KEY INFORMATION MEMORANDUM

TATA mutual fund

TATA FLOATING RATE FUND

(An open ended debt scheme investing predominantly in floating rate instruments (including fixed rate instruments converted to floating rate exposures using swaps/derivatives), A Relatively High Interest Rate Risk and Moderate Credit Risk).

(SCHEME CODE - TATA/O/D/FLF/21/04/0043)

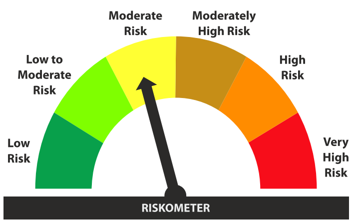
Potential Risk Class			
Credit Risk → Interest Rate Risk ↓	Relatively Low (Class A)	Moderate (Class B)	Relatively High (Class C)
Relatively Low (Class I)			
Moderate (Class II)			
Relatively High (Class III)		B-III	

This product is suitable for investors who are seeking*:

- Regular Income by investing predominantly in a portfolio of floating rate instruments (including fixed rate instruments converted for floating rate exposures using swaps / derivatives).

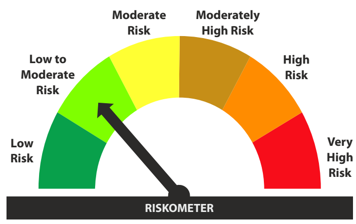
***Investors should consult their financial advisors if in doubt about whether the product is suitable for them.**

Scheme Riskometer



The risk of the scheme is Moderate

Benchmark Riskometer



The risk of the benchmark is Low to Moderate

It may be noted that risk-o-meter specified above is based on internal assessment. The same shall be updated as per provision no. 17.4.1.i of SEBI Master Circular on Mutual Fund dated 27.06.2024, on Product labelling in mutual fund schemes on ongoing basis.

Units were offered at Rs. 10/- each for cash during the New Fund Offer & Continuous offer for units at NAV based prices, subject to applicable load.

New Fund Offer Opened On	**21.06.2021**
New Fund Offer Closed On	**05.07.2021**
Scheme Re-opened On	**14.07.2021**

INVESTMENT OBJECTIVE

The objective of the scheme is to generate income through investment primarily in floating rate debt instruments, fixed rate debt instruments swapped for floating rate returns and money market instruments.

However, there is no guarantee or assurance that the investment objective of the scheme will be achieved. The scheme doesn't assure or guarantee any returns.

ASSET ALLOCATION PATTERN OF THE SCHEME

Under normal circumstances, the asset allocation of the Scheme will be as follows:

Instruments	Indicative Allocations (% of net assets)	
	Minimum upto	Maximum upto
Floating rate securities* (including fixed rate securities converted to floating rate exposures using swaps / derivatives)	65	100
Fixed rate debt securities, securitized debt, money market instruments	0	35
Units issued by REITs & InvITs	0	10

* Floating rate securities include Floating rate Money Market Instruments.

Under normal circumstances at least 65% of the total portfolio will be invested in floating rate debt securities. This may be by way of direct investment in floating rate securities or fixed rate securities swapped for floating rate returns by using swaps/derivatives. Use of derivatives for other purpose (excluding hedge position) will be restricted to 30% of the net assets of the Scheme.

The Scheme may undertake (i) repo/ reverse repo transactions in Corporate Debt Securities; (ii) Short Selling and such other transactions in accordance with guidelines issued by SEBI from time to time.

The scheme may invest in units of domestic mutual fund schemes including ETFs to the extent of 35% of the net assets , subject to the limits prescribed in clause 4 of Seventh Schedule of SEBI(Mutual Funds) Regulations 1996 .

The scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

The cumulative gross exposure through repo transactions in corporate debt securities along with other debt securities, REITs and InvITs and derivatives shall not exceed 100% of the net assets of the Scheme . Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

The Scheme may indulge in 'Imperfect hedging' using IRFs upto maximum of 20% of the net assets of the scheme.

The scheme may invest in any other assets/securities as may permitted by SEBI/RBI from time to time subject to SEBI/RBI approvals as may be required.

Pending deployment of funds of a Scheme in terms of investment objectives of the scheme, a mutual fund may invest them in short term deposits of schedule commercial banks, subject to provision no. 12.16 of SEBI Master Circular on Mutual Fund dated June 27, 2024. Asset Management Company (AMC) will not charge investment management and advisory fees on funds which are parked in short term deposits of scheduled commercial banks.

Due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short term purpose only for defensive considerations and such deviation shall be subjected to 30 days rebalancing period.

Duration, Valuation, Yields, in case of perpetual bonds, debt instruments with special features, debt instruments with call/put options, floating rate bonds will be based on the method specified by SEBI or AMFI from time to time.

Provision no. 4.5 & 4.6 of SEBI Master circular on Mutual Fund dated June 27, 2024 has mandated the open ended debt schemes (except Overnight Schemes and Gilt Schemes) shall hold minimum liquid assets in the schemes (i.e 20 % in case in case of Liquid Schemes and 10% in other schemes). In order to have uniform practices across, AMFI vide Best Practices Guidelines under reference 135/BP/93/2021-22 dated July 24,2021, has prescribed detailed guidelines for maintenance of minimum liquid assets in the open ended debt schemes (except Overnight Schemes and Gilt Schemes).

As per AMFI Guidelines, these schemes are required to maintain following two ratios on an ongoing basis.

1) LR-RaR- Redemption at Risk

2) LR-CRaR – Conditional redemption at Risk

It shall be ensured that the liquid assets / eligible assets are maintained to the extent of the LR-RaR and LR-CRaR ratios. In case, the exposure in such liquid assets/eligible assets falls below the prescribed threshold levels of net assets of the Scheme, the AMC shall ensure that the LR -RaR and LR-CRaR ratios are restored to 100% of the required level(s) by ensuring that the net inflows (through net subscription /accruals /maturity & sale proceeds) into the scheme are used for restoring the ratios before making any new purchases outside 'Liquid Assets / Eligible Assets' as specified in the referred circular(s). in case the ratio remains below 100% for more than 15 consecutive days, then, this information will be highlighted to Trustees till such time said ratio is not restored to 100% of the requirement on weekly basis. Certain additional parameters such as concentration of an investor group / distributor, exit load features, taxation dynamics etc shall be monitored at scheme level.

Also, provision no. 4.1 of SEBI Master circular on Mutual Fund dated June 27, 2024 the AMC should have policy in place on management of the mis-match in putative liabilities vis-à-vis the liquid assets of each scheme. AMC shall report the status of compliance with the liquidity risk management policy to the Board of AMC & Trustees at the frequency and format prescribed by AMFI/Trustees.

Pursuant to provision no 16A.1 of SEBI Master circular on Mutual Fund dated June 27, 2024, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Note: The investment in CDMDF shall not be considered as a Fundamental Attribute Change of the scheme.

CDMDF Framework

CDMDF shall comply with the Guarantee Scheme for Corporate Debt (GSCD) as notified by Ministry of Finance vide notification no. G.S.R. 559(E) dated July 26, 2023 and provision no 16A. 1of SEBI Master circular on Mutual Fund dated June 27, 2024 and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time, which includes the framework for corporate debt market development fund. The framework will inclusive of following points-

a) The CDMDF shall deal only in following securities during normal times:
   - Low duration Government Securities
   - Treasury bills
   - Tri-party Repo on G-sec
   - Guaranteed corporate bond repo with maturity not exceeding 7 days.

b) The fees and expenses of CDMDF shall be as follows:
   - During Normal times: (0.15% + tax) of the Portfolio Value charged on daily pro-rata basis.
   - During Market stress: (0.20% + tax) of the Portfolio Value charged on daily pro-rata basis.
   - "Portfolio Value" means the aggregate amount of portfolio of investments including cash balance without netting off of leverage undertaken by the CDMDF.

c) Corporate debt securities to be bought by CDMDF during market dislocation include listed money market instruments. The long term rating of issuers shall be considered for the money market instruments. However, if there is no long term rating available for the same issuer, then based on credit rating mapping of CRAs between short term and long term ratings, the most conservative long term rating shall be taken for a given short term rating.

d) CDMDF shall follow the Fair Pricing document, while purchase of corporate debt securities during market dislocation as specified in provision no 16A. 1 of SEBI Master circular on Mutual Fund dated June 27, 2024 and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time.

