

TATA SMALL CAP FUND

(An open ended equity scheme predominantly investing in small cap stocks)

(SCHEME CODE - TATA/O/E/SCF/18/08/0033)

This product is suitable for investors who are seeking*:

- Long Term Capital Appreciation.
- Predominant investment in equity/equity related instruments of small cap companies.

*Investors should consult their financial advisors if in doubt about whether the product is suitable for them.

Scheme Riskometer

Benchmark Riskometer

It may be noted that risk-o-meter specified above is based on internal assessment. The same shall be updated as per provision no. 17.4.1.i of SEBI Master Circular on Mutual Fund dated 27.06.2024, on Product labelling in mutual fund schemes on ongoing basis.

Units were offered at Rs. 10/- each for cash during the New Fund Offer & Continuous offer for units at NAV based prices, subject to applicable load.

New Fund Offer Opened On	19.10.2018
New Fund Offer Closed On	02.11.2018
Scheme Re-opened On	12.11.2018

Name of Mutual Fund	Name of Trustee Company	Name of Asset Management Company
Tata Mutual Fund 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051	Tata Trustee Co. Pvt. Ltd. 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051 CIN: U65991-MH-1995-PTC-087722	Tata Asset Management Pvt. Ltd. 1903, B-Wing, Parinee Crescenzo, G-Block, BKC, Bandra (East), Mumbai - 400 051 CIN: U65990-MH-1994-PTC-077090

This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. **For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, ,penalties & pending litigations etc. investors should, before investment, refer to the Scheme Information Document and Statement of Additional Information available free of cost at any of the Investor Service Centres or distributors or from the website www.tatamutualfund.com**

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

This Key Information Memorandum is dated 30 May 2025

INVESTMENT OBJECTIVE

The investment objective of the scheme is to generate long term capital appreciation by predominantly investing in equity and equity related instruments of small cap companies.

However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved. The Scheme does not assure or guarantee any returns.

Definition of Small Cap Companies

Small Cap companies are those companies which are classified as small cap companies by Securities and Exchange Board of India(SEBI) or Association of Mutual Funds in India (AMFI). At present Small Cap: 251st company onwards in terms of full market capitalization.

ASSET ALLOCATION PATTERN OF THE SCHEME

Under normal circumstances, funds of the Scheme, shall (after providing for all ongoing expenses) be invested / the indicative asset allocation shall be as follows considering the objective of the Scheme:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	
Equity and equity related instruments[^] of small cap companies^{\$}	65	100	High
Equity and equity related instruments [^] of other than small cap companies	0	35	High
Debt and Money Market Instruments including units of debt & liquid schemes of Tata Mutual Fund	0	35	Low to Medium
Units of REITs and InvITs #	0	10	Medium to High

^{\$} Small Cap companies are those companies which are classified as small cap companies by Securities and Exchange Board of India(SEBI) or Association of Mutual Funds in India (AMFI). At present Small Cap: 251st company onwards in terms of full market capitalization.

[^] The Scheme will comply with all the applicable circulars issued by SEBI as regard to exposure to derivatives viz. provision no. 5.2, 7.5, 7.6, 12.25, of SEBI Master Circular on Mutual Fund dated June 27, 2024. The cumulative gross exposure through equities, debt securities, REITs & InvITs and derivatives shall not exceed 100% of the net assets of the Scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. Cash Equivalent shall consist Government Securities, T-Bills & Repo on Government Securities.

The scheme may invest in another scheme under the same asset management company or any other mutual fund without charging any fees, provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund.

Due to market conditions, the AMC may invest beyond the range set out above. Such deviations shall normally be for a short term purpose only for defensive considerations and such deviation shall be subjected to 30 days rebalancing period.

