 |
| Gain on Exercise | 75 |
| Total Gain Rs.(75-50)*75) | Rs.1875 |
| Scenario 2: If Nifty Index Stays over the Strike price of 9450 | |
| Say Nifty Spot | 9500 |
| Net Loss to the Scheme will be premium paid | Rs.3750 |

Risks associated with Option Contracts: The option contracts give a person the right but not an obligation to buy or sell. The risk is potential mispricing and exposure to options can limit the profits from a genuine investment transaction.

Various Derivatives Strategies:

1. Index / Stock spot - Index / Stock Futures

The pricing of the futures is derived from underlying Index spot or the underlying stock. It is the cost of carry that binds the value of the futures to the underlying portfolio. When the two go out of sync, there are opportunities.

The cost of carry links the futures price to the price of the underlying asset. The price of the futures at any given instance should typically be more than the level of the spot price at that point. Theoretically, the fair value of the futures is equal to the spot price of the underlying plus the cost of carry i.e. the interest rate prevailing for an equivalent credit risk. Cash and carry trades at times provide higher than the prevailing interest rates. There is an opportunity to exploit by selling the overpriced futures and buying the underlying portfolio. It may also happen that the Index / Stock Future may be at a discount. In such cases, the Scheme may buy the future and sell the stock after borrowing the same. The Scheme shall enter into a combination

of these transactions simultaneously.

If the Scheme has to unwind the positions prior to the expiry on account of redemptions or any other reason, the returns would depend on the spread between the spot and futures price at which the position is unwound. If the price differential between the spot and futures position of the subsequent month maturity is attractive near the expiry date, then the scheme may rollover the futures position and continue with the position in the spot market. The Scheme shall endeavour to deploy its assets through transactions in the above pattern, which may involve Index Futures with Stock Futures or Futures of the same stock with different expiry months.

2. Cash Futures Arbitrage Strategy

The fund would look for market opportunities between the spot and the futures market. The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock. The fund would first buy the stocks in cash market and then sell in the futures market to lock the spread.

Buying the stock in cash market and selling the futures results in a hedge where the fund portfolio has locked in a spread and is not affected by the price movements in the spot and futures markets. The arbitrage position can be continued till expiry of the futures contracts. The futures contracts are settled based on the last half an hour's weighted average trade of the cash market. There is a convergence between the cash market and the futures market on expiry and this convergence results in the portfolio being able to generate the arbitrage return locked in earlier. However, the position may even be closed earlier in the event of the price differential being realized before expiry or better opportunities being available in other stocks / indexes. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of capital.

Illustration of a Cash Futures Arbitrage Strategy: -

Buy 100 shares of Company X at Rs 1000 and sell the same quantity of stock's futures of the Company X at Rs 1100.

1. Market goes up and the price on the expiry day is Rs 2000.

At the end of the month (expiry day) the futures expires automatically:

Settlement price of futures = closing spot price = Rs 2000

Gain on stock is $100 \times (2000 - 1000) = \text{Rs } 100,000$

Loss on futures is $100 \times (1100 - 2000) = \text{Rs } -90,000$

Net gain is $100,000 - 90,000 = \text{Rs } 10,000$

2. Market goes down and the price on the expiry day is Rs 500.

At the end of the month (expiry day) the futures expires automatically:

Settlement price of futures = closing spot price = Rs 500

Loss on stock is $100 \times (500 - 1000) = \text{Rs } -50,000$

Gain on futures is $100 \times (1100 - 500) = \text{Rs } 60,000$

Net gain is $60,000 - 50,000 = \text{Rs } 10,000$

Unwinding the position:

Buy 100 shares of Company X at Rs 1000 and sell the same quantity of stock's futures of the Company X at Rs 1100.

The market goes up and at some point of time during the month (before expiry) the stock trades at Rs 1200 and the futures trades at Rs 1190 then

Fund Manager will unwind the position:

Buy back the futures at Rs 1190: loss incurred is $(1100 - 1190) \times 100 = \text{Rs } -9,000$

Sell the stock at Rs 1200: gain realized: $(1200 - 1000) \times 100 = \text{Rs } 20,000$

Net gain is $20,000 - 9,000 = \text{Rs } 11,000$

Rolling over the futures:

The Scheme may continue to stay invested in the stock in the Cash market. Close to expiry, if the stock's price is at Rs 1500 then the stock's futures is close to Rs 1500 as well. Also if the price of the current month stock futures is below the current price of the next month stock futures, the scheme may roll over the futures position to the next expiry:

The price of the stock futures next month contract is at Rs 1510

The price of the stock futures current month contract is at Rs 1500

Then sell the futures next month contract at Rs 1510 and buy back current month futures contract at Rs 1500 = gain of $100 \times (1510 - 1500) = \text{Rs } 9,000$ and the arbitrage position is rolled over.

3. Use of derivative for other Arbitrage Opportunities

a. Dividend Arbitrage

At the time of declaration of dividend, the stock futures / options market can provide a profitable opportunity. Generally, the stock prices decline by the dividend amount when the stock becomes ex-dividend.

b. Buy-Back / Open Offer Arbitrage

When the Company announces the buy-back or open offer of its own shares, there could be opportunities due to price differential in buyback price and traded price.

c. Weighted average price of futures on expiry.

