

TATA

NIFTY 50 EXCHANGE TRADED FUND

(An Open Ended Exchange Traded Fund tracking Nifty 50 Index)

(SCHEME CODE - TATA/O/O/OET/18/09/0034)
(SCRIP CODE - NETF)

This product is suitable for investors who are seeking*:

- Long Term Capital Growth.
- Investments in Equity & Equity related instruments covered by Nifty 50 Index.

***Investors should consult their financial advisors if in doubt about whether the product is suitable for them.**

Scheme Riskometer

Benchmark Riskometer

It may be noted that risk-o-meter specified above is based on internal assessment. The same shall be updated as per provision no. 17.4.1.i of SEBI Master Circular on Mutual Fund dated 27.06.2024, on Product labelling in mutual fund schemes on ongoing basis.

Units were offered at Rs. 10/- each for cash during the New Fund Offer & Continuous offer for units at NAV based prices, subject to applicable load.

New Fund Offer Opened On	17.12.2018
New Fund Offer Closed On	31.12.2018
Scheme Re-opened On	08.01.2019

Name of Mutual Fund	Name of Trustee Company	Name of Asset Management Company
Tata Mutual Fund 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051	Tata Trustee Co. Pvt. Ltd. 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051 CIN: U65991-MH-1995-PTC-087722	Tata Asset Management Pvt. Ltd. 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051 CIN: U65990-MH-1994-PTC-077090

This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. **For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, ,penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investor Service Centres or distributors or from the website www.tatamutualfund.com**

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

This Key Information Memorandum is dated 30 May 2025

INVESTMENT OBJECTIVE

The investment objective of the scheme is to provide returns that is closely correspond to the total returns of the securities as represented by the Nifty 50 index, subject to tracking error.

However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved.

ASSET ALLOCATION PATTERN OF THE SCHEME

Under normal circumstances, funds of the Scheme, shall (after providing for all ongoing expenses) be invested / the indicative asset allocation shall be as follows considering the objective of the Scheme:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	
Equity and Equity related instruments covered by Nifty 50 index*	95	100	High
Money Market Instruments including Tri-party Repo and units of liquid scheme of Tata Mutual Fund	0	5	Low

*The net assets of the scheme will be invested predominantly in stocks constituting the Nifty 50. This would be done by investing in all the stocks comprising the Nifty 50 in approximately the same weightage that they represent in the Nifty 50. The scheme may take exposure through derivative transactions in the manner and upto the limit as may be specified by SEBI from time to time. A small portion of the net assets will be invested in money market instruments permitted by SEBI / RBI to meet the liquidity requirements of the Scheme.

*Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period. The Scheme will comply with all the applicable circulars issued by SEBI as regard to derivatives from time to time.

The Scheme will comply with provision no. 12.24 and 12.25 of SEBI Master Circular on Mutual Fund dated June 27, 2024. The cumulative gross exposure to equity, equity related instruments, debt, money market instruments and derivatives shall not exceed 100% of the net assets of the scheme.

As per clause 4 of Seventh Schedule of SEBI (Mutual Funds) Regulations 1996, the scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

The Scheme will not invest in the following:

1. Unlisted debt instrument,
2. Bespoke or complex debt products / securities,
3. Securities with special features,
4. Inter scheme transactions,
5. Short selling,
6. Unrated debt and money market instruments (except G-Secs, T-Bills and other money market instruments)
7. Debt Derivatives.

The scheme may invest in equity derivatives of underlying securities forming part of the index in case the underlying security is not available for purchase or instances of portfolio rebalancing.

Indicative Table (Actual instrument / percentages may vary subject to applicable SEBI circulars):

Sr. No.	Type of Instrument	Percentage of Exposure	SEBI Master Circular on Mutual Fund dated June 27, 2024 Reference
1	Securities Lending / Short Selling	Not more than 20% of the net assets of the Scheme can be deployed in stock lending and not more than 5% of the fund can be can be deployed in Stock lending to any single counterparty. Collateral would always be obtained by the approved intermediary. The Scheme shall not carry out short selling.	Provision no. 12.11