Indicative Table (Actual instrument / percentages may vary subject to applicable SEBI circulars):

Sr. No.	Type of Instrument	Percentage of Exposure	SEBI Master Circular on Mutual Fund dated June 27, 2024 Reference
1	Securities Lending/ Short Selling	The scheme would limit its exposure, with regards to securities lending, for a single intermediary, to the extent of 5% of the total net assets of the scheme at the time of lending. The Scheme may engage in short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by SEBI.	Provision no. 12.11
2	Derivatives	The exposure to derivatives will not exceed 50% of the net assets of the scheme.	Provision no. 12.25
3	Securitized Debt	The Scheme may invest upto 50% of the scheme's debt exposure in domestic securitised debt.	Provision no. 12.15
4	Overseas Securities	The scheme shall not invest in Overseas Securities	Provision no. 12.19
5	# ReITS and INVITS	Investment in REITs & INVITS will be subject to limits and other restrictions as may be specified by SEBI from time to time. No mutual fund under all its schemes shall own more than 10% of units issued by a single issuer of REIT and InvIT; and A mutual fund scheme shall not invest - a) more than 10% of its NAV in the units of REIT and InvIT; and b) more than 5% of its NAV in the units of REIT and InvIT issued by a single issuer.	Provision no. 12..21
6	AT1 and AT2 Bonds	The scheme shall not invest in AT1 and AT2 Bonds	Provision no. 12.2
7	Any other instrument a) Credit Default Swaps (CDS) b) Repo / reverse repo in corporate debt securities	a) Will not invest in Credit Default Swaps (CDS) b) Will not invest in repo/reverse repo in corporate debt securities.	Provision no 12.3 Provision no 12.25.9

Change in Investment Pattern/ Portfolio Rebalancing

The Investment Patterns as outlined above are indicative. Investment strategy and pattern may be deviated from time to time, provided such modification is in accordance with the Scheme(s) objective and Regulations as amended from time to time, the intent being to protect the Net Asset Value of the scheme and unitholders' interests. In case of deviation due to passive breaches, the AMC will achieve a normal asset allocation pattern in a maximum period of 30 business days. In case deviation in investment pattern is not rebalanced within the period indicated above then justification in writing for such delay including details of efforts undertaken to rebalance of portfolio shall be placed before the investment committee. The Investment Committee if so desires, can extend the timelines upto sixty (60) business days from the date of mandated completion of rebalancing period.

In case the portfolio of schemes is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall:

- not be permitted to launch any new scheme till the time the portfolio is rebalanced.
not to levy exit load, if any, on the investors exiting the scheme.

INVESTMENT STRATEGY

The scheme seeks to achieve its investment objective by predominantly investing in equity /equity related instruments of small cap companies as well as a small portion in equity and equity related instruments of other than small cap companies.

The focus of this Scheme is to provide investors a reasonably diversified portfolio of small-cap stocks.

Definition of Small Cap Companies

Small Cap companies are those companies which are classified as small cap companies by Securities and Exchange Board of India (SEBI) or Association of Mutual Funds in India (AMFI). At present Small Cap: 251st company onwards in terms of full market capitalization.

The fund manager may invest across sectors, take cash calls, change allocation between the equity and fixed-income asset classes in a dynamic manner within the permitted limits and use derivatives for trading, hedging and portfolio balancing.

The Scheme may also invest some portion of the investible funds in debt and money market instruments including liquid and debt schemes of Tata Mutual fund as well as in hybrid instruments like REITs & InvITs.

The stocks under the Scheme will be selected after rigorous fundamental research which includes parameters like management competitiveness, business competitiveness, corporate governance, growth prospects, past track record etc.

Derivatives and Hedging Products:

The scheme will comply with all the applicable circulars issued by SEBI as regard to derivatives viz. provision no. 5.2, 7.5, 7.6, 12.25, of SEBI Master Circular on Mutual Fund dated June 27, 2024.

The cumulative gross exposure through equity, debt and derivative positions should not exceed 100% of the net assets of the scheme. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

Options:

An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

An option contract may be of two kinds:

- 1) Call option: An option that provides the buyer the right to buy is a call option. The buyer of the call option can call upon the seller of the option and buy from him the underlying asset at the agreed price. The seller of the option has to fulfil the obligation upon exercise of the option.
- 2) Put option: The right to sell is called a put option. Here, the buyer of the option can exercise his right to sell the underlying asset to the seller of the option at the agreed price.

Option contracts are classified into two styles:

(a) European Style

In a European option, the holder of the option can only exercise his right on the date of expiration only.