The fund manager will aim at liquidating the cash market position in the last half an hour on expiry day at a rate that will be closed to weighted price in the spot market. However, the extreme volatility in last half an hour may effect the price and accordingly affect the return. Accordingly, fund will aim at taking exposure to those stocks where the bid and ask spread is minimum.

d. Reverse cash and carry arbitrage

If permitted by SEBI, the scheme may enter into reverse cash and carry arbitrage. This will involve borrowing stock for a defined period from a recognized counter-party and selling it in the market while simultaneously taking a long position in the stock futures. The above trade will be remunerative in scenarios where the stock/ index futures are trading at a discount to the underlying cash market. Once the discount narrows or converts to a premium, the position is unwound by buying back the stock/index and squaring off the futures transaction. The purchased stock/ index is returned to the lender as per the agreed terms.

The scheme may use fixed income derivative instruments like Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced from time to time and as may be permitted under the SEBI (Mutual Fund) Regulations.

Interest Rate Swaps (IRS): An Interest Rate Swap is an agreement whereby two parties agree to exchange periodic interest payments. The amount of interest payments exchanged is based on some predetermined principal, called notional principal amount. The amount each counterparty pays to the other upon periodic interest rate multiplied by the notional principal amount. The only amount that is exchanged between the parties is the interest payment, not the notional principal amount.

Example: Use of IRS

The Plans of the fund are reasonably invested, and the view of the fund manager is interest rates are expected to move up due to certain negative events which have occurred. In such cases the plans can enter into a paid position (IRS) where the plans will pay a fixed rate for a specified maturity and receive the floating rate of interest. This is illustrated below:

Example A: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is bearish and call rates are likely to spurt over the next three months. The fund manager would therefore prefer to pay fixed rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days floating interest rate from overnight fixed rate.

1. Say Notional Amount: Rs. 2 crores
2. Benchmark: NSE MIBOR
3. Tenor: 91 Days
4. Fixed Rate: 9.90%
5. At the end of 91 days;
6. The Scheme pays: fixed rates for 91 days is 9.90%
7. TMF receives: compounded call rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. $2,00,00,000 \times 0.35\% \times 91 / 365 = 17,452$. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

In view of the fund manager interest rates are expected to move down due to certain positive events which have occurred. In such cases the scheme can enter into a received position (IRS) where the scheme will receive a fixed rate for a specified maturity and pay the floating rate of interest. This is illustrated below:

Example B: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is soft and call rates are unlikely to spurt over the next three months. The fund manager would therefore prefer to receive a higher rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days fixed interest rate from overnight floating rate.

1. Say Notional Amount: Rs. 2 crores
2. Benchmark: NSE MIBOR
3. Tenor: 91 Days
4. Fixed Rate: 10.25%

5. At the end of 91 days;

6. The Scheme pays: compounded call rates for 91 days is 9.90%

7. TMF receives: Fixed rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. $2,00,00,000 \times 0.35\% \times 91 / 365 = 17,452$. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

Risks associated with Swaps:

Interest rate risk is significant because interest rates do not always move as expected. Both parties have interest rate risk. The holder of the fixed rate risks the floating interest rate going higher, thereby losing interest that it would have otherwise received. The holder of the floating rate risks interest rates going lower, which results in a loss of cash flow since the fixed rate holder still has to make streams of payments to the counterparty.

The other main risk associated with swaps is counterparty risk. This is the risk that the counterparty to a swap will default and be unable to meet its obligations under the terms of the swap agreement. If the holder of the floating rate is unable to make payments under the swap agreement, the holder of the fixed rate has credit exposure to changes in the interest rate agreement. This is the risk the holder of the fixed rate was seeking to avoid.

Forward Rate Agreements (FRA):

This is an agreement between two counterparties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date based on the notional amount, for an agreed period. In short, in a FRA, interest rate is fixed now for a future period.

This is illustrated below:

Assume that on September 1, 2023, the 30-day commercial paper (CP) rate is 7.75% and the Scheme has an investment in a CP of face value Rs. 50 crores, which is going to mature on September 30, 2023. If the interest rates are likely to remain stable or decline after September 30, 2023, and if the fund manager, who wants to re-deploy the maturity proceeds for 1 more month, does not want to take the risk of interest rates going down, he can then enter into a following forward rate agreement (FRA) say as on September 30, 2023:

He can receive 1 X 2 FRA on September 30, 2023 at 7.75% (FRA rate for 1-month lending in 2 months' time) on the notional amount of Rs.50 crores, with a reference rate of 30-day CP benchmark. If the CP benchmark on the settlement date i.e. September 30, 2023 falls to 7.50%, then the Scheme receives the difference 7.75 - 7.50 i.e. 25 basis points on the notional amount Rs. 50 crores for 1 month. The maturity proceeds are then reinvested at say 7.50% (close to the benchmark). The scheme, however, would have locked in the rate prevailing on September 30, 2023 (7.75%) as it would have received 25 basis points more as settlement amount from FRA. Thus the fund manager can use FRA to mitigate the reinvestment risk.