Sr. No.	Type of Instrument	Percentage of Exposure	SEBI Master Circular on Mutual Fund dated June 27, 2024 Reference
2	Derivatives	The exposure to derivatives will not exceed 50% of the net assets of the scheme	Provision no. 12.25
3	Securitized Debt	The Scheme will not invest in securitized debt.	Provision no. 12.15
4	Overseas Securities	The Scheme will not invest in Overseas securities.	Provision no. 12.19
5	# RelTS and InVITS	The Scheme will not invest in RelTS and InVITS.	Provision no. 12.21 & clause no. 13 of Seventh Schedule of SEBI (MF) Regulation, 1996.
6	AT1 and AT2 Bonds	The Scheme will not invest in AT1 and AT2 Bonds.	Provision no. 12.2
7	Any other instrument	Not applicable	Not applicable

Change in Investment Pattern/ Portfolio Rebalancing

Being a passively managed exchange traded open ended index scheme, change in investment pattern is normally not foreseen. However, for short durations part of the corpus may be pending for deployment, in cases of extreme market conditions, special events or corporate events, like declaration of income distribution cum capital withdrawal by the companies comprising the index. In the event of involuntary corporate action, the Scheme shall endeavor to dispose the security not forming part of the Underlying index within 7 business days from the date of listing, subject to availability of adequate liquidity for the security.

Such changes in the investment pattern will be for short term and for defensive considerations only. In the event of deviations, the fund manager will endeavour to carry out rebalancing within 30 calendar days.

In case deviation in investment pattern in not rebalanced within the period indicated above then justification for such delay in rebalancing of portfolio shall be placed before the investment committee and the reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

In case of change in constituents of the index due to periodic review, the portfolio of equity Index Funds be rebalanced within 7 calendar days. Any transactions undertaken in the scheme portfolio of index fund in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

INVESTMENT STRATEGY

Tata NIFTY 50 EXCHANGE TRADED FUND is a passively managed exchange traded fund which will employ an investment approach designed to track the performance of Nifty 50 Index. The Scheme seeks to achieve this goal by investing in securities constituting the Nifty 50 Index in same proportion as in the Index. The Scheme will invest at least 95% of its total assets in the securities comprising the Underlying Index. The Scheme may also invest in money market instruments to meet the liquidity and expense requirements.

The fund is ideal for those investors who would like to invest in passively managed fund investing in a diversified portfolio of well-known companies as represented by Nifty 50 Index.

Tracking Error

Tracking error is a measure of the difference in returns from the Scheme and the returns from the index. It is computed as the standard deviation of the difference between the daily returns of the underlying benchmark and the NAV of the Scheme on an annualized basis.

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or sale of stocks within the benchmark due to:
 - i) Illiquidity in the stock,
 - ii) Delay in realisation of sale proceeds,
- The scheme may buy or sell the stocks comprising the index at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- The potential for trades to fail, which may result in the Scheme not having acquired the stocks at a price necessary to track the benchmark price.
- The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.

- Disinvestments to meet redemptions, recurring expenses, income distribution cum capital withdrawal payouts etc.
- Execution of large buy / sell orders
- Transaction cost and recurring expenses
- Delay in realisation of Unit holders' funds
- Levy of margins by exchanges

The Scheme will endeavor to minimise the tracking error by:

- Rebalancing of the portfolio.
- Setting off of incremental subscriptions against redemptions.
- Use of derivatives for portfolio rebalancing and efficient portfolio management

The annualized standard deviation of the difference in daily returns between the underlying index and the NAV of the scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.

For ETFs in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

Trading in Derivatives by the Scheme

Subject to SEBI (Mutual Fund) Regulations, 1996, the Scheme(s) may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio. In accordance with the guidelines issued by the SEBI, exposure to derivative instruments will be restricted to the limit as specified in the para on asset allocation pattern of the scheme.

A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements, Futures, Options, etc.

The Scheme may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio. The Scheme may purchase call and put options in securities in which it invests and on securities indices based on securities in which the scheme invests. Through the purchase and sale of futures contracts and purchase of related options on those contracts the Scheme would seek to hedge against a decline in securities owned by the Scheme or an increase in the prices of securities which the Scheme plans to purchase. The Scheme would sell futures contracts on securities indices in anticipation of a fall in stock prices, to offset a decline in the value of its equity portfolio. When this type of hedging is successful, the futures contract increase in value while the Scheme's investment portfolio declines in value and thereby keep the Scheme's net asset value from declining as much as it otherwise would. Similarly, when the Fund is not fully invested, and an increase in the price of equities is expected, the Scheme would purchase futures contracts to gain rapid market exposure that may partially or entirely offset increase in the cost of the equity securities it intends to purchase.