(b) American Style

In an American option, the holder can exercise his right anytime between the purchase date and the expiration date.

Interest Rate Swap & Forward Rate Agreements

An interest rate swap is a financial contract between two parties exchanging a stream of interest payments for a notional principal amount on multiple occasions during a specified period.

Typically, one party receives a pre-determined fixed rate of interest while the other party, receives a floating rate, which is linked to a mutually agreed benchmark with provision for mutually agreed periodic resets.

The Scheme shall make investment out of the NFO proceeds only on or after the closure of the NFO period in accordance with the investment objective of the scheme. In the event of non-receipt of the minimum subscription amount, the Trustee Company shall ensure that the entire amount collected as subscription money is refunded to the Unitholders notwithstanding any loss arising out of such investment during the interim period.

Trading in Derivatives by the Scheme

Futures:

A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific

future date. The price at which the underlying asset would change hands in the future is agreed upon at the time of entering into the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfill the terms of the contract. Currently, futures contracts have a maximum expiration cycle of 3-months. A futures contract on the stock market index gives its owner the right and obligation to buy or sell the portfolio of stocks characterized by the index. Stock index futures are cash settled; there is no delivery of the underlying stocks.

Example:

Index Future	
Assume, 1-month Nifty Future price on day 1:	10110
Scheme Buys	100 Future Contracts
(1 lot =Nominal Value equivalent to 75 units of the underlying index)	
Scenario 1	
On the date of Settlement, the future price (closing spot price of the index)	10200
Profit for the scheme (10200-10110) *100*75	675000
Scenario 2	
On the date of Settlement, the future price (closing spot price of the index)	10050
Loss for the scheme (10050-10110) *100*75	-450000

Risks associated with Future Contracts: Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks. The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets. Additional risks could be on account of illiquidity and potential mispricing of the futures.

Options:

An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

Example:

Call Option	
Say, Scheme buys 1 lot of Nifty Index	75 Units
Spot price	10000
Strike price	10100
Premium	100
Total amount paid as premium (Rs.) (100X75)	Rs.7500
Scenario 1: The Nifty Index goes up (i.e Nifty Spot)	10250
Scheme has reversed the position before expiry of the contract	
Current Premium at the time of reversal	200
Net Gain Rs. (200-100)	100
Total gain on 1 lot of Nifty (75 units) Rs.(75x100)	Rs.7500
Scheme has reversed the position (i.e Nifty Option) at expiry	
Nifty Spot on expiry	10275
Premium Paid(Rs.)	100
Exercise price	10100
Receivables on Exercise (10275-10100)	175
Total gain (Rs.) (175 -100) *75	Rs.5625
Scenario 2: The Nifty index moves to the level below 10100	
Scheme does not gain anything but the loss to the scheme (limited to the actual premium paid)	Rs. 7500

Put Option	
Say, Scheme buys 1 lot of Nifty Index	75 Units
Spot Price	10000
Strike Price	9450
Premium	50
Total Amount Paid by the Scheme (75*50)	3750
Scenario 1: Nifty Index goes down	

Scheme has reversed the position before expiry of the contract	
Nifty Spot	9300
Current Premium at the time of reversal	80
Premium Paid (Rs.)	50
Net Gain (Rs.80-50)	30
Total Gain on 1 lot of Nifty (Rs.) (75x30)	Rs.2250
Scheme has reversed the position at expiry	
Nifty Spot	9375
Premium Paid (Rs.)	50
Exercise Price	9450
Gain on Exercise	75
Total Gain Rs.(75-50)*75)	Rs.1875
Scenario 2: If Nifty Index Stays over the Strike price of 9450	
Say Nifty Spot	9500
Net Loss to the Scheme will be premium paid	Rs.3750

Risks associated with Option Contracts: The option contracts give a person the right but not an obligation to buy or sell. The risk is potential mispricing and exposure to options can limit the profits from a genuine investment transaction.

The scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced from time to time and as may be permitted under the SEBI (Mutual Fund) Regulations.

