Change in Investment Pattern/Portfolio Rebalancing

Rebalancing due to Short Term Defensive Consideration:

Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations as per Paragraph 1.14.1.2.b of the Master Circular, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.

Rebalancing due to Passive Breaches:

In case of deviation in investment pattern due to passive breaches, the Fund Manager shall achieve a normal asset allocation pattern in a maximum period of 30 business days (mandated period). In case deviation in investment pattern is not rebalanced within the period indicated above then justification in writing for such delay including details of efforts undertaken to rebalance of portfolio shall be placed before the investment committee. The Investment Committee if so desires, can extend the timelines upto a maximum period of sixty (60) business days (extended period) from the date of mandated completion of rebalancing period of 30 business days.

In case the portfolio of schemes is not rebalanced within the aforementioned mandated period of 30 business days plus extended period of 60 business days, AMCs shall:

- not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- not to levy exit load, if any, on the investors exiting the scheme till investment pattern is rebalanced..

INVESTMENT STRATEGY

The Scheme, being a fund of funds scheme, will invest in units of Tata Nifty India Digital Exchange Traded Fund within the asset allocation pattern of the scheme. The Scheme may also invest a small portion of its corpus in money market securities and/or liquid / debt / money market schemes of Domestic Mutual Fund.

RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Scheme Specific Risk Factors:

Risks associated with investments in Units of Mutual Fund schemes

The Scheme will invest in Tata Nifty India Digital Exchange Traded Fund. Hence the performance of the Scheme would depend upon the performance of the underlying scheme. Any change in the investment policies or fundamental attributes of the underlying scheme will affect the performance of the Scheme. Investment in the exchange traded fund will have all the risks associated with the equity markets including price risk, credit risk and reinvestment risk. Periodical rebalancing could result in higher transaction costs. This being a Fund of Funds scheme, the investors are bearing the recurring expenses of the scheme in addition to the expenses of underlying scheme in which the scheme shall make investment. However, in line with the SEBI Regulations, the total expense ratio of the Scheme including weighted average of the total expense ratio levied by the underlying scheme shall not exceed the eligible percent of the daily net assets of the Scheme.

Concentration Risk of Investing in Specific Theme: Where investment is made in one or in a limited number of market sectors/theme, underlying scheme may be more volatile than other more diversified schemes. The companies within these theme/sectors may have limited markets, or financial resources, or may depend on a limited management group. Such Schemes may also be subject to rapid cyclical changes in investor activity, regulatory changes and / or the supply of and demand for specific products and services.

Risk associated with Fund of Fund schemes:

- The Scheme's performance will depend upon the performance of the Underlying Fund.
- Any change in the investment policy or the fundamental attributes of the Underlying Fund in which the Scheme invests may affect the performance of the Scheme.
- The portfolio disclosure of the Scheme will be largely limited to the particulars of the relevant Underlying Fund and investments by the Scheme in debt and money market instruments.
- The scheme specific risk factors of the underlying scheme become applicable where a fund of funds invest. Investors who intend to invest in Fund of Funds are required to and are deemed to have read and understood the risk factors of the underlying scheme in which Fund of Funds scheme invest in. Details of underlying fund is available on www.tatamutualfund.com.
- Dependence on the Investment Managers of the underlying scheme: The success of the underlying scheme depends on the ability of the respective Investment Managers to develop and implement investment strategies that achieve their investment objective. Moreover, subjective decisions

made by the Investment Manager may cause an underlying scheme to incur losses or to miss profit opportunities.

- As the investors are incurring expenditure at both the Fund of Funds level and the scheme into which the Fund of Funds invests, the returns that they may obtain may be materially impacted or may at times be lower than the returns that investors may obtain by directly investing in such schemes.
- As the Fund of Funds scheme will invest into an underlying scheme, the expense charged being dependent on the structure of the underlying scheme (being different), it may lead to a non-uniform charging of expenses over a period of time
- The fund of funds scheme may have different returns/performance than the underlying scheme due to various reasons. The return of the Fund of Funds may be adversely impacted by total expense ratio, cash drag, timing and pricing difference between the subscription/redemption in the Fund of Funds v/s underlying scheme, operational and transactional reasons etc
- The Fund of Funds scheme may invest in the underlying ETF through stock exchange, where market price of underlying ETF may be different from its Indicative Net Asset Value (INAV)/NAV. This may affect the performance of the scheme.
- The subscription and redemption in Fund of Funds scheme is also dependent on the liquidity of the underlying scheme. The illiquidity of the same may affect the performance of the Fund of Fund scheme.

Risks associated with investments in equity instruments by underlying scheme

The scheme specific risk factors of the underlying scheme become applicable where a fund of funds invests.

Investment Risks

Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.

The price of securities may go up or down depending on a variety of factors and hence investors may note that AMC/Fund Manager's investment decisions may not be always profitable. Although it is intended to generate capital appreciation and maximize the returns by actively investing in equity securities and utilizing debt and money market instruments as a defensive investment strategy. The price of securities may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Fund's investment objective will be attained or that the Fund may not be in a position to maintain the indicated percentage of investment pattern under exceptional circumstances. There is no guarantee the investment / dis-investment decision will result into profit.