Example: Please note that below mentioned examples are purely for illustration purpose only and actual exposure may vary to a greater extend in line with the regulatory directives.

Futures:

A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific future date. The price at which the underlying asset would change hands in the future is agreed upon at the time of entering into the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfill the terms of the contract. Currently, futures contracts have a maximum expiration cycle of 3-months. A futures contract on the stock market index gives its owner the right and obligation to buy or sell the portfolio of stocks characterized by the index. Stock index futures are cash settled; there is no delivery of the underlying stocks.

Example:

Index Future	
Assume, 1-month Nifty 50 Future price on day 1:	18000
Scheme Buys	100 Future Contracts
(1 lot =Nominal Value equivalent to 50 units of the underlying index)	
Scenario 1	
On the date of Settlement, the future price (closing spot price of the index)	18500
Profit for the scheme (18200-18000) *100*50	1000000

Scenario 2	
On the date of Settlement, the future price (closing spot price of the index)	17900
Loss for the scheme (18000-17900) *100*50	-500000

Risks associated with Future Contracts: Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks. The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets. Additional risks could be on account of illiquidity and potential mispricing of the futures.

Options:

An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

Example:

Call Option	
Say, Scheme buys 1 lot of Nifty 50 Index	50 Units
Spot price	18000
Strike price	18100
Premium	100
Total amount paid as premium (Rs.) (100X50)	Rs.5000
Scenario 1: Nifty 50 Index goes up (i.e Spot)	18250
Scheme has reversed the position before expiry of the contract	
Current Premium at the time of reversal	200
Net Gain Rs. (200-100)	100
Total gain on 1 lot of Nifty 50 (50 units) Rs.(50x100)	Rs.5000
Scheme has reversed the position (i.e Nifty 50 Option) at expiry	
Nifty 50 Spot on expiry	18275
Premium Paid(Rs.)	100
Exercise price	18100
Receivables on Exercise (18275-18100)	175
Total gain (Rs.) (175 -100) *50	Rs.1250
Scenario 2: Nifty 50 index moves to the level below 18100	
Scheme does not gain anything but the loss to the scheme (limited to the actual premium paid)	Rs. 100

Put Option	
Say, Scheme buys 1 lot of Nifty 50 Index	50 Units
Spot Price	18000
Strike Price	17900
Premium (per lot)	100
Total Amount Paid by the Scheme (50*100)	5000
Scenario 1: Nifty 50 Index goes down	
Scheme has reversed the position before expiry of the contract	
Nifty 50 Spot	17750
Current Premium at the time of reversal (from reverse trade)	150 per lot
Premium Received (Rs.)(100*50)	3000
Premium Paid	2000
Total Gain on 1 lot of Nifty 50 (Rs.) (50x50)	Rs.2500
Scheme has reversed the position at expiry	
Nifty 50 Spot	17500
Exercise Price	17900
Profit per lot	400
Total Gain Rs. (400*50)	Rs.20000
Scenario 2: Nifty 50 Index Stays over the Strike price of 18300	

If spot price of bank index goes up or stays around the exercise price i.e 17900 then in such scenario the premium paid of Rs.5000 shall be the maximum loss to the scheme.

Risks associated with Option Contracts: The option contracts give a person the right but not an obligation to buy or sell. The risk is potential mispricing and exposure to options can limit the profits from a genuine investment transaction.

The derivative exposure limits shall be subject to following Exposure Limits as specified by provision no. 12.24 and 12.25 of SEBI Master Circular on Mutual Fund dated June 27, 2024:

1. *The cumulative gross exposure through equity, debt and derivative positions shall not exceed 100% of the net assets of the scheme.*
2. *Mutual Funds shall not write options or purchase instruments with embedded written options.*
3. *The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.*
4. *Cash or cash equivalents* with residual maturity of less than 91 days shall be treated as not creating any exposure.*
5. *Exposure due to hedging positions shall not be included in the above mentioned limits subject to the following:*
 - a) *Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.*
 - b) *Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.*
 - c) *Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.*
 - d) *The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.*
6. *Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. In case of participation in IRS is through over the counter transactions, the counter party has to be an entity recognized as a market maker by RBI and exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.*

However, if mutual funds are transacting in IRS through an electronic trading platform offered by the Clearing Corporation of India Ltd. (CCIL) and CCIL is the central counterparty for such transactions guaranteeing settlement, the single counterparty limit of 10% shall not be applicable..