Interest Rate Swaps: An Interest Rate Swap is an agreement whereby two parties agree to exchange periodic interest payments. The amount of interest payments exchanged is based on some predetermined principal, called notional principal amount. The amount each counterparty pays to the other upon periodic interest rate multiplied by the notional principal amount. The only amount that is exchanged between the parties is the interest payment, not the notional principal amount.

Example: Use of IRS

The fund is reasonably invested, and the view of the fund manager is, interest rates are expected to move up due to certain negative events which have occurred. In such cases the scheme can enter into a paid position (IRS) where the scheme will pay a fixed rate for a specified maturity and receive the floating rate of interest. This is illustrated below:

Example A: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is bearish and call rates are likely to spurt over the next three months. The fund manager would therefore prefer to pay fixed rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days floating interest rate from overnight fixed rate.

1. Say Notional Amount: Rs. 2 crores
2. Benchmark: NSE MIBOR
3. Tenor: 91 Days
4. Fixed Rate: 9.90%
5. At the end of 91 days;
6. The Scheme pays: fixed rates for 91 days is 9.90%
7. TMF receives: compounded call rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. $2,00,00,000 \times 0.35\% \times 91 / 365 = 17,452$. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

In view of the fund manager interest rates are expected to move down due to certain positive events which have occurred. In such cases the scheme can enter into a received position (IRS) where the scheme will receive a fixed rate for a specified maturity and pay the floating rate of interest. This is illustrated below:

Example B: Use of IRS

Assuming the Scheme is having 10% of the portfolio in cash. The fund manager has a view that the interest rate scenario is soft and call rates are unlikely to spurt over the next three months. The fund manager would therefore prefer to receive a higher rate of return on his cash, which he is lending in the overnight call market. In other words, he would like to move to a 91 days fixed interest rate from overnight floating rate.

1. Say Notional Amount: Rs. 2 crores
2. Benchmark: NSE MIBOR

3. Tenor: 91 Days

4. Fixed Rate: 10.25%

5. At the end of 91 days;

6. The Scheme pays: compounded call rates for 91 days is 9.90%

7. TMF receives: Fixed rate at 10.25% for 91 days.

In practice, however the difference of the two amounts is settled. Here the Scheme receives Rs. $2,00,00,000 \times 0.35\% \times 91 / 365 = 17,452$. The players in IRS are scheduled commercial banks, primary dealers, corporate, mutual funds and All India Financial Institutions.

Forward Rate Agreements (FRA):

This is an agreement between two counterparties to pay or to receive the difference between an agreed fixed rate (the FRA rate) and the interest rate prevailing on a stipulated future date based on the notional amount, for an agreed period.

Illustration:

Assume that on September 1, 2023, the 30-day commercial paper (CP) rate is 7.75% and the Scheme has an investment in a CP of face value Rs. 50 crores, which is going to mature on September 30, 2023. If the interest rates are likely to remain stable or decline after September 30, 2023, and if the fund manager, who wants to re-deploy the maturity proceeds for 1 more month, does not want to take the risk of interest rates going down, he can then enter into a following forward rate agreement (FRA) say as on September 30, 2023:

He can receive 1 X 2 FRA on September 30, 2023 at 7.75% (FRA rate for 1-month lending in 2 months' time) on the notional amount of Rs.50 crores, with a reference rate of 30 day CP benchmark. If the CP benchmark on the settlement date i.e. September 30, 2023 falls to 7.50%, then the Scheme receives the difference 7.75 - 7.50 i.e. 25 basis points on the notional amount Rs. 50 crores for 1 month. The maturity proceeds are then reinvested at say 7.50% (close to the benchmark). The scheme, however, would have locked in the rate prevailing on September 30, 2023 (7.75%) as it would have received 25 basis points more as settlement amount from FRA. Thus the fund manager can use FRA to mitigate the reinvestment risk.

In this example, if the rates move up by 25 basis points to 8% on the settlement date (September 30, 2023), the Scheme loses 25 basis points but since the reinvestment will then happen at 8%, effective returns for the Scheme is unchanged at 7.75%, which is the prevailing rate on September 30, 2023.

Risks associated with Forward Rate Contracts:

When entering into an FRA, both parties to the contract entail credit risk exposure. The additional risks could be on account of lack of opportunity, illiquidity.

