

KEY INFORMATION MEMORANDUM

TATA
mutual fund

TATA **NIFTY 50 INDEX FUND**

(An open-ended equity scheme tracking Nifty 50 Index)

(SCHEME CODE - TATA/O/O/EIN/02/11/0014)

This product is suitable for investors who are seeking*:

- Long Term Capital Appreciation.
- To reflect / mirror the Nifty 50 returns by investing in the same stocks which comprises of NIFTY50.

***Investors should consult their financial advisors if in doubt about whether the product is suitable for them.**

Scheme Riskometer

Benchmark Riskometer

It may be noted that risk-o-meter specified above is based on internal assessment. The same shall be updated as per provision no. 17.4.1.i of SEBI Master Circular on Mutual Fund dated 27.06.2024, on Product labelling in mutual fund schemes on ongoing basis.

Units were offered at Rs. 10/- each for cash during the New Fund Offer & Continuous offer for units at NAV based prices, subject to applicable load.

New Fund Offer Opened On	20.02.2003
New Fund Offer Closed On	24.02.2003
Scheme Re-opened On	03.03.2003

Name of Mutual Fund	Name of Trustee Company	Name of Asset Management Company
Tata Mutual Fund 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051	Tata Trustee Co. Pvt. Ltd. 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051 CIN: U65991-MH-1995-PTC-087722	Tata Asset Management Pvt. Ltd. 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051 CIN: U65990-MH-1994-PTC-077090

This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. **For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, ,penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investor Service Centres or distributors or from the website www.tatamutualfund.com**

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

This Key Information Memorandum is dated 30 May 2025

INVESTMENT OBJECTIVE

The investment objective of the Scheme is to reflect/mirror the market returns with a minimum tracking error.

The scheme does not assure or guarantee any returns.

ASSET ALLOCATION PATTERN OF THE SCHEME

Under normal circumstances, the asset allocation of the scheme will be as follows:

Instruments	Indicative Allocations (% of total assets)		Risk Profile (High/ Medium/Low)
	Minimum	Maximum	
Securities Covered by the NIFTY 50	95	100	High
Money Market Instruments	0	5	Low to Medium

The scheme may invest in derivative instruments like index futures, stock futures, options contracts, warrants, convertible securities, swap agreements or other derivative products, as and when introduced but always subject to regulatory requirement.

The AMC may from time to time for a short term period on defensive consideration invest upto 100% of the funds available in Money Market Instruments, the primary motive being to protect the Net Asset Value of the Scheme and protect unitholders interests so also to earn reasonable returns on liquid funds maintained for redemption/repurchase of units.

The Scheme will not invest in the following:

1. Unlisted debt instrument,
2. Bespoke or complex debt products / securities,
3. Securities with special features,
4. Inter scheme transactions,
5. Short selling,
6. Unrated debt and money market instruments (except G-Secs, T-Bills and other money market instruments)
7. Debt Derivatives.

The scheme may invest in equity derivatives of underlying securities forming part of the index in case the underlying security is not available for purchase or instances of portfolio rebalancing.

Indicative Table (Actual instrument / percentages may vary subject to applicable SEBI circulars):

Sr. No.	Type of Instrument	Percentage of Exposure	SEBI Master Circular on Mutual Fund dated June 27, 2024 Reference
1	Securities Lending/ Short Selling	Not more than 25% of the net assets of the scheme shall be deployed in securities lending and single intermediary limit is 5%. The scheme will not participate in Short Selling.	Provision no. 12.11
2	Equity Derivatives for non-hedging Purposes	The scheme will not invest in Equity Derivatives for non-hedging Purposes*	Provision no 12.25
3	Securitized Debt	The scheme will not invest in Securitized Debt	Provision no. 12.15
4	Overseas Securities	The scheme will not invest in Overseas Securities	Provision no. 12.19
5	# ReITS and InVITS	The scheme will not invest in ReITS and InVITS	Provision no. 12.21
6	AT1 and AT2 Bonds	The scheme will not invest in AT1 and AT2 Bonds	Provision no. 12.2
7	Any other instrument a) Option contracts	a) For other option contracts, the total exposure related to option premium paid will not exceed 20% of the net assets of the scheme.	Provision no 12.25

*Note: However, the scheme may invest in equity derivatives of underlying securities forming part of the index in case the underlying security is not available for purchase or instances of portfolio rebalancing.

The scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. (Cash Equivalent shall consist of the following securities having residual maturity of less than 91 days: Government Securities, T-Bills & Repo on Government Securities.