7. *Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.*

Definition of Exposure in case of Derivative Positions

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price*Lot Size*Number of Contracts
Short Future	Futures Price*Lot Size* Number of Contracts
Option Bought	Option Premium Paid*Lot Size* Number of Contracts.

In Addition to the above, SEBI has also prescribed following derivative position limits:

Position Limits for Mutual Fund and its scheme:

Position limit for Index Options and Index Futures contracts	
Index Options Contract*	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index options contracts, whichever is higher.
Index Futures Contract**	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index futures contracts, whichever is higher.

* This limit would be applicable on open positions in all options contracts on a particular underlying index.

** This limit would be applicable on open positions in all futures contracts on a particular underlying index.

Additional position limit for hedging	
In addition to the position limits as mentioned above, Mutual Funds may take exposure in equity index derivatives subject to the following limits:	Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.
Position limit for Stock Options and Stock Futures contracts	
The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL). This limit would be applicable on aggregate open positions in all futures and all option contracts on a particular underlying stock.	

Position limit for each scheme of a Mutual Fund

The scheme-wise position limit requirements shall be:

1. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of:
 - 1% of the free float market capitalization (in terms of number of shares). Or
 - 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts)
2. This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
3. For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all scheme put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

For detailed risk associated with use of derivatives, please refer paragraph "Scheme Specific risk factors".

Portfolio Turnover Policy

Being Exchange Traded Fund, the fund Manager will follow passive strategy while investing. The portfolio turnover is expected to be in line with the volume of subscription and redemption in the scheme on a daily basis by Market Maker and eligible investors as per provision no. 3.6.2 of SEBI Master Circular on Mutual Fund dated June 27, 2024. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

Portfolio Turnover Ratio as on 31st March, 2025 (for 13 months) is 0.11 Times.

RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Scheme Specific Risk Factors:

Tata Nifty 50 Exchange Traded Fund is a passively managed scheme by providing exposure to NIFTY 50 Index and tracking its performance and yield, before expenses, as closely as possible. The scheme performance may be affected by a general decline in the Indian markets relating to its underlying Index. The scheme invests in the underlying Index regardless of its investment merit.

Factors such as the fees and expenses of the Scheme, Corporate Actions, Cash balance, changes to the Underlying Index and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying Index of the Scheme. The Scheme's returns may therefore deviate from those of its Underlying Index, generally known as "Tracking Error" risk.

The Tracking error of the scheme is expected to be in the range of 2-3% per annum. However, it may so be that the actual tracking error can be higher or lower than the range given. Tracking errors are inherent in any ETF fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty 50 or one or more securities covered by / included in the Nifty 50. However, Tracking Error of ETFs is likely to be low as compared to a normal index fund.

To the extent that some assets/ funds may be deployed in Money Market Operations, the Scheme will be subject to risks relating to such deployment / operations and may also contribute to tracking errors.

In case of investments in derivative instruments like index futures, the risk/ reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached

to the liquidity and the depth of the index futures market as it is an untested market.

The annualized standard deviation of the difference in daily returns between the underlying index and the NAV of the scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. Index in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data. However, Tracking Error of Index is likely to be low as compared to a normal index fund.

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total return and/or its ability to meet its objectives. These risks are associated with investment in equities.

Risks associated with investments in equity instruments

Investment Risks

Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.

The price of securities may go up or down depending on a variety of factors and hence investors may note that AMC/Fund Manager's investment decisions may not be always profitable. Although it is intended to generate capital appreciation and maximize the returns by actively investing in equity securities and utilising debt and money market instruments as a defensive investment strategy. The price of securities may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Fund's investment objective will be attained or that the Fund may not be in a position to maintain the indicated percentage of investment pattern under exceptional circumstances. There is no guarantee the investment / dis-investment decision will result into profit.