In this example, if the rates move up by 25 basis points to 8% on the settlement date (September 30, 2023), the Scheme loses 25 basis points but since the reinvestment will then happen at 8%, effective returns for the Scheme is unchanged at 7.75%, which is the prevailing rate on September 30, 2023.

Risks associated with Forward Rate Contracts:

When entering into an FRA, both parties to the contract entail credit risk exposure. The additional risks could be on account of lack of opportunity, illiquidity.

The derivative exposure limits shall be subject to following Exposure Limits as specified by SEBI :

1. The cumulative gross exposure through equities, along with other debt securities, REITs & InvITs and derivatives shall not exceed 100% of the net assets of the Scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
2. Mutual Funds shall not write options or purchase instruments with embedded written options. However SEBI has allowed has Mutual Funds to write call options under a covered call strategy for constituent stocks of NIFTY 50 and BSE SENSEX subject to specified conditions.
3. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
4. Cash or cash equivalents with residual maturity of less than 91 days shall be treated as not creating any exposure.
5. Exposure due to hedging positions shall not be included in the above mentioned limits subject to the following:
 - a) Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b) Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.
 - c) Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.

- d) The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
6. The Mutual Fund may enter into plain vanilla interest rate swaps for hedging purposes. The value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme.

In case of participation in IRS is through over the counter transactions, the counter party has to be an entity recognized as a market maker by RBI and exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme. However, if mutual funds are transacting in IRS through an electronic trading platform offered by the Clearing Corporation of India Ltd. (CCIL) and CCIL is the central counterparty for such transactions guaranteeing settlement, the single counterparty limit of 10% shall not be applicable

7. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.

In Addition to the above, SEBI has also prescribed following derivative limits:

As per provision no. 7.5 and 12.25 of SEBI Master Circular on Mutual Fund dated June 27, 2024 Mutual Funds are allowed to trade in derivatives Mutual Funds can trade in index futures, index options, stock options and stock futures contracts. Earlier Mutual Funds were only allowed to use derivatives for hedging and portfolio balancing.

Presently, the position limits for trading in derivatives by Mutual Fund specified by SEBI are as follows:

Position Limits for Mutual Fund and its scheme

| Position limit for Index Options and Index Futures contracts | |
|--|---|
| Index Options Contract* | On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index options contracts, whichever is higher. |
| Index Futures Contract** | On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index futures contracts, whichever is higher. |

* This limit would be applicable on open positions in all options contracts on a particular underlying index.

** This limit would be applicable on open positions in all futures contracts on a particular underlying index.

| Additional position limit for hedging | |
|--|---|
| In addition to the position limits as mentioned above, Mutual Funds may take exposure in equity index derivatives subject to the following limits: | <p>Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.</p> <p>Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.</p> |
| Position limit for Stock Options and Stock Futures contracts | |
| <p>The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).</p> <p>This limit would be applicable on aggregate open positions in all futures and all option contracts on a particular underlying stock.</p> | |

Position limit for each scheme of a Mutual Fund

The scheme-wise position limit requirements shall be:

- For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of:
 - 1% of the free float market capitalization (in terms of number of shares). Or
 - 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts)
- This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
- For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

For detailed derivative strategies, kindly refer SAI.

RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Scheme Specific Risk Factors:

Investment Risks

The price of securities may go up or down depending on a variety of factors and hence investors may note that AMC/Fund Manager's investment decisions may not be always profitable. Although it is intended to generate capital appreciation and maximize the returns by actively investing in equity securities and utilising debt and money market instruments as a defensive investment strategy. The price of securities may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Fund's investment objective will be attained or that the Fund may not be in a position to maintain the indicated percentage of investment pattern under exceptional circumstances. There is no guarantee the investment / dis-investment decision will result into profit.

The fund may use techniques and instruments for efficient portfolio management and to attempt to hedge or reduce the risk. However, these techniques and instruments if imperfectly used have the risk of the fund incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any). The use of these techniques is dependent on the ability to predict movements in the prices of securities being hedged and movements in interest rates. There exists an imperfect correlation between the hedging instruments and the securities or market sectors being hedged. Besides, the fact that skills needed to use these instruments are different from those needed to select the Fund's / plan's securities. There is a possible absence of a liquid market for any particular instrument at any particular time even though the futures and options may be bought and sold on an organised exchange. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase / redemption requests or other short-term obligations because of the percentage of the Fund's assets segregated to cover its obligations.

Liquidity and Settlement Risks

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain securities of certain companies, industries, sectors, etc. based on certain investment parameters as adopted internally by AMC. While at all times the AMC will endeavour that excessive holding/investment in certain securities of industries, sectors, etc. by the Scheme(s) are avoided, the funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio.

Regulatory Risk

The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation and other developments in the laws and regulations.

Risk associated with Unlisted Securities

Securities which are not quoted on the stock exchanges are inherently liquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including the put options. The liquidity and valuation of the scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Securities Lending by the Mutual Fund

The Scheme may participate in securities lending and borrowing scheme in accordance with Securities Lending Scheme, 1997, Regulation 44 (4) of SEBI (Mutual Funds) Regulations ,1996, and as per provision no. 12.11 of SEBI Master Circular on Mutual Fund dated June 27, 2024 on framework for short selling and borrowing and lending of securities.. The Scheme shall also follow other relevant regulations /guidelines issued by stock exchange(s) from time to time. The Scheme shall participate in Securities Borrowing and Lending only with the SEBI approved intermediaries.