Change in Investment Pattern/ Portfolio Rebalancing

Investment strategy and pattern may be deviated from time to time, provided such modification is in accordance with the Scheme(s) objective and Regulations as amended from time to time, the intent being to protect the Net Asset Value of the scheme and unitholders' interests. In case of deviation, the AMC will achieve a normal asset allocation pattern in a maximum period of three months. In case deviation in investment pattern in not rebalanced within the period indicated above then justification for such delay in rebalancing of portfolio shall be placed before the investment committee and the reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

In case of change in constituents of the index due to periodic review, the portfolio of equity Index Funds be rebalanced within 7 calendar days. Any transactions undertaken in the scheme portfolio of index fund in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

INVESTMENT STRATEGY

The investment strategy is to reflect /mirror the market returns with a minimum tracking error. The scheme may invest in derivative instrument for which investment strategy is given below:

Tracking Error

Tracking error is a measure of the difference in returns from the Scheme and the returns from the index. It is computed as the standard deviation of the difference between the daily returns of the underlying benchmark and the NAV of the Scheme on an annualized basis.

Tracking error could be the result of a variety of factors including but not limited to:

- Delay in the purchase or sale of stocks within the benchmark due to:
 - i) Illiquidity in the stock,
 - ii) Delay in realisation of sale proceeds,
- The scheme may buy or sell the stocks comprising the index at different points of time during the trading session at the then prevailing prices which may not correspond to its closing prices.
- The potential for trades to fail, which may result in the Scheme not having acquired the stocks at a price necessary to track the benchmark price.
- The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses.
- Investment in Debt and money market instruments to meet redemption / other liquidity requirements
- Addition or Removal of stocks from the index by index service provider
- Disinvestments to meet redemptions, recurring expenses, income distribution cum capital withdrawal payouts etc.
- Execution of large buy / sell orders
- Transaction cost and recurring expenses
- Delay in realisation of Unit holders' funds
- Levy of margins by exchanges

The Scheme will endeavor to minimise the tracking error by:

- Rebalancing of the portfolio.
- Setting off of incremental subscriptions against redemptions.

The annualized standard deviation of the difference in daily returns between the underlying index and the NAV of the scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.

For index fund in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data.

There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

Tracking Difference

Tracking difference is the annualized difference of daily returns between the index and the NAV of the Index Fund.

INVESTMENT IN DERIVATIVE INSTRUMENTS

As part of the Fund Management process, the Trustee Company may permit the use of derivative instruments such as index futures, stock futures and options contracts, warrants, convertible securities, swap agreements or any other derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objectives of the scheme.

Index futures are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. Index futures can be an efficient way of achieving the Scheme's investment objective. Notwithstanding the pricing, they can help in reducing the Tracking Error in the Scheme. Index futures may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the scrips, index futures can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares of Nifty 50 index and will be easy to settle compared to physical portfolio of shares representing an index. Based on the future regulations, the Trustee Company may allow the Scheme to put 100% of the Scheme's assets in the index futures keeping in mind the liquidity risk and the settlement risk.

In case of investments in index futures, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. There is a risk attached to the liquidity and the depth of the index futures market. The fund may not suffer any material investment loss on trading in the index futures as compared to holding a portfolio of shares representing an index. The Fund will not maintain any leveraged or trading positions.

The cost differential between purchasing Index Future and 50/51 stocks is a function of the carrying cost, the interest earned available to fund managers and the brokerage cost applicable in both cases. However, as mentioned earlier, as the Indian equity markets continues to have limitations in execution of trades due to the lack of adequate liquidity and the concept of circuit breakers, index future can allow a fund to buy all the stocks comprising the index at a nominal additional cost. Further this will allow the fund managers to minimise the tracking error in case of an index fund that would have ordinarily grown on account of inadequate and incomplete execution of trades.

In case the execution and brokerage costs on purchase of Index Futures are high and the returns on surplus funds are less, buying of index future may not be beneficial as compared to buying 50/51 stocks. The actual return may vary based on actual and depends on final guidelines/procedures and trading mechanism as envisaged by stock exchanges and other regulatory authorised.

Trading in Derivatives by the Scheme

Subject to SEBI (Mutual Funds) Regulations, 1996, the Scheme may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio. In accordance with the guidelines issued by the SEBI, exposure to derivative instruments will be restricted to the limit as specified in the para on asset allocation pattern of the scheme.

A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements, Futures, Options, etc.

The Scheme may use techniques and instruments such as trading in derivative instruments to hedge the risk of fluctuations in the value of the investment portfolio. A derivative is an instrument whose value is derived from the value of one or more of the underlying assets which can be commodities, precious metals, bonds, currency, etc. Common examples of Derivative instruments are Interest Rate Swaps, Forward Rate Agreements, Futures, Options, etc. The Scheme may purchase call and put options in securities in which it invests and on securities indices based on securities in which the scheme invests. Through the purchase and sale of futures contracts and purchase of related options on those contracts the Scheme would seek to hedge against a decline in securities owned by the Scheme or an increase in the prices of securities which the Scheme plans to purchase. The Scheme would sell futures contracts on securities indices in anticipation of a fall in stock prices, to offset a decline in the value of its equity portfolio. When this type of hedging is successful, the futures contract increase in value while the Scheme's investment portfolio declines in value and thereby keep the Scheme's net asset value from declining as much as it otherwise would. Similarly, when the Fund is not fully invested, and an increase in the price of equities is expected, the Scheme would purchase futures contracts to gain rapid market exposure that may partially or entirely offset increase in the cost of the equity securities it intends to purchase.