With effect From October 01, 2010, the above derivative exposure limits shall be subject to following Exposure Limits as specified in provision no. 12.24.1 and 12.25 of SEBI Master Circular on Mutual Fund dated June 27, 2024:

1. *The cumulative gross exposure through equity, debt and derivative positions shall not exceed 100% of the net assets of the scheme.*
2. *Mutual Funds shall not write options or purchase instruments with embedded written options.*
3. *The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.*
4. *Cash or cash equivalents with residual maturity of less than 91 days shall be treated as not creating any exposure.*
5. *Exposure due to hedging positions shall not be included in the above mentioned limits subject to the following:*
 - a) *Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.*
 - b) *Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.*
 - c) *Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.*
 - d) *The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.*
6. *Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.*

7. *Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.*

Definition of Exposure in case of Derivative Positions

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price*Lot Size*Number of Contracts
Short Future	Futures Price*Lot Size* Number of Contracts
Option Bought	Option Premium Paid*Lot Size* Number of Contracts.

In Addition to the above, SEBI has also prescribed following derivative position limits:

Position Limits for Mutual Fund and its scheme:

Position limit for Index Options and Index Futures contracts	
Index Options Contract*	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index options contracts, whichever is higher.
Index Futures Contract**	On a particular underlying index Rs.500 Crore or 15% of the total open interest of the market in equity Index futures contracts, whichever is higher.

* This limit would be applicable on open positions in all options contracts on a particular underlying index.

** This limit would be applicable on open positions in all futures contracts on a particular underlying index.

Additional position limit for hedging	
In addition to the position limits as mentioned above, Mutual Funds may take exposure in equity index derivatives subject to the following limits:	Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.
Position limit for Stock Options and Stock Futures contracts	
The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL). This limit would be applicable on aggregate open positions in all futures and all option contracts on a particular underlying stock.	

Position limit for each scheme of a Mutual Fund

The scheme-wise position limit requirements shall be:

- For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a mutual fund shall not exceed the higher of:
 - 1% of the free float market capitalization (in terms of number of shares). Or
 - 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts)
- This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
- For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all scheme put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

For detailed risk associated with use of derivatives, please refer paragraph "Scheme Specific risk factors".

RISK PROFILE OF THE SCHEME

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Scheme Specific Risk Factors:

Small-cap stocks are generally illiquid in terms of trading volumes; investors should understand that liquidity risks in these stocks are higher and may hamper the ability of the scheme to pay redemption proceeds in time.

While small cap companies may offer substantial opportunities for capital

appreciation, there are also at least commensurate risks. Historically, these companies have been more volatile in price than larger company securities, especially over the short term. Among the reasons for the greater price volatility are the less certain growth prospects of smaller companies, the lower degree of liquidity in the markets for such securities, lack of transparency and the greater sensitivity of smaller companies to changing economic conditions.

In addition, small-cap companies may lack depth of management, be unable to generate funds necessary for growth or development, or be developing or marketing new products or services for which markets are not yet established and may never become established. They could also suffer from disadvantages such as outdated technology, lack of bargaining power with suppliers, low entry barriers and inadequate management depth.

Risk Associated with underlying asset:

The price of the securities may go up or down depending on a variety of factors and hence investors may note that AMC/Fund Manager's investment decisions may not be always profitable although it is intended to generate capital appreciation and maximise the returns by actively investing in equity securities and utilising debt and money market instruments as a defensive investment strategy.

Investment in Equity & Equity related instruments are volatile and prone to fluctuations on a daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro-economic factors affecting the capital markets. Investment in equity and equity related instrument including derivative contracts involve high degree of risks as compare to investment in debt & money market instruments.

Investment in debt instruments are subject to the risk of an issuers inability to meet interest and principal payments on its obligations and market perception of the credit worthiness of the issuer. Changes in the interest rate may also affect the price of the debt instrument(s) and ultimately schemes net asset value.

Derivative products are leveraged instruments. Derivatives require maintenance of adequate controls and the ability to assess the risk that a derivative add to the portfolio and the ability to forecast the price of securities being hedged and interest rate movement correctly. It can provide disproportionate gains as well as disproportionate losses to the investors.