Market Risk

The Scheme's NAV will react to the stock market movements. The Investor could lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices and market movements, and over longer periods during market downturns.

Regulatory Risk

Any changes in trading regulations by the stock exchange (s) or SEBI may affect the ability of Market Maker to arbitrage resulting into wider premium/discount to NAV.

Liquidity Risk

Trading in units of Tata Nifty 50 Exchange Traded Fund on the Exchange may be halted because of market conditions or for reasons that in the view of the Market Authorities or SEBI, trading in units of the scheme is not advisable. In addition, trading in units of Tata Nifty 50 Exchange Traded Fund are subject to trading halts caused by extraordinary market volatility and pursuant to NSE and SEBI "circuit filter" rules. There can be no assurance that the requirements of the Market necessary to maintain the listing of units of Tata Nifty 50 Exchange Traded Fund will continue to be met or will remain unchanged. The Trustee, in the general interest of the unit holders of the Scheme offered under this scheme and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day.

Settlement Risk

In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Schemes portfolio may result, at times, in potential losses to the Schemes, and there can be a subsequent decline in the value of the securities held in the respective Scheme's portfolio.

Risk pertaining to Nifty 50 Index

Nifty 50 Index comprises of well diversified 50 stocks. Equities are volatile in nature and are subject to price fluctuations on daily basis. The volatility in the value of the equity instruments is due to various micro and macroeconomic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.

Risks associated with Money Markets Instruments

Interest Rate Risk

As with money instruments, changes in interest rate may affect the price of the money market instrument(s) and ultimately Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time i.e. in the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund.

Securities Lending by the Mutual Fund

The Scheme may participate in securities lending and borrowing scheme in accordance with Securities Lending Scheme, 1997, Regulation 44 (4) of SEBI (Mutual Funds) Regulations ,1996, and as per provision no. 12.11 of SEBI Master Circular on Mutual Fund dated June 27, 2024 on framework for short selling and borrowing and lending of securities . The Scheme shall also follow other relevant regulations /guidelines issued by stock exchange(s) from time to time. The Scheme shall participate in Securities Borrowing and Lending only with the SEBI approved intermediaries.

Securities Lending means the lending of securities to SEBI approved intermediaries for a tenure of 1 to 12 months at a negotiated compensation in order to enhance returns of the scheme portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The AMC will adhere to the following strict internal limits should it engage in Securities Lending.

Not more than 20% of the net assets of the Scheme can be deployed in stock lending & single intermediary limit is 5%. Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, and government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis.

Example:

A scheme has a security of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the security, from time to time if any, on the exchange. If the scheme is enabled to lend the said security to a borrower who would be wanting to take advantage of the market fluctuations in its price, the borrower would return the security to the lender (fund) at a stipulated time or on demand for a negotiated compensation. The scheme's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost

of the security. Thus it is in the interest of the investors that returns can be enhanced by way of stock lending rather than hold the security only for capital appreciation potential.

Thus the scenario under which the scheme would participate in stock lending would be:

1. There is a holding of security e.g. of XYZ Ltd in the scheme which the fund manager wants to be the core holding of the fund for approximately 6 to 12 months.
2. There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs the said security of XYZ Ltd to settle it) who is willing to put up a proper collateral for the same. (In all cases higher than the price of the script).
3. The borrower is represented by a proper recognized intermediary.
4. The agreement is to return the security or the amount so negotiated at a particular period of time or on demand.

Then the security will be lent by the scheme and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, stock lending would be done by the scheme only in the following circumstances:

- a) If permitted by trustees and the extent SEBI regulations in that regard, from time to time.
- b) If such activity generates additional returns for the scheme and helps to enhance the scheme returns.
- c) If considering the above and other factors all considered in totality, such activity is in the interest of unitholders in the scheme.

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".
- The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.
- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. The counter

party may default on a transaction before settlement and therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavorable) market price.

- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.
- Where derivatives are used for hedging, such use may involve a basic risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

Listing related risks

Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the Fund may quote below its face value / NAV.