CDMDF shall follow the loss waterfall accounting and guidelines w.r.t. purchase allocation and trade settlement of corporate debt securities bought by CDMDF, specified in provision no 16A. 1 of SEBI Master circular on Mutual Fund dated June 27, 2024 and circulars / guidelines/ Letters issued by SEBI and AMFI from time to time.

Stress Testing

SEBI has also mandated AMC to have stress testing policy for open ended debt schemes. AMCs shall carry out the stress testing on following parameters

1) Interest Rate Risk

2) Liquidity Risk and

3) Credit Risk

AMFI in consultation with SEBI has prescribed detailed methodology to assess the above-mentioned risks under stress situation. The stress test analysis report shall be presented to the investment committee for its review. In case of threshold continues beyond breach of cure period, the same shall be reported to AMC Board and Trustees along with the corrective action.

Placement of the scheme in one of the cells of PRC matrix does not reflect the scheme holdings pertaining to the perpetual bonds with respect to the Modified Duration and maturity thresholds specified in provision no. 17.5 of SEBI Master circular on Mutual Fund dated June 27, 2024, till the time such bonds are held by the scheme, for pre-existing holding of aforementioned perpetual bonds by debt schemes.

Indicative Table (Actual instrument / percentages may vary subject to applicable SEBI circulars):

Sr. No.	Type of Instrument	Percentage of Exposure	SEBI Master Circular on Mutual Fund dated June 27, 2024 Reference
1	Securities Lending	Not more than 20% of the net assets of the fund can be deployed in stock lending & not more than 5% of the net assets of the scheme will be deployed in stock lending through a single intermediary	Provision no. 12.11
2	Equity Derivatives for non-hedging Purposes	Use of derivatives for other purpose (excluding hedge position) will be restricted to 30% of the net assets of the Scheme.	Provision no. 12.25
3	Securitized Debt	The scheme may invest upto 50% of the scheme's new assets in domestic securitised debt.	Provision no. 12.15
4	Overseas Securities	Will not invest	Provision no. 12.19
5	ReITS and InVITS	A mutual fund may invest in the units of REITs and InvITs subject to the following: (a) No mutual fund under all its schemes shall own more than 10% of units issued by a single issuer of REIT and InvIT; and (b) The scheme shall not invest – i. more than 10% of its NAV in the units of REIT and InvIT; and ii. more than 5% of its NAV in the units of REIT and InvIT issued by a single issuer.	Provision no. 12.21 & clause no. 13 of Seventh Schedule of SEBI (MF) Regulation, 1996.
6	AT1 and AT2 Bonds	As mentioned above in asset allocation table.	Provision no. 12.2
7	Any other instrument a) Credit Default Swaps (CDS) b) Structured obligation and credit enhancements c) Repo / reverse repo in corporate debt securities	a) Will not invest. b) The investment of mutual fund schemes in the Structured obligation and credit enhancements shall not exceed 10% of the debt portfolio of the schemes and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the schemes. These limits would be as per limit specified by SEBI from time to time c) The Scheme may participate in repo in corporate debt securities. The gross exposure in repo in corporate debt securities will be restricted 10% of the net asset of the scheme.	a. Provision no. 12.24 b. Provision no. 12.3 c. Provision no. 12.18

Change in Investment Pattern/ Portfolio Rebalancing

Pursuant to provision no. 1.14.1.2.b of SEBI Master circular on Mutual Fund dated June 27, 2024, the tentative portfolio break-up mentioned above with minimum and maximum asset allocation can be altered for a short-term period on defensive considerations. In this event where the asset allocation falling outside the limits specified in the asset allocation table due to defensive considerations, the Scheme will rebalance the portfolio within thirty (30) calendar days.

Pursuant to provision no. 2.9 of SEBI Master circular on Mutual Fund dated June 27, 2024, in the event where the asset allocation is falling outside the limits specified in the asset allocation table due to passive breaches (occurrence of instances not arising out of omission and commission of AMC), the Scheme will rebalance the portfolio within thirty (30) business days. However, if market conditions do not permit the Fund Manager to rebalance the portfolio of the Scheme within the stipulated period of thirty (30) business days, justification in writing including details of efforts taken to rebalance the portfolio for the same shall be provided to the Investment Committee. The Investment Committee shall then decide on the course of action and if they so desires can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. Further, compliances relating to disclosures etc. shall be adhered in line with the said circular.

In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:

i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.

ii. not to levy exit load, if any, on the investors exiting such scheme.

AMC shall adhere to SEBI guidelines regarding the rebalancing of asset allocation norms as stipulated from time to time.

INVESTMENT STRATEGY

The scheme proposes to invest predominantly in floating interest rate securities, fixed interest rate securities swapped for floating rate returns. The scheme may also invest a part of the portfolio in fixed rate debt securities and money market instruments. The aim of the investment strategy will be to allocate the assets of the scheme between various fixed interest rate securities and floating interest rate securities and use derivatives like swaps and Forward Rate Agreements (FRA) effectively with the objective of achieving stable returns in the short as well as long term.

The security will be identified based on various parameters such as issuer's credit rating history, financial track record of the issuer, corporate governance track record of the issuer, liquidity of the security, maturity of the security, interest rate scenario etc.

Trading in Derivatives

Subject to SEBI (Mutual Fund) Regulations, 1996, the Scheme may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio.

The scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements / Interest Rate Futures, Interest Rate Options or such other derivative instruments as may be introduced from time to time and as may be permitted under the SEBI (Mutual Fund) Regulations.

The Scheme will comply with all the applicable circulars issued by SEBI as regard to derivatives like provision no. 7.5, 7.6, 12.25 of SEBI Master circular on Mutual Fund dated June 27, 2024.

All Limits/ Exposure / Norms specified in the Scheme Information Document (SID) are applicable at the time of Investments.

In line with provision no. 12.25 of SEBI Master circular on Mutual Fund dated June 27, 2024 exposure to derivative is subject to exposure limits given below:

1. The total exposure related to option premium paid shall not exceed 20% of the net assets of the scheme.

2. Cash or cash equivalents with residual maturity of less than 91 days will be treated as not creating any exposure.

3. Mutual funds are allowed to hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio, is as per the formula given below:

$$\frac{\text{(Portfolio Modified Duration*Market Value of the Portfolio)}}{\text{(Futures Modified Duration*Futures Price/PAR)}}$$

In case the IRF used for hedging the interest rate risk has different underlying security(s) than the existing position being hedged, it would result in imperfect hedging.

5. Mutual Funds are permitted to resort to imperfect hedging, without it being considered under the gross exposure limits, if and only if, the correlation between the portfolio or part of the portfolio (excluding the hedged portions, if any) and the IRF is atleast 0.9 at the time of initiation of hedge. In case of any subsequent deviation from the correlation criteria, the same may be rebalanced within 5 working days and if not rebalanced within the timeline, the derivative positions created for hedging shall be considered under the gross exposure. The correlation should be calculated for a period of last 90 days.

   The portion of imperfect hedging in excess of 20% of the net assets of the scheme should be considered as creating exposure and shall be included in the computation of gross exposure.

6. The Mutual Fund may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions shall be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases shall not exceed the value of respective existing assets being hedged by the scheme.

7. Exposure to a single counterparty in such transactions shall not exceed 10% of the net assets of the scheme.

8. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the above mentioned limits.