Example: Please note that below mentioned examples are purely for illustration purpose only and actual exposure may vary to a greater extent in line with the regulatory directives.

Subject to SEBI (Mutual Fund) Regulations, 1996, The Scheme may invest in Derivative Instruments to the extent permitted under provision no.

7.5,7.6,12.24 and 12.25 of SEBI Master Circular on Mutual Fund dated June 27, 2024.

The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme.

For other option contracts, the total exposure related to option premium paid will not exceed 20% of the net assets of the scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. (Cash Equivalent shall consist of of the following securities having residual maturity of less than 91 days:

- Government Securities, T-Bills & Repo on Government Securities

Exposure due to hedging positions shall not be included in the above mentioned limits subject to the following:

- Hedging positions are the derivatives positions that reduce possible losses on an existing position in securities and till existing position remains.
- Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall have to be added and treated under the limits mentioned above.
- Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
- The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.

Mutual funds are allowed to hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio, is as per the formula given below:

$$\frac{(\text{Portfolio Modified Duration} \times \text{Market Value of the Portfolio})}{(\text{Futures Modified Duration} \times \text{Futures Price/PAR})}$$

The Mutual Fund may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions shall be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases shall not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions shall not exceed 10% of the net assets of the scheme.

Definition of Exposure in case of Derivative Positions

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price*Lot Size*Number of Contracts
Short Future	Futures Price*Lot Size* Number of Contracts
Option Bought	Option Premium Paid*Lot Size* Number of Contracts.

Position Limits for Mutual Fund and its scheme

Position limit for Index Options and Index Futures contracts	
Index Options Contract*	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index options contracts, whichever is higher.
Index Futures Contract**	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index futures contracts, whichever is higher.

* This limit would be applicable on open positions in all options contracts on a particular underlying index.

** This limit would be applicable on open positions in all futures contracts on a particular underlying index.

Additional position limit for hedging	
In addition to the position limits as mentioned above, Mutual Funds may take exposure in equity index derivatives subject to the following limits:	Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.
Position limit for Stock Options and Stock Futures contracts	

The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).
This limit would be applicable on aggregate open positions in all futures and all option contracts on a particular underlying stock.

Position limit for each scheme of a Mutual Fund

The scheme-wise position limit requirements shall be:

- For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of:
 - 1% of the free float market capitalization (in terms of number of shares). Or
 - 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts)
- This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
- For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

Position Limits for Interest Rate Future Contracts:

Scheme Level: The gross open positions across all contracts shall not exceed 3 % of the total open interest or INR 200 crores- whichever is higher.

Mutual Fund: The gross open positions across all contracts shall not exceed 10 % of the total open interest or INR 600 crores- whichever is higher.

Derivative Instruments & Related Examples:

Futures:

A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific future date. The price at which the underlying asset would change hands in the future is agreed upon at the time of entering into the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfill the terms of the contract. Currently, futures contracts have a maximum expiration cycle of 3-months. A futures contract on the stock market index gives its owner the right and obligation to buy or sell the portfolio of stocks characterized by the index. Stock index futures are cash settled; there is no delivery of the underlying stocks.

Example:

Index Future	
Assume, 1-month Nifty 50 Future price on day 1:	10110
Scheme Buys	100 Future Contracts
(1 lot =Nominal Value equivalent to 75 units of the underlying index)	
Scenario 1	
On the date of Settlement, the future price (closing spot price of the index)	10200
Profit for the scheme (10200-10110) *100*75	675000
Scenario 2	
On the date of Settlement, the future price (closing spot price of the index)	10050
Loss for the scheme (10050-10110) *100*75	-450000

Risks associated with Future Contracts: Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks. The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets. Additional risks could be on account of illiquidity and potential mispricing of the futures.

Options:

An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

Example:

Call Option	
Say, Scheme buys 1 lot of Nifty 50 Index	75 Units
Spot price	10000
Strike price	10100

Premium	100
Total amount paid as premium (Rs.) (100X75)	Rs.7500
Scenario 1: The Nifty 50 Index goes up (i.e Nifty 50 Spot)	10250
Scheme has reversed the position before expiry of the contract	
Current Premium at the time of reversal	200
Net Gain Rs. (200-100)	100
Total gain on 1 lot of Nifty 50 (75 units) Rs. (75x100)	Rs.7500
Scheme has reversed the position (i.e. Nifty 50 Option) at expiry	
Nifty 50 Spot on expiry	10275
Premium Paid (Rs.)	100
Exercise price	10100
Receivables on Exercise (10275-10100)	175
Total gain (Rs.) (175 -100) *75	Rs.5625
Scenario 2: The Nifty 50 index moves to the level below 10100	
Scheme does not gain anything but the loss to the scheme (limited to the actual premium paid)	Rs. 7500