Securities Lending means the lending of securities to SEBI approved intermediaries for a tenure of 1 to 12 months at a negotiated compensation in order to enhance returns of the scheme portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The AMC will adhere to the following strict internal limits should it engage in Securities Lending.

Not more than 20% of the net assets of the Scheme can be deployed in stock lending. Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, and government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis.

Example:

A scheme has a security of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the security, from time to time if any, on the exchange. If the scheme is enabled to lend the said security to a borrower who would be wanting to take advantage of the market fluctuations in its price, the borrower would return the security to the lender (fund) at a stipulated time or on demand for a negotiated compensation. The scheme's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost of the security. Thus it is in the interest of the investors that returns can be enhanced by way of stock lending rather than hold the security only for capital appreciation potential.

Thus the scenario under which the scheme would participate in stock lending would be:

1. There is a holding of security e.g. of XYZ Ltd in the scheme which the fund manager wants to be the core holding of the fund for approximately 6 to 12 months.
2. There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs the said security of XYZ Ltd to settle it) who is willing to put up a proper collateral for the same. (In all cases higher than the price of the script).
3. The borrower is represented by a proper recognized intermediary.
4. The agreement is to return the security or the amount so negotiated at a particular period of time or on demand.

Then the security will be lent by the scheme and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, stock lending would be done by the scheme only in the following circumstances:

- a) If permitted by trustees and the extent SEBI regulations in that regard, from time to time.
- b) If such activity generates additional returns for the scheme and helps to enhance the scheme returns.
- c) If considering the above and other factors all considered in totality, such activity is in the interest of unitholders in the scheme.

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.

Risks associated with investing in debt securities

- Investments in money market instruments would involve a moderate credit risk i.e. risk of an issuer's liability to meet the principal payments. Additionally, money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- Money market instruments are also subject to price volatility due to factors such as changes in interest rates (when interest rates in the market rise, the value of a portfolio of money market instruments can be expected to decline), general levels of market liquidity, market perception of credit worthiness of the issuer of such instruments and risks associated with settlement of transactions and re-investment of intermediate cash flows. The NAV of the Scheme's Units, to the extent that the Scheme is invested in money market instruments, will consequently be affected by the aforesaid factors. The AMC endeavours to manage such risk by the use of in house credit analysis.
- Investments in different types of securities are subject to different levels

and kinds of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern. E.g. investments in corporate bonds carry a higher level of risk than investments in Government Securities. Further, even among corporate bonds, bonds which have a higher rating are comparatively less risky than bonds which have a lower rating.

- **Interest rate/price risk:** As with all debt securities, changes in interest rates may affect the NAV of the Scheme since the price of a fixed income instrument falls when the interest rates move up and vice versa. The effect is more prominent when the duration of the instrument is higher. Hence the NAV movement of the Scheme consisting of predominantly fixed income securities is likely to have inverse correlation with the movement in interest rates. In case of a floating rate instrument, this risk is lower as a result of periodic reset of the coupon. During the life of floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in the interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.
- Government securities do carry price risk depending upon the general level of interest rates prevailing from time to time. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price of the Government securities (existing and new) is influenced only by movements in interest rates in financial systems.
- Floating rate securities issued by the Government (coupon linked to treasury bill benchmark or an inflation linked bond) have the least sensitivity to interest rate movements compared to other securities. Some of these securities are already in issue and the fund manager believes that more such securities may become available in future. These securities can play an important role in minimising interest rate risk in a portfolio.
- **Spread risk:** Though the sovereign yield curve might remain constant, investments in corporate bonds are exposed to the risk of spread widening between corporate bonds and gilts. Typically, if this spread widens, the prices of the corporate bonds tend to fall and so could the NAV of the Scheme. Similar risk prevails for the investments in the floating rate bonds, where the benchmark might remain unchanged, but the spread over the benchmark might vary. In such an event, if the spread widens, the price and the NAV of a Scheme could fall.
- **Sovereign risk:** The Central Government of a country is the issuer of the local currency in that country. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since payment of interest and principal amount has a sovereign status implying no default, such securities are known as securities with sovereign credit. For domestic borrowers and lenders, the credit risk on such Sovereign credit is near zero and is popularly known as "risk free security" or "Zero Risk security". Thus Zero-Risk is the lowest risk, even lower than a security with "AAA" rating and hence commands a yield, which is lower than a yield on "AAA" security.
- **Credit risk or default risk:** This refers to inability of the issuer of the debt security to make timely payments of principal and/or interest due. In case of investments in government securities, the credit risk is minimal. It is reflected in the credit rating of the issuer. Hence if the credit rating of the issuer is downgraded, the price of the security will suffer a loss and the NAV will fall. Credit risk factors pertaining to lower rated securities also apply to lower rated zero coupon and deferred interest kind bonds. Lower rated zero coupon and deferred interest kind bonds carry an additional risk in that, unlike bonds that pay interest through the period of maturity, the Scheme by investing in these bonds will realize no cash till the cash payment date and if the issuer defaults, the Scheme may obtain no return on its investment.
- **Liquidity risk:** This represents the possibility that the realised price from selling the security might be lesser than the valuation price as a result of illiquid market. If a large outflow from the Scheme is funded by selling some of the illiquid securities, the NAV could fall even if there is
- No change in interest rates. Illiquid securities are typically quoted at a higher yield than the liquid securities and have higher bid offer spreads. Investment in illiquid securities results in higher current yield for the portfolio. Liquidity risk is a characteristic of the Indian fixed income market today. In addition, money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.
- The corporate debt market is relatively illiquid vis-a-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.
- **Re-investment risk:** This is associated with the fact that the intermediate cash flows (coupons or principal payment in case a security gets called or repurchased) may not be reinvested at the same yield as assumed in the

original calculations.