Definition of Exposure in case of Derivative Positions

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price*Lot Size*Number of Contracts
Short Future	Futures Price*Lot Size* Number of Contracts
Option Bought	Option Premium Paid*Lot Size* Number of Contracts.

ILLUSTRATION OF INTEREST RATE DERIVATIVES

Interest Rate Swaps (IRS): An Interest Rate Swap is an agreement whereby two parties agree to exchange periodic interest payments. The amount of interest payments exchanged is based on some predetermined principal, called notional principal amount. The amount each counterparty pays to the other upon periodic interest rate multiplied by the notional principal amount. The only amount that is exchanged between the parties is the interest payment, not the notional principal amount.

Example A: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is bearish and call rates are likely to spurt over the next three months. The fund manager would therefore prefer to pay fixed rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days floating interest rate from overnight fixed rate.

1. Say Notional Amount: Rs. 2 crores
2. Benchmark: NSE MIBOR
3. Tenor: 91 Days
4. Fixed Rate: 9.90%
5. At the end of 91 days;
6. The Scheme pays: fixed rates for 91 days is 9.90%
7. TMF receives: compounded call rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. 2, 00, 00,000 x 0.35% x91 / 365 = 17,452. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

The Schemes of the fund are in cash, and the view of the fund manager is interest rates are expected to move down due to certain positive events which have occurred. In such cases the Schemes can enter into a received position (IRS) where the Schemes will receive a fixed rate for a specified maturity and pay the floating rate of interest. This is illustrated below.

Example B: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is soft and call rates are unlikely to spurt over the next three months. The fund manager would therefore prefer to receive a higher rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days fixed interest rate from overnight floating rate.

1. Say Notional Amount : Rs. 2 crores
2. Benchmark : NSE MIBOR
3. Tenor : 91 Days
4. Fixed Rate: 10.25%
5. At the end of 91 days;
6. The Scheme pays: compounded call rates for 91 days is 9.90%
7. TMF receives : Fixed rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. 2,00,00,000 x 0.35% x91 / 365 = 17,452. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

Forward Rate Agreements (FRA):

This is an agreement between two counterparties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date based on the notional amount, for an agreed period. .In short , in a FRA , interest rate is fixed now for a future period.

This is illustrated below:

Assume that on April 1, 2023, the 30-day commercial paper (CP) rate is 7.75% and the Scheme has an investment in a CP of face value Rs. 50 crores, which is going to mature on April 30, 2023. If the interest rates are likely to remain stable or decline after April 30, 2023, and if the fund manager, who wants to re-deploy the maturity proceeds for 1 more month, does not want to take the risk of interest rates going down, he can then enter into a following forward rate agreement (FRA) say as on April 30, 2023:

He can receive 1 X 2 FRA on April 30, 2023 at 7.75% (FRA rate for 1 month lending in 2 months time) on the notional amount of Rs.50 crores, with a reference rate of 30 day CP benchmark. If the CP benchmark on the settlement date i.e. April 30, 2023 falls to 7.50%, then the Scheme receives the difference 7.75 - 7.50 i.e. 25 basis points on the notional amount Rs. 50 crores for 1 month. The maturity proceeds are then reinvested at say 7.50% (close to the benchmark). The scheme, however, would have locked in the rate prevailing on April 30, 2023 (7.75%) as it would have received 25 basis points more as settlement amount from FRA. Thus the fund manager can use FRA to mitigate the reinvestment risk.

In this example, if the rates move up by 25 basis points to 8% on the settlement date (April 30, 2023), the Scheme loses 25 basis points but since the reinvestment will then happen at 8%, effective returns for the Scheme is unchanged at 7.75%, which is the prevailing rate on April 30, 2023.

Interest Rate Future (IRF)

An interest rate future is a (a futures contract) with an interest-bearing instrument as the underlying asset. Interest rate futures are used when there is an expectation of interest rate movement in adverse direction.

For example, if fund manager expects rise in interest rate. He may sell interest rate future today. If interest rates rise in the future, the value of the future will fall (as it is linked to the underlying asset, bond prices), and hence a profit can be made when closing out of the future (i.e. buying the future). However, in case interest rate falls, loss may be incurred on IRF position.

Illustration of Use of IRF (For Hedging)

A – Perfect Hedge

1) Assume a portfolio has 100 crores of Government security 7.59% GOI 2026 with face value Rs. 100/. The bond is currently trading in market at 105.00.
2) The futures on 7.59% GOI 2026, expiring on 27th October 2016 is trading on exchange at 105.10.
3) Instead of exiting the cash position, the fund manager can decide to hedge the position by selling the same quantity in futures. Since one contract of IRF has a notional of 2 lacs, in this example the fund manager sells 100 crs/2 lakhs = 5000 contracts, to hedge long position.
4) At maturity, the settlement price of the futures will be almost same as closing price of the underlying security.

   At maturity of the Interest Rate Futures

   Case 1: At expiry Bonds close higher than the price at which fund manager hedged the position, but below the futures price at which he hedged

   Closing price of Bonds on day of maturity of futures = 105.05

   Settlement price of futures = 105.05

   MTM gain on the underlying bond = (105.05-105.00) * 100 crs / 100 (i.e. face value of bond) = Rs. 5,00,000

   The profit on the futures leg is = 5000*2lacs *(105.10-105.05)/ 100 (i.e. face value of bond) = Rs 5,00,000

   Overall profit to the fund = Rs 10,00,000

   Case 2: At maturity bonds close higher than the level at which futures were sold

   In case, the closing price of bonds on the day of maturity of futures = 105.20,

   Settlement price of futures = 105.20

The MTM gain on underlying bond = (105.20-105.00) * 100 crs /100 (i.e. face value of bond) = Rs. 20,00,000

Loss on futures leg is = 5000*2 lacs * (105.10-105.20) /100 (i.e. face value of bond) = - Rs 10,00,000

Total Profit to the fund = Rs 10,00,000

As can be seen above, by selling the future contract instead of the underlying, the fund manager has locked in the Rs. 10, 00,000 profit and at the same time cash holding position will be hedged against the adverse market movements.

B-Illustration of Use of IRF (For Imperfect Hedging)

Assume the portfolio of market value worth INR 1000 crore has a modified duration of 5. This is being hedged with an IRF that has a modified duration of 10. Considering that fund manager choose to hedge 20% of the portfolio the maximum extent of short position that may be taken in IRF is as below:

(Portfolio Modified Duration*Market Value of the Portfolio)

(Futures Modified Duration*Futures Price/PAR)

(5*(0.2*1000))
= --------------------
(10*(101/100)

=Rs.99.01 Crores.

Hence the scheme can sell IRFs worth Rs.99.01 Crores and with duration of 10 to hedge Rs.200 Crores of portfolio with a duration of 5.

Position Limits for IRF Contracts:

Scheme Level: The gross open positions across all contracts shall not exceed 3 % of the total open interest or INR 200 crores- whichever is higher.

Mutual Fund: The gross open positions across all contracts shall not exceed 10 % of the total open interest or INR 600 crores- whichever is higher.

Interest Rate Option (IRO)

Call Options

When someone buys an interest rate call option, they are buying the right to buy the option at a set price. Therefore, if someone buys a call option, he will profit if interest rates rise.

Call Example

Assume that interest rates are at 5 percent. An investor thinks they will rise in the next 12 months, so he buys a Rs.100 call option for Rs.5. A year goes by, and interest rates have risen to 10 percent. He can now buy the asset--now worth Rs.110--for Rs.100.

Put Options

Put options are the opposite of call options. These options allow an investor to sell the option at a set price at a set time. This means the investor will profit from falling interest rates.