Put Option	
Say, Scheme buys 1 lot of Nifty 50 Index	75 Units
Spot Price	10000
Strike Price	9450
Premium	50
Total Amount Paid by the Scheme (75*50)	3750
Scenario 1: Nifty 50 Index goes down	
Scheme has reversed the position before expiry of the contract	
Nifty 50 Spot	9300
Current Premium at the time of reversal	80
Premium Paid (Rs.)	50
Net Gain (Rs.80-50)	30
Total Gain on 1 lot of Nifty 50 (Rs.) (75x30)	Rs.2250
Scheme has reversed the position at expiry	
Nifty 50 Spot	9375
Premium Paid (Rs.)	50
Exercise Price	9450
Gain on Exercise	75
Total Gain Rs.(75-50)*75)	Rs.1 875
Scenario 2: If Nifty 50 Index Stays over the Strike price of 9450	
Say Nifty 50 Spot	9500
Net Loss to the Scheme will be premium paid	Rs.3750

Risks associated with Option Contracts: The option contracts give a person the right but not an obligation to buy or sell. The risk is potential mispricing and exposure to options can limit the profits from a genuine investment transaction.

Various Derivatives Strategies:

1. Index / Stock spot - Index / Stock Futures

The pricing of the futures is derived from underlying Index spot or the underlying stock. It is the cost of carry that binds the value of the futures to the underlying portfolio. When the two go out of sync, there are opportunities.

The cost of carry links the futures price to the price of the underlying asset. The price of the futures at any given instance should typically be more than the level of the spot price at that point. Theoretically, the fair value of the futures is equal to the spot price of the underlying plus the cost of carry i.e. the interest rate prevailing for an equivalent credit risk. Cash and carry trades at times provide higher than the prevailing interest rates. There is an opportunity to exploit by selling the overpriced futures and buying the underlying portfolio. It may also happen that the Index / Stock Future may be at a discount. In such cases, the Scheme may buy the future and sell the stock after borrowing the same. The Scheme shall enter into a combination of these transactions simultaneously.

If the Scheme has to unwind the positions prior to the expiry on account of redemptions or any other reason, the returns would depend on the spread between the spot and futures price at which the position is unwound. If the price differential between the spot and futures position of the subsequent month maturity is attractive near the expiry date, then the scheme may rollover the futures position and continue with the position in the spot market. The Scheme shall endeavour to deploy

its assets through transactions in the above pattern, which may involve Index Futures with Stock Futures or Futures of the same stock with different expiry months.

2. Cash Futures Arbitrage Strategy

The fund would look for market opportunities between the spot and the futures market. The cash futures arbitrage strategy can be employed when the price of the futures exceeds the price of the underlying stock. The fund would first buy the stocks in cash market and then sell in the futures market to lock the spread.

Buying the stock in cash market and selling the futures results in a hedge where the fund portfolio has locked in a spread and is not affected by the price movements in the spot and futures markets. The arbitrage position can be continued till expiry of the futures contracts. The futures contracts are settled based on the last half an hour's weighted average trade of the cash market. There is a convergence between the cash market and the futures market on expiry and this convergence results in the portfolio being able to generate the arbitrage return locked in earlier. However, the position may even be closed earlier in the event of the price differential being realized before expiry or better opportunities being available in other stocks / indexes. The strategy is attractive if this price differential (post all costs) is higher than the investor's cost-of capital.

Illustration of a Cash Futures Arbitrage Strategy: -

Buy 100 shares of Company X at Rs 1000 and sell the same quantity of stock's futures of the Company X at Rs 1100.

1. Market goes up and the price on the expiry day is Rs 2000.

At the end of the month (expiry day) the futures expires automatically:

Settlement price of futures = closing spot price = Rs 2000

Gain on stock is $100 \times (2000 - 1000) = \text{Rs } 100,000$

Loss on futures is $100 \times (1100 - 2000) = \text{Rs } -90,000$

Net gain is $100,000 - 90,000 = \text{Rs } 10,000$

2. Market goes down and the price on the expiry day is Rs 500.

At the end of the month (expiry day) the futures expires automatically:

Settlement price of futures = closing spot price = Rs 500

Loss on stock is $100 \times (500 - 1000) = \text{Rs } -50,000$

Gain on futures is $100 \times (1100 - 500) = \text{Rs } 60,000$

Net gain is $60,000 - 50,000 = \text{Rs } 10,000$

Unwinding the position:

Buy 100 shares of Company X at Rs 1000 and sell the same quantity of stock's futures of the Company X at Rs 1100.