- **Settlement risk:** Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme, to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well developed and liquid secondary market for debt securities, may result at times in potential losses to such Scheme in the event of a subsequent decline in the value of securities held in the portfolio of the Scheme.
- **Market risk:** Lower rated or unrated securities are more likely to react to developments affecting the market and the credit risk than the highly rated securities which react primarily to movements in the general level of interest rates. Lower rated or unrated securities also tend to be more sensitive to economic conditions than higher rated securities.
- In addition to the factors that affect the values of securities, the NAV of Units of the Scheme will fluctuate with the movement in the broader fixed income market, money market and derivatives market and may be influenced by factors influencing such markets in general including but not limited to economic conditions, changes in interest rates, price and volume volatility in the bond and stock markets, changes in taxation, currency exchange rates, foreign investments, political, economic or other developments and closure of the stock exchanges.
- Investments in different types of securities are subject to different levels and kinds of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern. E.g. investments in corporate bonds carry a higher level of risk than investments in Government securities. Further, even among corporate bonds, bonds which have a higher rating are comparatively less risky than bonds which have a lower rating.

Risks Associated with Investments in REITs and InvITS:

- **Market Risk:** REITs and InvITS Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. AMC/Fund Manager's will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.
- **Liquidity Risk:** As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.
- **Reinvestment Risk:** Investments in REITs & InvITS may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Regulatory/Legal Risk:** REITs and InvITS being new asset classes, rights of unit holders such as right to information etc. may differ from existing capital market asset classes under Indian Law.

Risks associated with Segregated Portfolio

Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer. Security comprises of segregated portfolio may not realise any value.

Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risks associated with investing in derivatives

- The Scheme will invest in derivative products in accordance with and to the extent permitted under the Regulations and by RBI. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.
- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.

- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".
- The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility to the values.
- The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.
- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. The counter party may default on a transaction before settlement and therefore, the Scheme(s) are compelled to negotiate with another counterparty at the then prevailing (possibly unfavourable) market price.
- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.
- Where derivatives are used for hedging, such use may involve a basic risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Trading through mutual fund trading platforms of BSE and/ or NSE

In respect of transaction in Units of the Scheme through BSE and/ or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by BSE and/ or NSE and their respective clearing corporations on which the Mutual Fund has no control.

Performance Risk: The Scheme's performance can decrease or increase, depending on a variety of factors, which may affect the values and income generated by a Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in government and Reserve Bank of India policy, taxation, political, economic or other developments and closure of the stock exchanges. Investors should understand that the investment pattern indicated for the Scheme, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there can be no assurance that the Scheme's investment objective will be attained nor will the Scheme be in a position to maintain the model percentage of investment pattern/ composition particularly under exceptional circumstances so that the interest of the unit holders are protected. The AMC will endeavour to invest in highly researched growth companies, however the growth associated with equities may be generally high as also the erosion in the value of the investments/portfolio in the case of the capital markets passing through a bearish phase is a distinct possibility. A change in the prevailing rates of interest is likely to affect the value of the Scheme's investments and thus the value of the Scheme's Units. The value of money market instruments held by the Scheme generally will vary inversely with the changes in prevailing interest rates.

Risk of Writing of Call Option Under a Covered Call Strategy

Under a delivery settlement a call writer will have to part with the physical

holding of security which was originally intended for long term holding.

Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

For details on risk factors and risk mitigation measures, please refer SID.

PLANS AND OPTIONS

Regular Plan (For applications routed through Distributors):

1. Growth
2. Income Distribution cum Withdrawal Option (IDCW)

Direct Plan (For applications not routed through Distributors):

1. Growth
2. Income Distribution cum Withdrawal Option (IDCW)

Default Option

If Growth or Income Distribution Option is not mentioned: Growth

Default Sub-Option: Reinvestment of Income Distribution cum capital withdrawal option (IDCW- Reinvestment)

Income Distribution cum Withdrawal Option has sub-options of Payout of Income Distribution Cum Capital Withdrawal Option (IDCW - Payout Option), Reinvestment of Income Distribution cum capital withdrawal option (IDCW - Reinvestment Option), and Transfer of Income Distribution cum capital withdrawal plan (IDCW-Transfer)

Please note that the Income shall be distributed at the discretion of the Trustees subject to availability of distributable surplus.

Default Option: Investor should appropriately tick the 'option' (Income Distribution cum Withdrawal Option or growth) and sub-options in the application form while investing in the Scheme. If no option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Growth Option. If no Income Distribution cum Withdrawal sub-option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Reinvestment of Income Distribution cum capital withdrawal option (IDCW- Reinvestment).