Put Example

Assume that interest rates are now at 10 percent. The investor in the above example believes these rates are unsustainably high, so he buys a Rs.110 put option on his original Rs.100 option. The following year, interest rates fall back to 5 percent, so the Rs.100 only earned Rs.5 in interest. However, the investor can sell for Rs.110, thus making Rs.5 off an interest rate decline.

The investment policies mentioned in this SID are in conformity with the provisions of various constitutional documents viz. MOA/ AOA of the TAMPL/Trustee Company, IMA and the Trust Deed. Moneys collected under these Schemes shall be invested only in transferable securities.

For detailed derivative strategies, kindly refer SAI.

RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Scheme Specific Risk Factors:

Risk Factors for investing in floating rate instruments including fixed rate instruments converted to floating rate exposures using swaps/ derivatives

1. Basis Risk (Interest Rate Movement): During the life of floating rate security or a swap the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. This type of events may result in loss of value in the portfolio.
2. Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. However, depending upon the market conditions the spreads may move adversely or favourably leading to fluctuation in NAV.
3. In case of downward movement of interest rates, floating rate debt instruments may l give a lower return than fixed rate debt instruments.

Liquidity and Settlement Risks:

The liquidity of the Scheme investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain securities of certain companies, industries, sectors, etc. based on certain investment parameters as adopted internally by TAMPL. While at all times the Asset Management Company will endeavour that excessive holding/investment in certain securities of industries, sectors, etc. by the Scheme is avoided, the funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio. Furthermore, from time to time, the Asset Management Company, the Custodian, the Registrar, any Associate, any Distributor, Dealer, any Company, Corporate Bodies, Trusts, any Retirement and Employee Benefit Funds or any Associate or otherwise, any scheme / mutual fund managed by the Asset Management Company or by any other Asset Management Company may invest in the Scheme. While at all times the Trustee Company and the Asset Management Company will endeavour that excessive holding of Units in the Scheme among a few Unitholders is avoided, however, the funds invested by these aforesaid persons may acquire a substantial portion of the Scheme's outstanding Units and collectively may constitute a majority unitholder in the Scheme. Redemption of Units held by such persons may have an adverse impact on the value of the Units of the Scheme because of the timing of any such redemptions and this may impact the ability of other Unitholders to redeem their respective Units.

Investment Risks:

The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme's investment objective will be attained or that the Scheme be in a position to maintain the model percentage of investment pattern particularly under exceptional circumstances.

Different types of securities in which the scheme would invest in, as mention in this SID, carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated. Zero coupon bonds carry an additional risk, unlike bonds that pay interest throughout the period to maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity. If the issuer defaults, the Scheme may not obtain any return on its investment.

The scheme may use techniques and instruments for efficient portfolio management and to attempt to hedge or reduce the risk of such fluctuations. However these techniques and instruments if imperfectly used have the risk of the scheme incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any). The use of these techniques is dependent on the ability to predict movements in the prices of securities being hedged and movements in interest rates. There exists an imperfect correlation between the hedging instruments and the securities or market sectors being hedged. Besides, the fact that skills needed to use these instruments are different from those needed to select the Fund's / Scheme's securities. There is a possible absence of a liquid market for any particular instrument at any particular time even though the futures and options may be bought and sold on an organised exchange. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase / redemption requests or other short-term obligations because of the percentage of the Scheme's assets segregated to cover its obligations.

Securitised Debt:

Securitized Debt such as Mortgage Backed Securities ("MBS") or Asset Backed Securities ("ABS") is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. Asset Securitization is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitization involves sale of specific receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company.

The SPV in turn issues financial instruments (promissory notes, participation certificates or other debt instruments) also referred to as "Securitized Debt" to the investors evidencing the beneficial ownership of the investors in the receivables. The financial instruments are rated by an independent credit rating agency.

Risks Associated with Securitised Debt

Risk due to prepayment: In case of securitized debt, changes in market interest rates and pre-payments may not change the absolute amount of receivables for the investors but may have an impact on the reinvestment of the periodic cash flows that an investor receives on securitized papers. In the event of pre-payment of the underlying debt, investors may be exposed to changes in tenor and yield.

Liquidity Risk: Presently, despite recent legal developments permitting the listing of securitized debt instruments, the secondary market for securitized debt in India is not very liquid. Even if a more liquid market develops in the future, secondary transactions in such instruments may be at a discount to initial issue price due to changes in the interest rate structure.

Limited Recourse and Credit Risk: Certificates issued on investment in securitized debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors and thereby, adversely affect the NAV of the Scheme. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low.

Bankruptcy Risk: If the originator of securitized debt instruments in which the Scheme invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', then the Scheme could experience losses or delays in the payments due. Normally, care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'.

Risk of Co-mingling: Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the Servicer fails to remit such funds due to investors, investors in the Scheme may be exposed to a potential loss.

Risk Controls for Securitised Debt:

1. Risk profile of securitized debt vis a vis risk appetite of the scheme:

Securitized Debt is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. In line with the investment strategy of the Scheme and considering that there would be no intermediate redemption pressures for the Fund Manager, the Scheme may take exposure to rated Securitized Debt with the intent to enhance portfolio yield without compromising on credit quality.

2. Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc.

The evaluation parameters of the originators are as under:

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:

- Outlook for the economy (domestic and global)

- Outlook for the industry

- Company specific factors

Track record

We ensure that there is adequate past track record of the Originator before selection of the pool including a detailed look at the number of issuances in past, track record of issuances, experience of issuance team, etc. We also look at the credit profile of the Originator for its own debt. We normally invest only if the Originator's credit rating is at least 'AA' (+/- or equivalent) or above by a credit rating agency recognized by SEBI.

Willingness to pay

As the securitized structure has underlying collateral structure, depending on the asset class, historical NPA trend and other pool / loan characteristics, a credit enhancement in the form of cash collateral, such as fixed deposit, bank guarantee etc. is obtained, as a risk mitigation measure.

Ability to pay

This assessment is based on a detailed financial risk assessment.

A traditional SWOT analysis is used for identifying company specific financial risks. One of the most important factors for assessment is the quality of management based on its past track record and feedback from market participants. In order to assess financial risk a broad assessment of the issuer's financial statements is undertaken to review its ability to undergo stress on cash flows and asset quality.

Business risk assessment, wherein following factors are considered:

- Outlook for the economy (domestic and global)
- Outlook for the industry
- Company specific factors

In addition, a detailed review and assessment of rating rationale is done including interactions with the company as well as agency.

Typically, we would avoid investing in securitization transaction (without specific risk mitigant strategies / additional cash/security collaterals/ guarantees) if we have concerns on the following issues regarding the originator / underlying issuer:

- High default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios - both on a standalone basis as well on a fated level/ group level. This is very important in case of single borrower loan sell down
- Higher proportion of re-schedulement of underlying assets of the pool or loan
- Higher proportion of overdue assets of the pool or the underlying loan
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan

3. Risk mitigation strategies for investments with each kind of originator

Risk Mitigation Strategies

Investments in securitized debt will be done based on the assessment of the originator which is carried out by the Fixed Income team based on the in-house research capabilities as well as the inputs from the independent credit rating agencies.

In order to mitigate the risk at the issuer/originator level, the Fixed Income team will consider various factors which will include:

- size and reach of the originator
- the infrastructure and follow-up mechanism
- quality of information disseminated by the issuer/originator; and
- the Credit enhancement for different type of issuer/originator
- the originator's track record in that line of business

4. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

Majority of securitized debt investments shall be in asset backed pools wherein the underlying assets could be Medium and Heavy Commercial Vehicles, Light Commercial Vehicles (LCV), Cars, and Construction Equipment, Mortgages etc.

The Fund Manager will invest in securitized debt which are rated 'AA' (+/- or equivalent) or above by a credit rating agency recognized by SEBI. While the risks mentioned above cannot be eliminated completely, they may be minimized by considering the diversification of the underlying assets as well as credit and liquidity enhancements.