The market goes up and at some point of time during the month (before expiry) the stock trades at Rs 1200 and the futures trades at Rs 1190 then

Fund Manager will unwind the position:

Buy back the futures at Rs 1190: loss incurred is $(1100 - 1190) \times 100 = \text{Rs } -9,000$

Sell the stock at Rs 1200: gain realized: $(1200 - 1000) \times 100 = \text{Rs } 20,000$

Net gain is $20,000 - 9,000 = \text{Rs } 11,000$

Rolling over the futures:

The Scheme may continue to stay invested in the stock in the Cash market. Close to expiry, if the stock's price is at Rs 1500 then the stock's futures is close to Rs 1500 as well. Also if the price of the current month stock futures is below the current price of the next month stock futures, the scheme may roll over the futures position to the next expiry:

The price of the stock futures next month contract is at Rs 1510

The price of the stock futures current month contract is at Rs 1500

Then sell the futures next month contract at Rs 1510 and buy back current month futures contract at Rs 1500 = gain of $100 \times (1510 - 1500) = \text{Rs } 9,000$ and the arbitrage position is rolled over.

For detailed risk associated with use of derivatives, please refer paragraph "Scheme Specific risk factors".

RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Scheme Specific Risk Factors:

- The deviation of the NAV of the plan from the Nifty 50 is expected to be in the range of 2%-3% per annum. However, it may so be that the actual tracking error can be higher or lower than the range given.

- In case of investments in derivative instruments like index futures, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is an untested market.

- The annualized standard deviation of the difference in daily returns between the underlying index and the NAV of the scheme based on past one year rolling data shall not exceed 2%. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any. Index in existence for a period of less than one year, the annualized standard deviation shall be calculated based on available data. However, Tracking Error of Index is likely to be low as compared to a normal index fund.

- Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the Nifty 50 or one or more securities covered by / included in the Nifty 50. To the extent that some assets/ funds may be deployed in Stock Lending / Money Market Operations, the Scheme will be subject to risks relating to such deployment / operations and may also contribute to tracking errors.

Investment Risks

The price of securities may go up or down depending on a variety of factors and hence investors may note that AMC/Fund Manager's investment decisions may not be always profitable. Although it is intended to generate capital appreciation and maximize the returns by actively investing in equity securities and utilising debt and money market instruments as a defensive investment strategy. The price of securities may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Fund's investment objective will be attained or that the Fund may not be in a position to maintain the indicated percentage of investment pattern under exceptional circumstances. There is no guarantee the investment / dis-investment decision will result into profit.

The fund may use techniques and instruments for efficient portfolio management and to attempt to hedge or reduce the risk. However, these techniques and instruments if imperfectly used have the risk of the fund incurring losses due to mismatches particularly in a volatile market. The Fund's ability to use these techniques may be limited by market conditions, regulatory limits and tax considerations (if any). The use of these techniques is dependent on the ability to predict movements in the prices of securities being hedged and movements in interest rates. There exists an imperfect correlation between the hedging instruments and the securities or market sectors being hedged. Besides, the fact that skills needed to use these instruments are different from those needed to select the Fund's / plan's securities. There is a possible absence of a liquid market for any particular instrument at any particular time even though the futures and options may be bought and sold on an organised exchange. The use of these techniques involves possible impediments to effective portfolio management or the ability to meet repurchase / redemption requests or other short-term obligations because of the percentage of the Fund's assets segregated to cover its obligations.

Liquidity and Settlement Risks

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain securities of certain companies, industries, sectors, etc. based on certain investment parameters as adopted internally by AMC. While at all times the AMC will endeavour that excessive holding/investment in certain securities of industries, sectors, etc. by the Scheme(s) are avoided, the funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio.

Regulatory Risk

The value of the securities may be affected by uncertainties such as changes in government policies, changes in taxation and other developments in the laws and regulations.

Risk associated with to be listed Securities

Securities which are not quoted on the stock exchanges are inherently liquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors, including the put options. The liquidity and valuation of the scheme's investments due to its holdings of to be listed securities may be affected if they have to be sold prior to the target date of disinvestment.

Securities Lending by the Mutual Fund

The Scheme may participate in securities lending and borrowing scheme in accordance with Securities Lending Scheme, 1997, Regulation 44 (4) of SEBI (Mutual Funds) Regulations, 1996, and as per provision no. 12.11 of SEBI Master Circular on Mutual Fund dated June 27, 2024 on framework for short selling and borrowing and lending of securities. The Scheme shall also follow other relevant regulations /guidelines issued by stock exchange(s) from time to time. The Scheme shall participate in Securities Borrowing and Lending only with the SEBI approved intermediaries.

Securities Lending means the lending of securities to SEBI approved intermediaries for a tenure of 1 to 12 months at a negotiated compensation in order to enhance returns of the scheme portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period. The AMC will adhere to the following strict internal limits should it engage in Securities Lending.

Not more than 25% of the net assets of the Scheme can be deployed in stock lending and not more than 5% of the fund can be can be deployed in Stock lending to any single counterparty. Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, and government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis.

Example:

A scheme has a security of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the security, from time to time if any, on the exchange. If the scheme is enabled to lend the said security to a borrower who would be wanting to take advantage of the market fluctuations in its price, the borrower would return the security to the lender (fund) at a stipulated time or on demand for a negotiated compensation. The scheme's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost of the security. Thus it is in the interest of the investors that returns can be enhanced by way of stock lending rather than hold the security only for capital appreciation potential.