Default Plan: Investors are requested to note the following scenarios for the applicability of "Direct Plan (application not routed through distributor) or Regular Plan (application routed through distributor) " for valid applications received under the scheme:

| Scenario | Broker Code mentioned by the investor | Plan mentioned by the investor | Default Plan to be captured |
|----------|---------------------------------------|--------------------------------|-----------------------------|
| 1 | Not mentioned | Not mentioned | Direct Plan |
| 2 | Not mentioned | Direct Plan | Direct Plan |
| 3 | Not mentioned | Regular Plan | Direct Plan |
| 4 | Mentioned | Direct Plan | Direct Plan |
| 5 | Direct Plan | Not Mentioned | Direct Plan |
| 6 | Direct Plan | Regular Plan | Direct Plan |
| 7 | Mentioned | Regular Plan | Regular Plan |
| 8 | Mentioned | Not Mentioned | Regular Plan |

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the

application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

For detailed disclosure on default plans and options, kindly refer SAI.

APPLICABLE NAV (after the scheme opens for subscriptions and redemptions)

Applicable NAV for Subscription / Switch-in: Cut Off Timing 3.00 pm

| Particulars | Applicable NAV |
|--|---|
| Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the scheme before the cut-off time. | The closing NAV of the same day. |
| Valid applications received (time-stamped) after 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme either on the same day or before the cut-off time of the next Business Day i.e. available for utilization before the cut-off time of the next Business Day. | The closing NAV of the next Business Day. |
| Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme after the cut-off time on the same day i.e. available for utilization after the cut-off time of the Day. | The closing NAV of the next Business Day. |
| Where the application is time stamped any day before the credit of the funds to the scheme but the funds for the entire amount are credited to the bank account of the scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on such subsequent Business Day. | The closing NAV of such subsequent Business Day on which funds are available for utilisation. |

In case application is time stamped after cut off timing on any day, the same will be considered as deemed to be received on the next business day.

In case funds are realised after cut-off timing on any day, the same will be considered as deemed to be realised /available for utilisation on the next business day.

For Switch-ins including Systematic Investment Plan (SIP), Systematic Transfer Plan (STP) of any amount:

For determining the applicable NAV, the following shall be ensured:

- Application for switch-in is received before the applicable cut-off time.
- Funds for the entire amount of subscription / purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time, and the funds are available for utilization before the cut-off time.
- In case of switch/STP transactions, funds will be made available for utilization in the switch-in-scheme based on the redemption payout cycle of the switch out scheme.

For investments through systematic investment routes such as Systematic Investment Plans (SIP), Systematic Transfer Plans (STP), IDCW Transfer Plan (DTP), etc. the units will be allotted as per the closing NAV of the day on which the funds are available for utilization by the Target Scheme irrespective of the installment date of the SIP, STP or record date of income distribution cum capital withdrawal etc.

Redemption /Switch Out: In respect of application received upto 3 p.m., closing NAV of the day of receipt of application shall be applicable and in respect of application received after 3 p.m. closing NAV of next business day.

Outstation cheques/demand drafts will not be accepted.

Valid application for "switch out" shall be treated as redemption and for "switch in" shall be treated as purchases and the relevant NAV of "Switch in" and "Switch Out" shall be applicable accordingly.

MINIMUM APPLICATION AMOUNT / NUMBER OF UNITS UNDER EACH PLAN

Purchase: Minimum subscription amount for the scheme: Rs 5,000/- and in multiple of Re.1/- thereafter

Additional Purchase: Rs.1000/- & in multiples of Re.1/- thereafter.

Redemption: Redemption request can be made for a minimum of Rs.500/50 units or folio balance whichever is lower.

There is no minimum amount requirement, in case of investors opting to switch "all units" from any existing schemes of Tata Mutual Fund to this Scheme.

Non applicability Minimum Application Amount (Lump-sum) and Minimum Redemption amount

SEBI vide its provision no. 6.10 of SEBI Master circular on Mutual Fund dated

June 27, 2024 (Alignment of interest of Designated Employees of Asset Management Companies (AMCs) with the Unitholders of the Mutual Fund Schemes) has mandated that a minimum of 20% of gross annual CTC net of income tax and any statutory contributions of the Designated Employees of the AMCs shall be invested in units of the scheme(s) of the Fund in which they have a role/oversight. However, for key employees below 35 yrs of age the implementation of this rule shall be in a phased manner i.e. 10% in the first year (Oct 01 2021 to Sept 30 2022), 15% in the second year (Oct 01 2022 to Sept 30 2023) & 20% w.e.f Oct 01 2023.

In accordance with the regulatory requirement, the minimum application amount and minimum redemption amount wherever specified in the SID will not be applicable for investment made in schemes of the Fund in compliance with the sebi circular.

Minimum application amount for SIP

Rs 100 and in multiples of Re 1/- thereafter.

DESPATCH OF REDEMPTION REQUEST

Under normal circumstances the AMC shall make the payment of redemption proceeds within three working days from the date of redemption or repurchase, subject to exceptional circumstances as mentioned in this document. In case of failure to dispatch, Interest for the period of delay shall be payable to unitholders at the rate of 15% per annum alongwith redemption or repurchase proceeds.