Table 1: illustrates the framework that will be applied while evaluating investment decision relating to a pool securitization transaction:

Characteristics/ Type of Pool	Mortgage Loan	Commercial Vehicle and Construction Equipment	CAR	2 wheelers	Micro Finance Pools	Personal Loans	Single Sell Downs	Others
Approximate Average maturity (in Months)	Up to 120 months	Up to 60 months	Up to 60 months	Up to 60 months	Up to 12 months	Up to 36 months	Case by case basis	Any other class of securitized debt would be evaluated on a case by case basis
Collateral margin (including cash, guarantees, excess interest spread, subordinate tranche)	In excess of 3%	In excess of 5%	In excess of 5%	In excess of 5%	In excess of 10%	In excess of 10%	Case by case basis	
Average Loan to Value Ratio	95% or lower	100% or lower*	95% or lower	95% or lower	Unsecured	Unsecured	Case by case basis	
Average seasoning of the Pool	Minimum 3 months	Minimum 6 months	Minimum 6 months	Minimum 6 months	Minimum 1 month	Minimum 2 months	Case by case basis	
Maximum single exposure range	5%	5%	1%	1%	<1%	<1%	Case by case basis	
Average single exposure range %	<5%	<5%	<1%	<1%	<1%	<1%	Case by case basis	

* LTV based on chasis value

Note: The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

In addition to the framework as per the table above, we also take into account following factors, which are analyzed to ensure diversification of risk and measures identified for less diversified investments:

- Size of the loan: The size of each loan is generally analyzed on a sample basis and an analysis of the static pool of the originator is undertaken to ensure that the same matches with the static pool characteristics. It also indicates whether there is high reliance on very small ticket size borrower which could result in delayed and expensive recoveries.
- Average original maturity of the pool: The analysis of average maturity of the pool is undertaken to evaluate whether the tenor of the loans are generally in line with the average loans in the respective industry and repayment capacity of the borrower.
- Default rate distribution: The Fixed Income team generally ensures that all the contracts in the pool are current to ensure zero default rate distribution.
- Geographical Distribution: The analysis of geographical distribution of the pool is undertaken to ensure prevention of concentration risk.
- Risk Tranching: Typically, we avoid investing in Securitized debt in the form of sub ordinate tranche, without specific risk mitigant strategies / additional cash / security collaterals/ guarantees, etc.
- Credit enhancement facility - credit enhancement facilities in the form of cash collateral, such as fixed deposits, bank guarantee etc. could be obtained as a risk mitigation measure.
- Liquid facility - these parameters will be evaluated based on the asset class as mentioned in the table above
- Structure of the pool of underlying assets - The structure of the pool of underlying assets would be either single asset class or combination of various asset classes as mentioned in the table above. We could add new asset class depending upon the securitization structure and changes in market acceptability of asset classes.

Investment in the Single Loan Securitization would be done based on the assessment of credit risk associated with the underlying borrower as well as the originator. The Fixed Income team will adhere internal credit process and perform a detailed review of the underlying borrower prior to making investments.

5. Minimum retention period of the debt by originator prior to securitization

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements. In addition, RBI has proposed minimum holding period of between nine and twelve months for assets before they can be securitized. The minimum holding period depends on the tenor of the securitization transaction. The Fund will invest in securitized debt that are compliant with the laws and regulations.

6. Minimum retention percentage by originator of debts to be securitized

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements, including maximum exposure by the originator in the PTCs. In addition, RBI has proposed minimum retention requirement of between five and ten percent of the book value of the loans by the originator. The minimum retention requirement depends on the tenor and structure of the securitization transaction. The Fund will invest in securitized debt that are compliant with the laws and regulations

7. The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund

An investment by the scheme in any security is done after detailed analysis by the Fixed Income team and in accordance with the investment objectives and the asset allocation pattern of a scheme. All investments are made on an arm's length basis without consideration of any investments (existing/potential) in the schemes made by any party related/involved in the transaction. The robust credit process ensures that there is no conflict of interests when a scheme invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme. Normally the issuer who is securitizing instrument is in need of money and is unlikely to have long term surplus to invest in mutual fund scheme.

Furthermore, there is clear cut segregation of duties and responsibilities with respect to Investment function and Sales function. Investment decisions are being taken independently based on the above mentioned parameters and investment by the originator in the scheme is based on their own evaluation of the scheme vis a vis their investment objectives.

8. The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

The risk assessment process for securitized debt, as detailed in the preceding paragraphs, is same as any other credit. The investments in securitized debt are done after appropriate research by credit analyst. The ratings are monitored for any movement.

The resources for and mechanisms of individual risk assessment with the AMC for monitoring investment in securitized debt are as follows:

- Fixed Income Team - Risk assessment and monitoring of investment in Securitized Debt is done by a team comprising of Credit Team.
- Ratings are monitored for any movement - Based on the cash-flow report and analyst view, periodic review of utilization of credit enhancement shall be conducted and ratings shall be monitored accordingly.
- Wherever the schemes portfolio is disclosed, the AMC may give a comprehensive disclosure of Securitised debt instruments held in line with SEBI requirement.

Note: The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

Securities Lending by the Mutual Fund

The Scheme may participate in securities lending and borrowing scheme in accordance with Securities Lending Scheme, 1997, Regulation 44 (4) of SEBI (Mutual Funds) Regulations ,1996, provision no. 12.11 of SEBI Master circular on Mutual Fund dated June 27, 2024,framework for short selling and borrowing and lending of securities ,provision no. 12.11.2.1.a of SEBI Master circular on Mutual Fund dated June 27, 2024. The Scheme shall also follow other relevant regulations /guidelines issued by stock exchange(s) from time to time. The Scheme shall participate in Securities Borrowing and Lending only with the SEBI approved intermediaries.

Securities Lending means the lending of securities to SEBI approved intermediaries for a fixed period of time at a negotiated compensation in order to enhance returns of the scheme portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The AMC will adhere to the following strict internal limits should it engage in Securities Lending.

Not more than 20% of the net assets of the respective scheme can generally be deployed in securities. Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, and government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis.

Example:

A fund has a Non-Convertible Debenture (NCD) of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the NCD, from time to time if any, on the exchange. If the fund is enabled to lend the said security to a borrower who would be wanting to take advantage of the market fluctuations in its price, the borrower would return the security to the lender (scheme) at a stipulated time or on demand for a negotiated compensation. The fund's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost of the security. Thus, it is in the interest of the investors that returns can be enhanced by way of Securities lending rather than hold the security only for capital appreciation potential.

Thus the scenario under which the fund would participate in Securities lending would be:

1. There is a holding of security e.g. 5000 units of NCD's of XYZ Ltd in the fund which the fund manager wants to be the core holding of the scheme for approximately 6 to 12 months.
2. There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs XYZ Ltd NCD to settle it) who is willing to put up a proper collateral for the same.(In all cases higher than the price of the script).
3. The borrower is represented by a proper recognized intermediary.
4. The agreement is to return the security or the amount so negotiated at a particular period of time or on demand.

Then the security will be lent by the fund and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, securities lending would be done by the scheme only in the following circumstances:

a) If permitted by trustees and the extent SEBI regulations in that regard, from time to time.

b) If such activity generates additional returns for the scheme and helps to enhance the scheme returns.

c) If considering the above, and other factors all considered in totality, such activity is in the interest of unitholders in the scheme.

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honor its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there is also be temporary illiquidity of the securities that are lent out and the scheme will not be able to sell such lent out securities until they are returned.

As with other modes of extensions of credit, there are risks inherent to securities lending, including the risk of failure of the other party, in this case the approved intermediary, to comply with the terms of the agreement entered into between the lender of securities i.e. the scheme and the approved intermediary. Such failure can result in the possible loss of rights to the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary.