Thus the scenario under which the scheme would participate in stock lending would be:

1. There is a holding of security e.g. of XYZ Ltd in the scheme which the fund manager wants to be the core holding of the fund for approximately 6 to 12 months.
2. There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs the said security of XYZ Ltd to settle it) who is willing to put up a proper collateral for the same. (In all cases higher than the price of the script).
3. The borrower is represented by a proper recognized intermediary.
4. The agreement is to return the security or the amount so negotiated at a particular period of time or on demand.

Then the security will be lent by the scheme and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, stock lending would be done by the scheme only in the following circumstances:

- a) If permitted by trustees and the extent SEBI regulations in that regard, from time to time.
- b) If such activity generates additional returns for the scheme and helps to enhance the scheme returns.
- c) If considering the above and other factors all considered in totality, such activity is in the interest of unitholders in the scheme.

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.

Risks associated with Debt / Money Markets

Interest Rate Risk

As with debt instruments, changes in interest rate may affect the price of the debt instrument(s) and ultimately Scheme's net asset value. Generally the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".
- The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.

- The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.
- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. The counter party may default on a transaction before settlement and therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavorable) market price.
- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.
- Where derivatives are used for hedging, such use may involve a basic risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Risk Control / Mitigation measures for equity investments and related investments:

Investment in equity has an inherent market risk which cannot be mitigated generally. Following measures have been implemented with an objective to mitigate /control other risks associated with equity investing:

Nature of Risk	Mitigation Measures
Regulatory Risk	<ul style="list-style-type: none"> Online monitoring of various exposure limits by the Front Office System. Also as a backup, manual controls are also implemented.
Poor Portfolio Quality	<ul style="list-style-type: none"> Pre-approved universe of stocks based on strong fundamental research. New stock addition only with the prior approval of investment committee.
Performance Risk	<ul style="list-style-type: none"> Periodical review of stock wise profit & loss. Review of scheme performance Vis. a vis. Benchmark index as well as peer group.
Liquidity Risk	<ul style="list-style-type: none"> Periodical review of the liquidity position of each scrip (Market capitalization, average volume in the market Vis. a vis. Portfolio Holding)
Concentration Risk	<ul style="list-style-type: none"> Cap on maximum single sector exposure. Cap on maximum single stock exposure

PLANS AND OPTIONS

Regular Plan (For applications routed through Distributors): Nifty 50

Direct Plan (For applications not routed through Distributors): Nifty 50

Default Option: Nifty 50 (In case when only Tata Index Fund is mentioned by the investor)

Default Plan:

Investors are requested to note the following scenarios for the applicability of "Direct Plan (application not routed through distributor) or Regular Plan (application routed through distributor)" for valid applications received under the scheme:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct	Direct Plan
3	Not mentioned	Regular	Direct Plan
4	Mentioned	Direct	Direct Plan
5	Direct	Not Mentioned	Direct Plan
6	Direct	Regular	Direct Plan
7	Mentioned	Regular	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

APPLICABLE NAV (after the scheme opens for subscriptions and redemptions)

Applicable NAV for Subscription / Switch-in: Cut Off Timing 3.00 pm

Particulars	Applicable NAV
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the scheme before the cut-off time.	The closing NAV of the same day.
Valid applications received (time-stamped) after 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme either on the same day or before the cut-off time of the next Business Day i.e. available for utilization before the cut-off time of the next Business Day.	The closing NAV of the next Business Day.
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme after the cut-off time on the same day i.e. available for utilization after the cut-off time of the Day.	The closing NAV of the next Business Day.
Where the application is time stamped any day before the credit of the funds to the scheme but the funds for the entire amount are credited to the bank account of the scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on such subsequent Business Day.	The closing NAV of such subsequent Business Day on which funds are available for utilisation.

Realisation of funds means funds available to the AMC Scheme Account and not date and time of debit from Investor's account.

In case application is time stamped after cut off timing on any day, the same will be considered as deemed to be received on the next business day.

In case funds are realised after cut-off timing on any day, the same will be considered as deemed to be realised / available for utilisation on the next business day.

For Switch-ins including Systematic Investment Plan (SIP), Systematic Transfer Plan (STP) of any amount:

For determining the applicable NAV, the following shall be ensured:

- Application for switch-in is received before the applicable cut-off time.
- Funds for the entire amount of subscription / purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time, and the funds are available for utilization before the cut-off time.
- In case of switch/STP transactions, funds will be made available for utilization in the switch-in- scheme based on the redemption payout cycle of the switch out

Scheme Redemption /Switch Out: In respect of application received upto 3 p.m., closing NAV of the day of receipt of application shall be applicable and in respect of application received after 3 p.m. closing NAV of next business day.

Outstation cheques/demand drafts will not be accepted.