BENCHMARK INDEX

Nifty 500 TRI

DIVIDEND POLICY

Income Distribution cum Capital Withdrawal Policy

Growth Option:

The income / profits received / earned would be accumulated by the Fund as capital accretion, aimed at achieving medium to long term and also short term capital growth and reflected in the NAV.

Payout of Income Distribution cum capital withdrawal option:

The profits received / earned and so retained and reinvested may be distributed as income at appropriate rates (after providing for all relevant ongoing expenses, etc.) and at appropriate intervals as may be decided by the AMC and/or Trustee Company. It will be distributed to the unitholders who hold the units on the record date of declaration of the Income.

Please note that the income distribution i. e income distribution and its frequency is subject to availability of distributable surplus and at the discretion of the trustees

The Fund reserves a right to modify the periodicity and manner of payout of such income distribution as they deem fit without giving any further notice to unitholders.

The Fund does not assure any targeted annual return / income nor any capitalisation ratio. Accumulation of earnings and / or capitalisation of bonus units and the consequent determination of NAV, may be suspended temporarily or indefinitely under any of the circumstances as stated in the clause "Suspension of Ongoing Sale, Repurchase or Switch out of Units".

Investor shall note that when units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains shall be credited to an Equalization Reserve Account and which can be used to pay income distribution. Hence income distribution amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

Reinvestment of Income Distribution cum capital withdrawal option:

Unitholders under this Option also have the facility of reinvestment of the income so declared, if so desired. Income Distribution Warrants will not be despatched to such Unitholders. The income declared would be reinvested in the Scheme on the immediately following ex-dividend date.

Transfer of Income Distribution cum capital withdrawal plan):

Under this facility investor can opt for reinvestment of divided into any other scheme of Tata Mutual Fund. This facility is not available to those investors who have opted for IDCW- pay-out facility Under this facility, the net income distribution amount (i.e. net of statutory levy/taxes if any) will be automatically invested on the ex-dividend date into other scheme of Tata Mutual Fund as specified by the investor at the applicable NAV of that scheme and accordingly equivalent units will be allotted in lieu of income distribution, subject to the terms and conditions of the schemes. No entry Load or exit load will be levied on the units issued in lieu of income distribution. AMC reserves the right to modify or withdraw this facility without prior notice.

Compulsory Re-investment of Income Distribution:

In order to reduce the expenses of the scheme and also for the convenience of the investors, income distribution shall be compulsorily reinvested in the respective option the schemes at the applicable ex-dividend NAV if income distribution amount is Rs 100/- or less- (or any other amount as may be specified by the AMC from time to time).

2. Disclosure of name and exposure to Top 7 issuers, stocks, groups and sectors as a percentage of NAV of the scheme in case of debt and equity ETFs/index funds through a functional website link - <https://www.tatamutualfund.com/statutory-disclosures/other-statutory-disclosures>)
3. Portfolio Turnover Ratio: 0.45 times as on 30.09.2024 (for 13 months).

EXPENSES OF THE SCHEME

Load Structure

Continuous Offer

Entry Load: Not Applicable (Pursuant to provision no. 10.4.1.a of SEBI Master Circular on Mutual Fund dated June 27, 2024, no entry load will be charged by the Scheme to the investor).

Exit Load:

- 1) Redemption/Switch-out/SWP/STP on or before expiry of 12 Months from the date of allotment: If the withdrawal amount or switched out amount is not more than 12% of the original cost of investment-NIL

- 2) Redemption/Switch-out/SWP/STP on or before expiry of 12 Months from the date of allotment: If the withdrawal amount or switched out amount is more than 12% of the original cost of investment-1%
- 3) Redemption/Switch-out/SWP/STP after expiry of 12 Months from the date of allotment-NIL

Pursuant to AMFI's communication dated 09th April 2025, Exit Load will not be charged on any Switch/Systematic transfer transaction from Regular plan to Direct plan of the same scheme w.e.f. 23rd April 2025.

Slab wise break up depending on the assets under management:

As per provision no. 52.6.c of SEBI (Mutual Funds) Regulations, 1996 the total expense ratio of open-ended scheme shall not exceed the following limits. The AMC has estimated that upto 2.25 % (excluding additional permissible limits as per Regulation 52(6A)(b) & 52(6A)(c)) of the daily average net assets of the scheme will be charged to the scheme as expenses.

| Assets under management Slab (In Rs. crores) | Total expense ratio limits for equity-oriented schemes | Total expense ratio limits for other than equity-oriented schemes |
|--|---|---|
| On the first Rs.500 crores of the daily net assets | 2.25% | 2.00% |
| On the next Rs.250 crores of the daily net assets | 2.00% | 1.75% |
| On the next Rs.1,250 crores of the daily net assets | 1.75% | 1.50% |
| On the next Rs.3,000 crores of the daily net assets | 1.60% | 1.35% |
| On the next Rs.5,000 crores of the daily net assets | 1.50% | 1.25% |
| On the next Rs.40,000 crores of the daily net assets | Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof. | |
| On balance of the assets | 1.05% | 0.80% |

For the actual current expenses being charged, the investor should refer to functional Weblink: <https://www.tatamutualfund.com/expense-ratio/total-expense-ratio>.