Interest Rate Risk

As with debt instruments, changes in interest rate may affect the Scheme's net asset value. Generally the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the schemes are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Counterparty Risk:

This is the risk of failure of counterparty to the transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the scheme in case of counterparty default.

Derivatives carry the risk of adverse changes in the market price. The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Although for exchange traded derivatives, the risk is mitigated as the exchange provides the guaranteed settlement however in OTC trades the possibility of settlement is limited.

Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

Risk factors for Structured Obligation and Credit Enhancement:

The risk of investing in structured obligation is similar to risks associated with fixed income instruments. However, they carry following additional risks:

- Liquidity Risk: Typically the liquidity of structured obligations could be lower as compared to debt securities as the market for structured products is not very deep. Hence, they may carry higher liquidity risk.
- Default Risk: In case of default from this portfolio, there could be limited recourse available for recovery subject to the specific transaction terms and dependent on the legal terms. Hence they could carry higher default risk.
- Credit enhancements are specified by Credit Rating Agencies. However, the credit enhancement stipulated in a securitization transaction represents a limited loss cover only.
- Counterparty risk associated with credit enhancement: Credit enhancement can be provided by guarantee or cash collateral. For instance in case of guarantee, the investors are exposed to the credit quality risk of corporate entity providing the guarantee. Similarly, if the cash collateral is the fixed deposit of a financial institution, the investor is exposed to the credit risk associated with that financial institution.

Risk associated with Transaction in Units through Stock Exchange

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard.

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".

Risks associated with exposure to Floating Rate Instruments

The scheme has exposure to floating rate instruments and / or interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments

Risks associated with Segregated Portfolio

- Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer. Security comprises of segregated portfolio may not realise any value.
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risk associated with investing in Repo of Corporate Bond Securities

To the extent the scheme invests in Repo of Corporate Bond Securities, the scheme will be subject to following risks –

- Corporate Bond Repo will be subject to counter party risk.
- The Scheme will be exposed to credit risk on the underlying collateral– downward migration of rating. The scheme may impose adequate haircut on the collateral to cushion against any diminution in the value of the collateral. Collateral will require to be rated AA and above rated where potential for downgrade/default is low. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.
- Liquidity of collateral: In the event of default by the counterparty, the scheme would have recourse to recover its investments by selling the collateral in the market. If the underlying collateral is illiquid, then the Mutual Fund may incur an impact cost at the time of sale (lower price realization).

Risks associated with Imperfect Hedging using Interest Rate Futures (IRF)

Liquidity/execution risk – IRF are relatively new instruments traded on the exchanges and don't have as much liquidity as the OTC market in the underlying bond. This could expose the hedge to liquidity (execution and wider bid-offer spread) risk and associated impact cost.

Spread risk – The IRF is based on government securities and treasury bills. Imperfect hedging can be applied on portfolios comprised of corporate bonds as well. Corporate bond yield theoretically comprises of the risk free rate and a credit spread. IRF would hedge out only the risk free rate. Any compression/expansion of credit spread of the underlying portfolio would not be hedged by the IRF.

Yield curve slope risk – The IRF hedge is done on a modified duration basis. This means that the maturity of the underlying instrument and the maturity of the IRF could be different. The hedge ratio is arrived at using the prescribed formula. This hedges the risk arising from a parallel shift in the yield curve. Any change in the slope of the yield curve (flattening/steepening) remains unhedged as residual risk.

Unwinding risk— An unexpected change in market conditions may require unwinding the derivative positions at disadvantageous prices during periods of heightened volatility e.g. if the yields slide lower due to a surprise RBI rate cut, participants with short Interest Rate Futures positions would seek to cut their losses and exit, leading to an increase in the price of the IRF, and negative price impact on the hedged portfolio there from.

Correlation risk – As per the extant regulation, the IRF has to have a 0.90 correlation coefficient with the underlying bond/portfolio, for the past 90 days, to be considered for imperfect hedging. If the correlation deteriorates going forward, the hedge may have to be rebalanced with attendant impact costs.

Risk Factors Associated with Investments in REITs and InvITS:

Market Risk: REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. AMC/Fund Manager's will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.

Liquidity Risk: As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.

Reinvestment Risk: Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.

Regulatory/Legal Risk: REITs and InvITs being new asset classes, rights of unit holders such as right to information etc may differ from existing capital market asset classes under Indian Law.

Risks associated with investment in units of domestic mutual fund:

Investment in Mutual Fund Units involves investment risks, including but not limited to risks such as liquidity risk, volatility risk, default risk including the possible loss of principal.

Liquidity risk – The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the right to limit redemptions will be in accordance with provision no. 1.12 of SEBI Master circular on Mutual Fund dated June 27, 2024.

Volatility risks: There is the risk of volatility in markets due to external factors like liquidity flows, changes in the business environment, economic policy etc. The scheme will manage volatility risk through diversification across companies and sectors.

Default risk - Credit risk is risk resulting from uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest. Government Securities have zero credit risk while other debt instruments are rated according to the issuer's ability to meet the obligations.

Credit Evaluation Process for the investments in Debt Securities

In-house credit evaluation team has the necessary capability of conducting independent due diligences of credit risk. From credit evaluation perspective, companies are broadly classified under two sectors - Industrials and Financial Institutions. Industrials include Manufacturing and trading companies, while Financial Institutions include Banks and Non-Banking Financial Companies (NBFCs). The set of parameters for evaluation of credits for these sectors are different.

Broad guidelines for the appraisal of Industrials for short-term and long-term exposure include, but are not restricted to:

- External Ratings threshold: Investment is made only if the issuer credit rating is at least 'investment grade' (BBB- or above) for Long-term debt by a credit rating agency recognized by SEBI. In the short-term, investment is made in top notch (A1+ or equivalent) rated debt instruments. However this is subject to review from time to time and investment committee / Board of AMC approval is required for any exception.
- Each company is internally appraised based on various parameters including, but not restricted to:

o Business Fundamentals: Product/Service offerings, Market Position, Competitive Landscape, and Product cycle etc.

o Regulatory environment: Support/intervention, developmental stage of industry, level of regulation

o Financial Analysis: Margins, Profitability, Leverage, Working Capital requirement and cycle, Cash-flows etc. This is also seen in light of historic trend

o Management Track Record: Management track record, performance of company through economic cycle, promoters' background, other group companies.

o Macro-Economic Environment: Economic cycle, Credit cycle

In the short-term, the focus is more on the working capital cycle, near-term cash-flows and existing business position, while in the long-term the focus is more on the outlook of the business, capital expenditure program, profitability etc.

The credit evaluation policy is subject to review from time to time. Any material change in the credit evaluation policy will be updated by way of an addendum to the scheme information document.

The asset allocation among the various debt securities will be decided based upon the prevailing market conditions, macroeconomic environment and the performance of corporate sector, the debt market and other considerations.

Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the scheme to better generate liquidity during market dislocation to help the scheme fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

Investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Investors are requested to read the detailed disclosure on investment of the schemes in the CDMDF as listed in Part II sub- section "A. How will the Scheme allocate its assets? and Section II Sub-section II Information about the scheme. Clause A Where will the Scheme Invest".

For details on risk factors and risk mitigation measures, please refer SID.

PLANS AND OPTIONS

The Scheme has the following Plans across a common portfolio:

Regular Plan: This Plan is for investors who wish to route their investment through any distributor.

Direct Plan: This Plan is only for investors who purchase /subscribe units in a scheme directly with the Fund and is not available for investors who route their investments through a Distributor.