Valid application for "switch out" shall be treated as redemption and for "switch in" shall be treated as purchases and the relevant NAV of "Switch in" and "Switch Out" shall be applicable accordingly.

MINIMUM APPLICATION AMOUNT / NUMBER OF UNITS UNDER EACH PLAN

Purchase: Minimum subscription amount for the scheme: Rs 5,000/- and in multiple of Re.1/- thereafter

Additional Purchase: Rs.1000/- & in multiples of Re.1/-thereafter.

The minimum application amount wherever specified in the concerned SIDs & KIMs will not be applicable for investment made in schemes of the Fund in compliance with the provision no. 6.10 of SEBI Master on Mutual Fund dated June 27, 2024 (Alignment of interest of Designated Employees of Asset Management Companies (AMCs) with the Unitholders of the Mutual Fund Schemes).

Redemption: Redemption request can be made for a minimum of Rs.500/50 units or folio balance whichever is lower.

There is no minimum amount requirement, in case of investors opting to switch "all units" from any existing schemes of Tata Mutual Fund to this Scheme.

The minimum redemption amount wherever specified in the concerned SIDs & KIMs will not be applicable for investment made in schemes of the Fund in compliance with the provision no. 6.10 of SEBI Master on Mutual Fund dated June 27, 2024 (Alignment of interest of Designated Employees of Asset Management Companies (AMCs) with the Unitholders of the Mutual Fund Schemes).

There is no minimum amount requirement, in case of investors opting to switch "all units" from any existing schemes of Tata Mutual Fund to this Scheme.

DESPATCH OF REDEMPTION REQUEST

The redemption proceeds will be dispatched to the unit holders within three working days from the date of redemption or repurchase, subject to exceptional circumstances as mentioned further in Scheme Information Document.

BENCHMARK INDEX

Nifty 50 TRI

DIVIDEND POLICY

Income Distribution cum Capital Withdrawal Policy

Payout of Income Distribution cum capital withdrawal option :

The income / profits received / earned would be accumulated by the Fund as capital accretion, aimed at achieving medium to long term and also short term capital growth as reflected in the NAV. In the alternative and as may be decided by the Trustees the profits received / earned and so retained and reinvested may be distributed as Income at appropriate rates (after providing for all relevant ongoing expenses, etc.). Guided by the philosophy of value-oriented returns, the Trustee Company may periodically capitalise net earnings of the Scheme (including interest income and realised gains on the Securities) by way of allotment/credit of bonus Units to the Unitholders Accounts, the intent being to protect the Net Asset Value of the Scheme and Unitholders' interests.

Compulsory Reinvestment of Income Distribution cum capital withdrawal option:

In order to reduce the expenses of the scheme and also for the convenience of the investors, in case of income distribution cum capital withdrawal (IDCW) payout amount is Rs 100/- or less, then the same shall be compulsorily reinvested in the same sub- option at ex-dividend NAV for unitholders of non-electronic mode. Where the option to payout of IDCW is available in electronic mode, the IDCW amount shall be paid to the Unit holders. However, in case the payment through electronic mode is unsuccessful, the AMC shall issue physical /IDCW warrant for such amount.

NAME OF THE FUND MANAGER

Additional Disclosure with respect to provision no. 5.8 of SEBI Master Circular on Mutual Fund dated June 27, 2024.

ADDITIONAL SCHEME RELATED DISCLOSURES

- Scheme's portfolio holdings (top 10 holdings by issuer and fund allocation towards various sectors to be provided through a functional website link - <https://www.tatamutualfund.com/statutory-disclosures/other-statutory-disclosures>)
- Disclosure of name and exposure to Top 7 issuers, stocks, groups and sectors as a percentage of NAV of the scheme in case of debt and equity ETFs/index funds through a functional website link - <https://www.tatamutualfund.com/statutory-disclosures/other-statutory-disclosures>)
- Portfolio Turnover Ratio as on 0.09 Times as on 31st March, 2025 (for 13 months).

EXPENSES OF THE SCHEME

Load Structure

Continuous Offer

Entry Load: Not Applicable (Pursuant to provision no. 10.4.1.a of SEBI Master Circular on Mutual Fund dated June 27, 2024, no entry load will be charged by the Scheme to the investor)

Exit Load: 0.25% of the applicable NAV if redeemed on or before 7 days from the date of allotment.

Pursuant to AMFI's communication dated 09th April 2025, Exit Load will not be charged on any Switch/Systematic transfer transaction from Regular plan to Direct plan of the same scheme effective from 23rd April 2025.

Slab wise break up depending on the assets under management:

As per provision no. 52.6.c of SEBI (Mutual Funds) Regulations, 1996 the total expense ratio of open-ended scheme shall not exceed the following limits. The AMC has estimated that upto 1.00 % (excluding additional permissible limits as per Regulation 52(6A)(b) & 52(6A)(c)) of the daily average net assets of the scheme will be charged to the scheme as expenses.