Trading in Units of the Scheme on the Exchange may be halted because of market conditions or for reasons that in view of Exchange Authorities or SEBI, trading in Units of the Scheme is not advisable. In addition, trading in Units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to Exchange and SEBI 'circuit filter' rules. There can be no assurance that the requirements of Exchange necessary to maintain the listing of Units of the Scheme will continue to be met or will remain unchanged. Any changes in trading regulations by the Stock Exchange(s) or SEBI may inter-alia result in wider premium/ discount to NAV. The Units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of Units of the Scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Scheme. However, the Units of the Scheme can be subscribed / redeemed in Creation Unit Size directly with the Fund, which provides efficient arbitrage between the traded prices and the NAV, thereby reducing the incidence of the units of the Scheme being traded at premium/discounts to NAV. However, any changes in the trading regulations by NSE/Stock Exchange/SEBI may affect the ability of the market makers to arbitrage resulting into wider premium or discount to NAV. The Units will be issued in demat form through depositories. The records of the depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund will depend upon the confirmations to be received from depository(ies) on which the Mutual Fund has no control.

The market price of the Units of the Scheme, like any other listed security, is largely dependent on two factors, viz., (1) the intrinsic value of the Unit (or NAV), and (2) demand and supply of Units in the market. Sizeable demand or supply of the Units in the Exchange may lead to market price of the Units to quote at premium or discount to NAV.

Redemption Risk

Investors may note that even though this is an open-ended scheme, the Scheme would repurchase/redeem Units in Creation Unit Size only. Thus unit holdings less than the Creation Unit Size can only be sold through the secondary market on the Stock Exchange where these units are listed, subject to the rules and regulations of the Exchange.

Risk Control:

The scheme aims to track the Nifty 50 Index as closely as possible before expenses. The index is tracked on a regular basis and changes to the constituents or their weights, if any, are replicated in the underlying portfolio with the purpose of minimizing tracking error.

Investment in equity has an inherent market risk which cannot be mitigated generally. Whilst such risks cannot be eliminated, they may be mitigated by diversification. the AMC has adequate safeguards for controlling risk in the portfolio construction process. Investments made by the Scheme would be in accordance with the investment objective of the Scheme and provisions of SEBI Regulations.

PLANS AND OPTIONS

Not Available.

APPLICABLE NAV (after the scheme opens for subscriptions and redemptions)

Applicable NAV for Subscription / Switch-in: Cut Off Timing 3.00 pm

Particulars	Applicable NAV
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the scheme before the cut-off time.	The closing NAV of the same day.

Particulars	Applicable NAV
Valid applications received (time-stamped) after 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme either on the same day or before the cut-off time of the next Business Day i.e. available for utilization before the cut-off time of the next Business Day.	The closing NAV of the next Business Day.
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme after the cut-off time on the same day i.e. available for utilization after the cut-off time of the Day.	The closing NAV of the next Business Day.
Where the application is time stamped any day before the credit of the funds to the scheme but the funds for the entire amount are credited to the bank account of the scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on such subsequent Business Day.	The closing NAV of such subsequent Business Day on which funds are available for utilisation.

Realisation of funds means funds available to the AMC Scheme Account and not date and time of debit from Investor's account.

In case application is time stamped after cut off timing on any day, the same will be considered as deemed to be received on the next business day.

In case funds are realised after cut-off timing on any day, the same will be considered as deemed to be realised / available for utilisation on the next business day.

For Switch-ins including Systematic Investment Plan (SIP), Systematic Transfer Plan (STP) of any amount:

For determining the applicable NAV, the following shall be ensured:

- Application for switch-in is received before the applicable cut-off time.
- Funds for the entire amount of subscription / purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time, and the funds are available for utilization before the cut-off time.
- In case of switch/STP transactions, funds will be made available for utilization in the switch-in- scheme based on the redemption payout cycle of the switch out

Scheme Redemption /Switch Out: In respect of application received upto 3 p.m., closing NAV of the day of receipt of application shall be applicable and in respect of application received after 3 p.m. closing NAV of next business day.

Outstation cheques/demand drafts will not be accepted.

Valid application for "switch out" shall be treated as redemption and for "switch in" shall be treated as purchases and the relevant NAV of "Switch in" and "Switch Out" shall be applicable accordingly.

MINIMUM APPLICATION AMOUNT / NUMBER OF UNITS UNDER EACH PLAN

Subscription / Redemption of Units directly with Mutual Fund:

Market Makers can directly purchase / redeem in Creation Unit Size on any business day.