Regular Plan (For applications routed through Distributors):

The Scheme has following options:

- Growth Option
- Monthly Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Monthly Payout)
- Quarterly Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Quarterly Payout)
- Periodic Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Periodic Payout)
- Monthly Reinvestment of Income Distribution Cum Capital Withdrawal option (IDCW-Monthly Reinvestment)
- Quarterly Reinvestment of Income Distribution Cum Capital Withdrawal option (IDCW- Quarterly Reinvestment)
- Periodic Reinvestment of Income Distribution Cum Capital Withdrawal Option (IDCW-Periodic Reinvestment)

Direct Plan (For applications not routed through Distributors)

The Scheme has following options:

- Growth Option
- Monthly Payout of Income Distribution Cum Capital Withdrawal Option(IDCW-Monthly Payout)
- Quarterly Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Quarterly Payout)
- Periodic Payout of Income Distribution Cum Capital Withdrawal Option (IDCW-Periodic Payout)
- Monthly Reinvestment of Income Distribution Cum Capital Withdrawal Option (IDCW-Monthly Reinvestment)
- Quarterly Reinvestment of Income Distribution Cum Capital Withdrawal Option (IDCW- Quarterly Reinvestment)
- Periodic Reinvestment of Income Distribution Cum Capital Withdrawal Option(IDCW-Periodic Reinvestment)

Monthly Payout of Income Distribution Cum Capital Withdrawal (IDCW-Monthly Payout) Option will be default frequency.

Compulsory Reinvestment of Income Distribution cum capital withdrawal:

In order to reduce the expenses of the scheme and also for the convenience of the investors ,the income distribution cum capital withdrawal shall be compulsorily reinvested (for investors of non-electronic mode) within the scheme at the applicable ex-dividend NAV if income distribution cum capital withdrawal amount is Rs.100 or less , in the same option of the respective plans of the scheme at the ex- dividend rate.

Investor shall note that when units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains shall be credited to an Equalization Reserve Account and which can be used to pay income distribution. Hence income distribution amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

Please note that the income distribution cum capital withdrawal amount shall be distributed at the discretion of the Trustees subject to the availability of distributable surplus.

Investors subscribing under Direct Plan of a Scheme will have to indicate "Direct Plan" against the scheme name in the application form e.g. "Tata Floating Rate Fund".

Default Option: Investor should appropriately tick the 'option' Growth or Payout of Income Distribution cum capital withdrawal option , Reinvestment of Income Distribution cum capital withdrawal option in the application form while investing in the Scheme. If no option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Direct Plan- Growth Option. If no income distribution cum capital withdrawal IDCW)l sub-option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Monthly Reinvestment of Income Distribution cum capital withdrawal option(IDCW-Monthly Reinvestment).

Default Plan: Investors are requested to note the following scenarios for the applicability of "Direct Plan (application not routed through distributor) or Regular Plan (application routed through distributor)" for valid applications received under the scheme:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct Plan	Direct Plan
3	Not mentioned	Regular Plan	Direct Plan
4	Mentioned	Direct Plan	Direct Plan
5	Direct Plan	Not Mentioned	Direct Plan
6	Direct Plan	Regular Plan	Direct Plan
7	Mentioned	Regular Plan	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load..

For detailed disclosure on default plans and options, kindly refer SAI.

APPLICABLE NAV (after the scheme opens for subscriptions and redemptions)

Applicable NAV for Subscription / Switch-in: Cut Off Timing 3.00 pm

Particulars	Applicable NAV
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the scheme before the cut-off time.	The closing NAV of the same day.
Valid applications received (time-stamped) after 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme either on the same day or before the cut-off time of the next Business Day i.e. available for utilization before the cut-off time of the next Business Day.	The closing NAV of the next Business Day.
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme after the cut-off time on the same day i.e. available for utilization after the cut-off time of the Day.	The closing NAV of the next Business Day.
Where the application is time stamped any day before the credit of the funds to the scheme but the funds for the entire amount are credited to the bank account of the scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on such subsequent Business Day.	The closing NAV of such subsequent Business Day on which funds are available for utilisation.

In case application is time stamped after cut off timing on any day, the same will be considered as deemed to be received on the next business day.

In case funds are realised after cut-off timing on any day, the same will be considered as deemed to be realised /available for utilisation on the next business day.

For Switch-ins including Systematic Investment Plan (SIP), Systematic Transfer Plan (STP) of any amount:

For determining the applicable NAV, the following shall be ensured:

- Application for switch-in is received before the applicable cut-off time.
- Funds for the entire amount of subscription / purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time, and the funds are available for utilization before the cut-off time.
- In case of switch/STP transactions, funds will be made available for utilization in the switch-in-scheme based on the redemption payout cycle of the switch out scheme.

For investments through systematic investment routes such as Systematic Investment Plans (SIP), Systematic Transfer Plans (STP), IDCW Transfer Plan (DTP), etc. the units will be allotted as per the closing NAV of the day on which the funds are available for utilization by the Target Scheme irrespective of the installment date of the SIP, STP or record date of income distribution cum capital withdrawal etc.

Redemption /Switch Out: In respect of application received upto 3 p.m., closing NAV of the day of receipt of application shall be applicable and in respect of application received after 3 p.m. closing NAV of next business day.

Outstation cheques/demand drafts will not be accepted.

Valid application for "switch out" shall be treated as redemption and for "switch in" shall be treated as purchases and the relevant NAV of "Switch in" and "Switch Out" shall be applicable accordingly.

MINIMUM APPLICATION AMOUNT / NUMBER OF UNITS UNDER EACH PLAN

Purchase: Minimum subscription amount for the scheme: Rs 5,000/- and in multiple of Re.1/- thereafter

Additional Purchase: Rs.1000/-& in multiples of Re.1/-threafter.

Redemption: Redemption request can be made for a minimum of Rs.500/50 units or folio balance whichever is lower.

There is no minimum amount requirement, in case of investors opting to switch "all units" from any existing schemes of Tata Mutual Fund to this Scheme.

Non applicability Minimum Application Amount (Lump-sum) and Minimum Redemption amount

SEBI vide its provision no. 6.10 of SEBI Master circular on Mutual Fund dated June 27, 2024 (Alignment of interest of Designated Employees of Asset Management Companies (AMCs) with the Unitholders of the Mutual Fund Schemes) has mandated that a minimum of 20% of gross annual CTC net of income tax and any statutory contributions of the Designated Employees of the AMCs shall be invested in units of the scheme(s) of the Fund in which they have a role/oversight. However, for key employees below 35 yrs of age the implementation of this rule shall be in a phased manner i.e. 10% in the first year (Oct 01 2021 to Sept 30 2022), 15% in the second year (Oct 01 2022 to Sept 30 2023) & 20% w.e.f Oct 01 2023.

In accordance with the regulatory requirement, the minimum application amount and minimum redemption amount wherever specified in the SID will not be applicable for investment made in schemes of the Fund in compliance with the sebi circular.

DESPATCH OF REDEMPTION REQUEST

Under normal circumstances the AMC shall make the payment of redemption proceeds within three working days from the date of redemption or repurchase, subject to exceptional circumstances as mentioned in this document. In case of failure to dispatch, Interest for the period of delay shall be payable to unitholders at the rate of 15% per annum alongwith redemption or repurchase proceeds.

BENCHMARK INDEX

CRISIL Short Duration Debt A-II Index

DIVIDEND POLICY

Income Distribution cum Capital Withdrawal Policy

Growth Option:

The income / profits received / earned would be accumulated by the Fund as capital accretion, aimed at achieving capital growth and reflected in the NAV.

Payout of Income Distribution cum capital withdrawal option

The profits received / earned and so retained and reinvested may be distributed as Income at appropriate rates (after providing for all relevant ongoing expenses, etc.) and at appropriate intervals as may be decided by the AMC and/or Trustee Company. It will be distributed to the unitholders who hold the units on the record date of declaration of the Income.

Investor shall note that when units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains shall be credited to an Equalization Reserve Account and which can be used to pay income distribution. Hence income distribution amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

Please note that the income distribution and its frequency is subject to availability of distributable surplus and at the discretion of the trustees

The Fund does not assure any targeted annual return / income nor any capitalisation ratio. Accumulation of earnings and the consequent determination of NAV, may be suspended temporarily or indefinitely under any of the circumstances as stated in the clause "Suspension of Ongoing Sale, repurchase or Switch out of units".