For the actual current expenses being charged, the investor should refer to functional Weblink: <https://www.tatamutualfund.com/expense-ratio/total-expense-ratio>.

Annual Recurring expenses

Actual Expenses % to daily net assets for the F.Y. 2024-2025		
Tata Nifty 50 Index Fund	Direct Plan	Regular Plan
	0.17%	0.50%

The maximum limit of recurring expenses that can be charged to the Scheme would be as per Regulation 52 of the SEBI (MF) Regulation, 1996. Investors are requested to read "Section-Annual Scheme Recurring Expenses" in the SID.

TAX TREATMENT FOR THE INVESTORS (UNITHOLDERS)

Investor will be advised to refer to the details in the Statement of Additional Information and also independently refer to his tax advisor.

DAILY NET ASSET VALUE (NAV) PUBLICATION

The NAVs will be calculated and disclosed on every Business Day. The AMC will prominently disclose the NAVs under a separate head on the website of the Fund (www.tatamutualfund.com) and of the Association of Mutual Funds in India-AMFI (www.amfiindia.com) by 11 P.M. on every business day^.

However, due to inability in capturing same day valuation of underlying investments, the NAV shall be disclosed by 11 P.M. of the next business day^.

^ If the NAVs are not available before the commencement of Business Hours on the following day (i.e., next day after the respective business day) due to any reason, the Mutual Fund shall issue a press release giving reasons for the delay and explain by when the Mutual Fund would be able to publish the NAV.

UNITHOLDERS' INFORMATION

Account Statement:

The AMC will send an allotment confirmation specifying the units allotted by way of email and/or SMS within 5 working days of receipt of valid application/ transaction to the Unit holders registered e-mail address and/ or mobile number (whether units are held in demat mode or in account statement form).

A Consolidated Account Statement (CAS) detailing all the transactions across all mutual funds (including transaction charges paid to the distributor) and holding at the end of the month shall be sent to the Unit holders in whose folio(s) transaction(s) have taken place during the month by mail or email on or before 15th of the succeeding month.

Half-yearly CAS shall be issued at the end of every six months (i.e. September/ March) on or before 21st day of succeeding month, to all investors providing the prescribed details across all schemes of mutual funds and securities held in dematerialized form across demat accounts, if applicable

For further details, refer SAI.

Portfolio Disclosure:

Tata Mutual Fund shall disclose portfolio (along with ISIN) in user friendly and downloadable spreadsheet format, as on the last day of the month/half year for all their schemes on its website www.tatamutualfund.com and on the website of AMFI www.amfiindia.com within 10 days from the close of each month/half year.

In case of unitholders whose email addresses are registered, Tata Mutual Fund will send via email both the monthly and half yearly statement of scheme portfolio within 10 days from the close of each month /half year respectively.

Tata Mutual Fund will publish an advertisement every half-year, in all India edition of at least two daily newspapers, one each in English and Hindi, disclosing the hosting of the half yearly statement of the schemes portfolio on the AMC's website www.tatamutualfund.com and on the website of AMFI (www.amfiindia.com). Tata Mutual Fund will provide physical copy of the statement of scheme portfolio without any cost, on specific request received from a unitholder.

For portfolio disclosure of schemes of Tata Mutual Fund, kindly visit functional Weblink: <https://www.tatamutualfund.com/schemes-related>.

Unaudited Financial Results:

Tata Mutual Fund/ Tata Asset Management Pvt Ltd shall within one month from the close of each half year, that is on 31st March & on 30th September, host a soft copy of its unaudited financial results on its website in the format specified in Twelfth Schedule of SEBI(Mutual Funds) Regulations 1996.

Tata Mutual Fund / Tata Asset Management Pvt Ltd shall publish an advertisement disclosing the hosting of such financial results on their website, in atleast one English daily newspaper having nationwide circulation & in a newspaper having wide circulation published in the language of the region where the Head Office of the fund is situated.

For Unaudited Financial Results of Tata Mutual Fund, kindly visit functional Weblink: <https://www.tatamutualfund.com/aboutus>.

Annual Report:

Annual report or Abridged Summary, in the format prescribed by SEBI, will be hosted on AMC's website <https://www.tatamutualfund.com/about-us> and on the website of AMFI www.amfiindia.com.

The scheme wise annual report or an abridged summary thereof, in the format prescribed, shall be sent by way of e-mail to the investor's registered e-mail address not later than four months from the date of closure of the relevant accounts year.

Investors who have not registered their email id, will have an option of receiving a physical copy of the Annual Report or Abridged Summary thereof.

Tata Mutual Fund will provide a physical copy of the abridged summary of the Annual Report, without charging any cost, on specific request received from a unitholder. Physical copies of the report will also be available to the unitholders at the registered offices at all times.

Tata Mutual Fund will publish an advertisement every year, in the all India edition of at least two daily newspapers, one each in English and Hindi, disclosing the hosting of the scheme wise annual report on the AMC website and on the website of AMFI.