Annual Recurring expenses

| Actual Expenses % to daily net assets for the F.Y. 2024-2025 | | |
|--|-------------|--------------|
| Tata Flexi Cap Fund | Direct Plan | Regular Plan |
| | 0.58% | 1.86% |

The maximum limit of recurring expenses that can be charged to the Scheme would be as per Regulation 52 of the SEBI (MF) Regulation, 1996. Investors are requested to read "Section-Annual Scheme Recurring Expenses" in the SID.

TAX TREATMENT FOR THE INVESTORS (UNITHOLDERS)

Investor will be advised to refer to the details in the Statement of Additional Information and also independently refer to his tax advisor.

DAILY NET ASSET VALUE (NAV) PUBLICATION

The NAVs will be calculated and disclosed on every Business Day. The AMC shall prominently disclose the NAVs under a separate head on the website of the Fund (www.tatamutualfund.com) and of the Association of Mutual Funds in India- AMFI (www.amfiindia.com) by 11 p.m on every Business Day[^].

However, due to inability in capturing same day valuation of underlying investments, the NAV shall be disclosed by 11 P.M. of the next business day[^].

[^] If the NAVs are not available before the commencement of Business Hours on the following day (i.e., next day after the respective business day) due to any reason, the Mutual Fund shall issue a press release giving reasons for the delay and explain by when the Mutual Fund would be able to publish the NAV.

In case of unitholders whose email addresses are registered, Tata Mutual Fund shall send via email both the monthly and half yearly statement of scheme portfolio within 10 days from the close of each month /half year respectively.

Due to difference in the expense ratio, the NAV of each option of Direct Plan will be different from the NAV of each option of Regular Plan. Similarly, due to payout option, the NAV of Income Distribution Option will be different from the NAV of Growth option.

UNITHOLDERS' INFORMATION

Account Statement:

The AMC will send an allotment confirmation specifying the units allotted by way of email and/or SMS within 5 working days of receipt of valid application/ transaction to the Unit holders registered e-mail address and/ or mobile number (whether units are held in demat mode or in account statement form).

A Consolidated Account Statement (CAS) detailing all the transactions across all mutual funds (including transaction charges paid to the distributor) and holding at the end of the month shall be sent to the Unit holders in whose folio(s) transaction(s) have taken place during the month by mail or email on or before 15th of the succeeding month.

Half-yearly CAS shall be issued at the end of every six months (i.e. September/ March) on or before 21st day of succeeding month, to all investors providing the prescribed details across all schemes of mutual funds and securities held in dematerialized form across demat accounts, if applicable

For further details, refer SAI.

Portfolio Disclosure:

Tata Mutual Fund will disclose portfolio (along with ISIN) in user friendly and downloadable spreadsheet format, as on the last day of the month/half year for all their schemes on its website www.tatamutualfund.com and on the website of AMFI www.amfiindia.com within 10 days from the close of each month/half year. Disclosure of risk-o-meter of scheme, benchmark and portfolio details to the investors will be disclosed as mandated by provision no. 5.16 & 5.17 of SEBI Master Circular on Mutual Fund dated June 27, 2024.

In addition to monthly portfolio Tata Mutual Fund shall also disclose fortnight portfolio for debt scheme within 5 days of every fortnight as per provision no. 5.1 of SEBI Master circular on Mutual Fund dated June 27, 2024.

In case of unitholders whose email addresses are registered, Tata Mutual Fund will send via email both the monthly and half yearly statement of scheme portfolio within 10 days from the close of each month /half year respectively.

Tata Mutual Fund will publish an advertisement every half-year, in the all India edition of at least two daily newspapers, one each in English and Hindi, disclosing the hosting of the half yearly statement of the schemes portfolio on the AMC's website www.tatamutualfund.com and on the website of AMFI (www.amfiindia.com). Tata Mutual Fund will provide physical copy of the statement of scheme portfolio without any cost, on specific request received from a unitholder.

For portfolio disclosure of schemes of Tata Mutual Fund, kindly visit functional Weblink: <https://www.tatamutualfund.com/schemes-related>

Unaudited Financial Results:

Tata Mutual Fund/ Tata Asset Management Pvt Ltd shall within one month from the close of each half year, that is on 31st March & on 30th September, host a soft copy of its unaudited financial results on its website in the format specified in Twelfth Schedule of SEBI (Mutual Funds) Regulations 1996.

Tata Mutual Fund / Tata Asset Management Pvt Ltd shall publish an advertisement disclosing the hosting of such financial results on their website, in atleast one English daily newspaper having nationwide circulation & in a newspaper having wide circulation published in the language of the region where the Head Office of the fund is situated.

Annual Report

Annual report or Abridged Summary, in the format prescribed by SEBI, will be hosted on AMC's website www.tatamutualfund.com and on the website of AMFI www.amfiindia.com.

The scheme wise annual report or an abridged summary thereof, in the format prescribed, shall be sent by way of e-mail to the investor's registered e-mail address not later than four months from the date of closure of the relevant accounts year.

Investors who have not registered their email id, will have an option of receiving a physical copy of the Annual Report or Abridged Summary thereof.