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.

The price of securities may also be affected generally by factors like foreign investments, currency exchange rates, change in the Government and Reserve Bank of India Policy, Taxation, Political or other developments, closure of stock exchange etc.

Investors should understand that the investment pattern indicated, in line with prevailing market conditions is only a hypothetical example as all investments involve risk and there is no assurance that the Fund's investment objective will be attained and investor should not invest in the scheme unless they can afford to take the risks.

Liquidity and Settlement Risks

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, transfer procedures and settlement periods. From time to time, the Scheme will invest in certain securities of certain companies, industries, sectors, etc. based on certain investment parameters as adopted internally by AMC. While at all times the AMC will endeavour that excessive holding/investment in certain securities of industries, sectors, etc. by the Scheme is avoided, the funds invested by the Scheme in certain securities of industries, sectors, etc. may acquire a substantial portion of the Scheme's investment portfolio and collectively may constitute a risk associated with non-diversification and thus could affect the value of investments. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio.

Risk associated with Short Selling

The Scheme may enter into short selling transactions, subject to SEBI and RBI Regulations. Short-selling is the sale of shares that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock he shorted and returns the stock to close out the borrowing. If the price of the stock has fallen, he can buy the stock back for less than he received for selling it and profits from it (the difference between higher short sale price and the lower purchase price). However, Short positions carry the risk of losing money and these losses may grow theoretically unlimited if the stock price increases without limit and shall result into major losses in the portfolio. For example, if dealer/fund manager short 1000 shares at Rs.650 each hoping to make a profit but the share price increase to Rs.900, portfolio will end up losing Rs.250,000 (1000*250).

Securities Lending Risks

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme(s) will not be able to sell such lent out securities until they are returned.

Securities Lending by the Mutual Fund

The Scheme may participate in securities lending and borrowing scheme in accordance with Securities Lending Scheme, 1997, Regulation 44 (4) of SEBI (Mutual Funds) Regulations ,1996, provision no. 12.11 of SEBI Master on Mutual Fund circular no MFD/CIR/01/047/99 dated June 27, 2024, framework for short selling and borrowing and lending of securities notified in, provision no. 12.11.2.1.a of SEBI Master circular on Mutual Fund dated June 27, 2024. The Scheme shall also follow other relevant regulations /guidelines issued by stock exchange(s) from time to time. The Scheme shall participate in Securities Borrowing and Lending only with the SEBI approved intermediaries.

Securities Lending means the lending of securities to SEBI approved intermediaries for a fixed period of time at a negotiated compensation in order to enhance returns of the scheme portfolio. The securities lent will be returned by the borrower on the expiry of the stipulated period.

Collateral would always be obtained by the approved intermediary. Collateral value would always be more than the value of the security lent. Collateral can be in form of cash, bank guarantee, and government securities, as may be agreed upon with the approved intermediary, and would also be subject to a mark to market valuation on a daily basis.

Example:

A scheme has a security of a company which it would wish to hold for a long period of time as a core holding in the portfolio as per the fund manager's plan. In that case the investors would be benefited only to the extent of the rise in the value of the security, from time to time if any, on the exchange. If the scheme is enabled to lend the said security to a borrower who would be wanting to take advantage of the market fluctuations in its price, the borrower would return the security to the lender (fund) at a stipulated time or on demand for a negotiated compensation. The scheme's unitholders can enhance their returns to the extent of the compensation it will earn for lending the same. An adequate security or collateral will have to be maintained by the intermediary. This should always be higher than the cost of the security. Thus it is in the interest of the investors that returns can be enhanced by way of stock lending rather than hold the security only for capital appreciation potential.

Thus the scenario under which the scheme would participate in stock lending would be:

1. There is a holding of security e.g. of XYZ Ltd in the scheme which the fund manager wants to be the core holding of the fund for approximately 6 to 12 months.
2. There is a borrower (not mutual fund) for the security, (who has taken a short position in the market and needs the said security of XYZ Ltd to settle it) who is willing to put up a proper collateral for the same. (In all cases higher than the price of the script).
3. The borrower is represented by a proper recognized intermediary.
4. The agreement is to return the security or the amount so negotiated at a particular period of time or on demand.