Reinvestment of Income Distribution cum capital withdrawal option:

Unitholders under this option also have the facility of reinvestment of the income so declared, if so desired. The income declared would be reinvested in the scheme on the immediately following ex-dividend date.

Compulsory Reinvestment of Income Distribution cum capital withdrawal option:

In order to reduce the expenses of the scheme and also for the convenience of the investors/-, the income distribution cum capital withdrawal amount shall be compulsorily reinvested (for investors of non-electronic mode) within the scheme at the applicable ex-dividend NAV if income distribution cum capital withdrawal amount is Rs.100 or less, in the same option of the respective plans of the scheme at the ex- dividend rate.

ADDITIONAL SCHEME RELATED DISCLOSURES

1. Scheme's portfolio holdings (top 10 holdings by issuer and fund allocation towards various sectors to be provided through a functional website link - https://www.tatamutualfund.com/statutory-disclosures/other-statutory-disclosures)

2. Disclosure of name and exposure to Top 7 issuers, stocks, groups and sectors as a percentage of NAV of the scheme in case of debt and equity ETFs/index funds through a functional website link - https://www.tatamutualfund.com/statutory-disclosures/other-statutory-disclosures)

3. Portfolio Turnover Ratio: 1.24 times as on 31-03-2025 (for 13 months).

EXPENSES OF THE SCHEME

Load Structure

Continuous Offer

Entry Load: N.A.

Exit Load: NIL

Pursuant to AMFI's communication dated 09th April 2025, Exit Load will not be charged on any Switch/Systematic transfer transaction from Regular plan to Direct plan of the same scheme w.e.f. 23rd April 2025.

Slab wise break up depending on the assets under management:

As per provision no. 52.6.c of SEBI (Mutual Funds) Regulations, 1996 the total expense ratio of open-ended scheme shall not exceed the following limits. The AMC has estimated that upto 2.00 % (excluding additional permissible limits as per Regulation 52(6A)(b) & 52(6A)(c)) of the daily average net assets of the scheme will be charged to the scheme as expenses.

Assets under management Slab (In Rs. crore)	Total expense ratio limits for equity-oriented schemes	Total expense ratio limits for other than equity-oriented schemes
On the first Rs.500 crores of the daily net assets	2.25%	2.00%
On the next Rs.250 crores of the daily net assets	2.00%	1.75%
On the next Rs.1,250 crores of the daily net assets	1.75%	1.50%
On the next Rs.3,000 crores of the daily net assets	1.60%	1.35
On the next Rs.5,000 crores of the daily net assets	1.50%	1.25%
On the next Rs.40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof.	
On balance of the assets	1.05%	0.80%

For the actual current expenses being charged, the investor should refer to functional Weblink: https://www.tatamutualfund.com/expense-ratio/total-expense-ratio.

Annual Recurring expenses

Actual Expenses % to daily net assets for the F.Y. 2024-2025		
Tata Floating Rate Fund	Direct Plan	Regular Plan
	0.28%	0.70%

The maximum limit of recurring expenses that can be charged to the Scheme would be as per Regulation 52 of the SEBI (MF) Regulation, 1996. Investors are requested to read "Section-Annual Scheme Recurring Expenses" in the SID.

TAX TREATMENT FOR THE INVESTORS (UNITHOLDERS)

Investor will be advised to refer to the details in the Statement of Additional Information and also independently refer to his tax advisor.

DAILY NET ASSET VALUE (NAV) PUBLICATION

The NAVs will be calculated and disclosed on every Business Day. The AMC will prominently disclose the NAVs under a separate head on the website of the Fund (www.tatamutualfund.com) and of the Association of Mutual Funds in India-AMFI (www.amfiindia.com) by 11 P.M. on every business day^.

However, due to inability in capturing same day valuation of underlying investments, the NAV shall be disclosed by 11 P.M. of the next business day^.

^ If the NAVs are not available before the commencement of Business Hours on the following day (i.e., next day after the respective business day) due to any reason, the Mutual Fund shall issue a press release giving reasons for the delay and explain by when the Mutual Fund would be able to publish the NAV.

In case NAV of Corporate Debt Market Development Fund ('CDMDF') units is not available by 9:30 p.m. of same Business Day, NAV declaration timing for Mutual Fund Schemes holding units of CDMDF shall be 10 a.m. on next business day instead of 11 p.m. on same Business Day.

UNITHOLDERS' INFORMATION

Account Statement:

The AMC will send an allotment confirmation specifying the units allotted by way of email and/or SMS within 5 working days of receipt of valid application/ transaction to the Unit holders registered e-mail address and/ or mobile number (whether units are held in demat mode or in account statement form).

A Consolidated Account Statement (CAS) detailing all the transactions across all mutual funds (including transaction charges paid to the distributor) and holding at the end of the month shall be sent to the Unit holders in whose folio(s) transaction(s) have taken place during the month by mail or email on or before 15th of the succeeding month.

Half-yearly CAS shall be issued at the end of every six months (i.e. September/ March) on or before 21st day of succeeding month, to all investors providing the prescribed details across all schemes of mutual funds and securities held in dematerialized form across demat accounts, if applicable

For further details, refer SAI.

Portfolio Disclosure:

Tata Mutual Fund will disclose portfolio (along with ISIN) in user friendly and downloadable spreadsheet format, as on the last day of the month/half year for all their schemes on its website www.tatamutualfund.com and on the website of AMFI www.amfiindia.com within 10 days from the close of each month/half year. Disclosure of risk-o-meter of scheme, benchmark and portfolio details to the investors will be disclosed as mandated by provision no. 5.16 & 5.17 of SEBI Master Circular on Mutual Fund dated June 27, 2024.

In addition to monthly portfolio Tata Mutual Fund shall also disclose fortnight portfolio for debt scheme within 5 days of every fortnight as per provision no. 5.1 of SEBI Master circular on Mutual Fund dated June 27, 2024.

In case of unitholders whose email addresses are registered, Tata Mutual Fund will send via email both the monthly and half yearly statement of scheme portfolio within 10 days from the close of each month /half year respectively.

Tata Mutual Fund will publish an advertisement every half-year, in the all India edition of at least two daily newspapers, one each in English and Hindi, disclosing the hosting of the half yearly statement of the schemes portfolio on the AMC's website www.tatamutualfund.com and on the website of AMFI (www.amfiindia.com). Tata Mutual Fund will provide physical copy of the statement of scheme portfolio without any cost, on specific request received from a unitholder.

For portfolio disclosure of schemes of Tata Mutual Fund, kindly visit functional Weblink: https://www.tatamutualfund.com/schemes-related

Unaudited Financial Results:

Tata Mutual Fund/ Tata Asset Management Pvt Ltd shall within one month from the close of each half year, that is on 31st March & on 30th September, host a soft copy of its unaudited financial results on its website in the format specified in Twelfth Schedule of SEBI (Mutual Funds) Regulations 1996.

Tata Mutual Fund / Tata Asset Management Pvt Ltd shall publish an advertisement disclosing the hosting of such financial results on their website, in atleast one English daily newspaper having nationwide circulation & in a newspaper having wide circulation published in the language of the region where the Head Office of the fund is situated.

Annual Report

Annual report or Abridged Summary, in the format prescribed by SEBI, will be hosted on AMC's website www.tatamutualfund.com and on the website of AMFI www.amfiindia.com.

The scheme wise annual report or an abridged summary thereof, in the format prescribed, shall be sent by way of e-mail to the investor's registered e-mail address not later than four months from the date of closure of the relevant accounts year.

Investors who have not registered their email id, will have an option of receiving a physical copy of the Annual Report or Abridged Summary thereof.