Direct transaction with AMCs shall be facilitated for eligible investors as per provision no. 3.6.2 of SEBI Master Circular on Mutual Fund dated June 27, 2024 for redemption or subscription. Any order placed for redemption or subscription directly with the AMC must be of greater than INR 25 Cr. The aforesaid threshold shall not be applicable for MMs and shall be periodically reviewed.

Subscriptions and Redemption transactions by the MMs shall be in the creation unit size and will be reviewed periodically.

The requirement of "cut-off" timing for NAV applicability as prescribed by SEBI from time to time shall not be applicable for direct transaction with AMCs in ETFs by MMs and other eligible investors.

Purchase / Sale of Units on Stock Exchange:

There is no minimum investment, although Units are purchased /sold in round lots of 1 Unit and in multiple thereof on stock exchange.

DESPATCH OF REDEMPTION REQUEST

The redemption proceeds will be dispatched to the unit holders within three working days from the date of redemption or repurchase, subject to exceptional circumstances as mentioned further in Scheme Information Document.

BENCHMARK INDEX

Nifty 50 (Total Return Index)

4. Portfolio Turnover Ratio as on 31st March, 2025 (for 13 months) is 0.11 Times.

EXPENSES OF THE SCHEME

Load Structure

Continuous Offer

Entry Load: Not Applicable (Pursuant to provision no. 10.4.1.a of SEBI Master Circular on Mutual Fund dated June 27, 2024, no entry load will be charged by the Scheme to the investor)

Exit Load: Nil

Slab wise break up depending on the assets under management:

These are the fees and expenses for operating the scheme. These expenses include Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' fee, marketing and selling costs etc. as given in the table below:

The AMC has estimated that upto 1.00 % (excluding additional permissible limits as per Regulation 52(6A)(b) & 52(6A)(c)) of the daily average net assets of the scheme will be charged to the scheme as expenses.

For the actual current expenses being charged, the investor should refer to functional Weblink: <https://www.tatamutualfund.com/expense-ratio/total-expense-ratio>.

Annual Recurring expenses

Actual Expenses % to daily net assets for the F.Y. 2024-2025	
Tata Nifty 50 Exchange Traded Fund	0.07%

The maximum limit of recurring expenses that can be charged to the Scheme would be as per Regulation 52 of the SEBI (MF) Regulation, 1996. Investors are requested to read "Section-Annual Scheme Recurring Expenses" in the SID.

TAX TREATMENT FOR THE INVESTORS (UNITHOLDERS)

Investor will be advised to refer to the details in the Statement of Additional Information and also independently refer to his tax advisor.

DAILY NET ASSET VALUE (NAV) PUBLICATION

Determination of Net Asset Value (NAV) on all business days.

The NAVs will be calculated and disclosed on every Business Day. The AMC will prominently disclose the NAVs under a separate head on the website of the Fund (www.tatamutualfund.com) and of the Association of Mutual Funds in India-AMFI (www.amfiindia.com) by 11 P.M. on every business day[^].

However, due to inability in capturing same day valuation of underlying investments, the NAV shall be disclosed by 11 P.M. of the next business day[^].

[^] If the NAVs are not available before the commencement of Business Hours on the following day (i.e., next day after the respective business day) due to any reason, the Mutual Fund shall issue a press release giving reasons for the delay and explain by when the Mutual Fund would be able to publish the NAV.

NAV of an ETF i.e., the per unit NAV based on the current market value of its portfolio during the trading hours of the ETF, will be disclosed on the NSE (National Stock Exchange) and further Such iNAV shall be updated within a maximum time lag of 15 seconds from underlying market.

In terms of provision no. 8.7 of SEBI Master Circular on Mutual Fund dated June 27, 2024, all direct transactions in units of ETFs by MMs or other eligible investors with AMCs shall be at intra-day NAV based on the actual execution price of the underlying portfolio.

The requirement of "cut-off" timing for NAV applicability as prescribed by SEBI from time to time shall not be applicable for direct transaction with AMCs in ETFs by MMs and other eligible investors.

Tata Mutual Fund will disclose portfolio (along with ISIN) in user friendly and downloadable spreadsheet format, as on the last day of the month/half year for all their schemes on its website www.tatamutualfund.com and on the website of AMFI www.amfiindia.com within 10 days from the close of each month/half year.