Risk associated with underlying ETFs:

- **Index-Related Risk.** There is no guarantee that the underlying ETF's investment results will always have a high degree of correlation to those of the Underlying Index or that the underlying ETF will achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the underlying ETF's ability to completely mirror the portfolio with underlying index constituents. Errors in index data, index computations or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, which may have an adverse impact on the underlying ETF. Unusual market conditions may cause the Index Provider to postpone a scheduled rebalance, which could cause the Underlying Index to vary from its normal or expected composition
- **Passive Investment Risk.** The underlying ETF is not actively managed, and the fund manager does not take defensive positions under any market conditions, including declining markets.
- **Authorized Participant Concentration Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the underlying ETF, and none of those Authorized Participants is obligated to engage in creation and/or redemption transactions. The underlying ETF has a limited number of institutions that may act as Authorized Participants on an agency basis (i.e., on behalf of other market participants). To the extent that Authorized Participants exit the business or are unable to proceed with creation or redemption orders with respect to the underlying ETF and no other Authorized Participant is able to step forward to create or redeem, shares in the underlying ETF may be more likely to trade at a premium or discount to NAV and possibly face trading halts or delisting.
- **Tracking Error Risk.** The underlying ETF may be subject to tracking error, which is the divergence of its performance from that of the Underlying Index. Tracking error may occur because of differences between the securities and other instruments held in the ETF portfolio and those included in the Underlying Index, pricing differences (including, as applicable, differences between a security's price at the local market close and the ETF's valuation of a security at the time of calculation of

the Fund's NAV), transaction costs incurred by the ETF, the holding of uninvested cash, differences in timing of the accrual of or the valuation of dividends or interest, the requirements to maintain pass through tax treatment, portfolio transactions carried out to minimize the distribution of capital gains to shareholders, acceptance of custom baskets, changes to the Underlying Index or the costs to the ETF of complying with various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the ETF incurs fees and expenses, while the Underlying Index does not.

Risks associated with Debt/Money Markets Instruments Interest Rate Risk

As with debt/money instruments, changes in interest rate may affect the price of the money market instrument(s) and ultimately Scheme's net asset value. Generally, the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Risks associated with Segregated Portfolio

Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.

Security comprises of segregated portfolio may not realize any value.

Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risks associated with investing in Securities Segment and Tri-party Repo trade settlement:

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

Risks associated with transaction in Units through stock exchange(s)

In respect of transaction in Units of the Scheme through BSE and / or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control.

Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

For details on risk factors and risk mitigation measures, please refer SID.

PLANS AND OPTIONS

The Scheme has following plans across a common portfolio:

Regular Plan: This Plan is for investors who wish to route their investment through any distributor.

Compulsory Reinvestment of Income Distribution cum Capital Withdrawal Option:

In order to reduce the expenses of the scheme and also for the convenience of the investors, the income distribution cum capital withdrawal shall be compulsorily reinvested (for investors of non-electronic mode) within the scheme at the applicable ex-dividend NAV if income distribution cum capital withdrawal amount is less Rs.100 in the same option of the respective plans of the scheme at the ex- dividend rate.

Investor shall note that when units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains shall be credited to an Equalization Reserve Account and which can be used to pay income distribution cum capital withdrawal. Hence, income distribution cum capital withdrawal amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

Default Option: Investor should appropriately tick the 'option' (Growth or Payout of Income Distribution Cum Capital Withdrawal Option, Reinvestment of Income Distribution Cum Capital Withdrawal Option in the application form while investing in the Scheme. If no option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Direct Plan- Growth Option. If no income distribution cum capital withdrawal sub-option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Reinvestment of Income Distribution cum capital withdrawal option.

Default Plan: Investors are requested to note the following scenarios for the applicability of "Direct Plan (application not routed through distributor) or Regular Plan (application routed through distributor)" for valid applications received under the scheme:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct Plan	Direct Plan
3	Not mentioned	Regular Plan	Direct Plan
4	Mentioned	Direct Plan	Direct Plan
5	Direct Plan	Not Mentioned	Direct Plan
6	Direct Plan	Regular Plan	Direct Plan
7	Mentioned	Regular Plan	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

DIVIDEND POLICY

Income Distribution cum Capital Withdrawal Policy

Growth Option:

The income / profits received / earned would be accumulated by the Fund as capital accretion, aimed at achieving capital growth and reflected in the NAV.

Payout of Income Distribution cum capital withdrawal option

The profits received / earned and so retained and reinvested may be distributed as Income at appropriate rates (after providing for all relevant ongoing expenses, etc.) and at appropriate intervals as may be decided by the AMC and/or Trustee Company. It will be distributed to the unitholders who hold the units on the record date of declaration of the Income.

Investor shall note that when units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains shall be credited to an Equalization Reserve Account and which can be used to pay dividend. Hence dividend amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

Please note that the dividend distribution and its frequency is subject to availability of distributable surplus and at the discretion of the trustees

The Fund does not assure any targeted annual return / income nor any capitalisation ratio.