Then the security will be lent by the scheme and the unitholders would benefit from the additional compensation earned for lending, apart from the capital appreciation which also happens in that stock. Thus, to summarize, stock lending would be done by the scheme only in the following circumstances:

- a) If permitted by trustees and the extent SEBI regulations in that regard, from time to time.
- b) If such activity generates additional returns for the scheme and helps to enhance the scheme returns.
- c) If considering the above and other factors all considered in totality, such activity is in the interest of unitholders in the scheme.

Risk Factors Associated with Investments in REITs and InvITS:

- **Market Risk:** REITs and InvITs Investments are volatile and subject to price fluctuations on a daily basis owing to factors impacting the underlying assets. AMC/Fund Manager's will do the necessary due diligence but actual market movements may be at variance with the anticipated trends.

- **Liquidity Risk:** As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes, settlement periods, dissolution of the trust, potential delisting of units on the exchange etc, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk.
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns.
- **Regulatory/Legal Risk:** REITs and InvITs being new asset classes, rights of unit holders such as right to information etc may differ from existing capital market asset classes under Indian Law.

The above are some of the common risks associated with investments in REITs & InvITs. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risk Associated with Debt Instruments

Interest Rate Risk

As with debt instruments, changes in interest rate may affect the price of the debt instrument(s) and ultimately Scheme's net asset value. Generally the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

Credit Risk

Credit risk or Default risk refers to the risk that an issuer of a fixed income security may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk corporate debentures are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of fixed income securities will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

Reinvestment Risk

This risk refers to the difference in the interest rate levels at which cash flows received from the securities in the scheme is reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows are reinvested may be lower than that originally assumed.

Counterparty Risk:

This is the risk of failure of counterparty to the transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the scheme in case of counterparty default.

Derivatives carry the risk of adverse changes in the market price. The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Although for exchange traded derivatives, the risk is mitigated as the exchange provides the guaranteed settlement however in OTC trades the possibility of settlement is limited.

Risk associated with potential change in Tax structure

This summary of tax implications given in the taxation section (Units and Offer Section III) is based on the current provisions of the applicable tax laws. This information is provided for general purpose only. The current taxation laws may change due to change in the 'Income Tax Act 1961' or any subsequent changes/amendments in Finance Act/Rules/Regulations. Any change may entail a higher outgo to the scheme or to the investors by way of securities transaction taxes, fees, taxes etc. thus adversely impacting the scheme and its returns.

Securitized Debt:

Securitized Debt such as Mortgage Backed Securities ("MBS") or Asset Backed Securities ("ABS") is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. Asset Securitization is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitization involves sale of specific receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company.

The SPV in turn issues financial instruments (promissory notes, participation certificates or other debt instruments) also referred to as "Securitized Debt" to the investors evidencing the beneficial ownership of the investors in the receivables. The financial instruments are rated by an independent credit rating agency.

Risks Associated with Securitised Debt

Risk due to prepayment: In case of securitized debt, changes in market interest rates and pre-payments may not change the absolute amount of receivables for the investors but may have an impact on the reinvestment of the periodic cash flows that an investor receives on securitized papers. In the event of pre-payment of the underlying debt, investors may be exposed to changes in tenor and yield.

Liquidity Risk: Presently, despite recent legal developments permitting the listing of securitized debt instruments, the secondary market for securitized debt in India is not very liquid. Even if a more liquid market develops in the future, secondary transactions in such instruments may be at a discount to initial issue price due to changes in the interest rate structure.

Limited Recourse and Credit Risk: Certificates issued on investment in securitized debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors and thereby, adversely affect the NAV of the Scheme. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low.

Bankruptcy Risk: If the originator of securitized debt instruments in which the Scheme invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', then the Scheme could experience losses or delays in the payments due. Normally, care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'.

Risk of Co-mingling: Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the Servicer fails to remit such funds due to investors, investors in the Scheme may be exposed to a potential loss.

Risks associated with Derivatives

- Derivative products are leverage instruments and can provide disproportionate gains as well as disproportionate losses to the investors. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involved uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies.
- Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative add to the portfolio and the ability to forecast price of securities being hedged and interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments".
- The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.
- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. The counter party may default on a transaction before settlement and therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavourable) market price.
- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of

leverage involved in futures pricing and the potential high volatility of the futures markets.

- Where derivatives are used for hedging, such use may involve a basic risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Risks Factors associated with transaction in Units through stock exchange(s)

In respect of transaction in Units of the Scheme through BSE and / or NSE, allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by BSE and / or NSE and their respective clearing corporations on which the Fund has no control.

Risk Control / Mitigation measures for equity investments and related investments:

Investment in equity has an inherent market risk which cannot be mitigated completely. However following measures have been implemented with an objective to mitigate /control other risks associated with equity investing:

Nature of Risk	Mitigation Measures for Equity Investments
Liquidity Risk	A periodic review of the liquidity position of each security is conducted (market capitalization, average volume in the market vis-à-vis portfolio holding).
Concentration Risk	This risk cannot be mitigated in totality however, regulatory as well as internal industry specific limits are adhered to so as to diversify and minimize concentration risk (other than in sector funds).
Specific Risk	Investments are made in a pre-approved universe of securities based on strong fundamental research. New securities are added with the approval of the Investment Committee.
Performance Risk	A periodical review of scheme performance vis-à-vis the benchmark index as well as peer group is conducted.
Regulatory Risk	Online monitoring of various exposure limits are carried out through the Front Office System. As a further step, manual controls are also implemented.

Risk Mitigation measures for Debt and related Investments:

Nature of Risk	Mitigation Measures for Debt Investments
Liquidity Risk	- There is a strong focus on investing in quality paper at the time of portfolio construction - Portfolio exposure is spread over various maturity buckets so as to be in line with maturity of a scheme
Credit Risk	- In house dedicated team for credit appraisal - Issuer wise exposure limits are maintained - Rating wise exposure limits are maintained - Periodically portfolios are reviewed by the Board of the AMC
Interest Rate Risk	- A close watch on market events is maintained - Duration management is actively followed - Portfolio exposures are spread over various maturities
Performance Risk	A periodical review of scheme performance vis-à-vis the benchmark index as well as peer group is conducted.

Risk Control / Mitigation measures for Debt and related Investments:

Risk Controls for Securitised Debt

1. Risk profile of securitized debt vis a vis risk appetite of the scheme:

Securitized Debt is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. In line with the investment strategy of the Scheme and considering that there would be no intermediate redemption pressures for the Fund Manager, the Scheme may take exposure to rated Securitized Debt with the intent to enhance portfolio yield without compromising on credit quality.

Further as a prudent measure of risk control, Investment in Securitized Debt will not exceed 50% of the debt exposure of the Scheme.

2. Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc.

The evaluation parameters of the originators are as under:

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
 - Outlook for the economy (domestic and global)
 - Outlook for the industry
 - Company specific factors

Track record

We ensure that there is adequate past track record of the Originator before selection of the pool including a detailed look at the number of issuances in past, track record of issuances, experience of issuance team, etc. We also look at the credit profile of the Originator for its own debt. We normally invest only if the Originator's credit rating is at least 'AA' (+/- or equivalent) or above by a credit rating agency recognized by SEBI.

Willingness to pay

As the securitized structure has underlying collateral structure, depending on the asset class, historical NPA trend and other pool / loan characteristics, a credit enhancement in the form of cash collateral, such as fixed deposit, bank guarantee etc. is obtained, as a risk mitigation measure.

Ability to pay

This assessment is based on a detailed financial risk assessment.

A traditional SWOT analysis is used for identifying company specific financial risks. One of the most important factors for assessment is the quality of management based on its past track record and feedback from market participants. In order to assess financial risk a broad assessment of the issuer's financial statements is undertaken to review its ability to undergo stress on cash flows and asset quality.

Business risk assessment, wherein following factors are considered:

- Outlook for the economy (domestic and global)
- Outlook for the industry
- Company specific factors

In addition a detailed review and assessment of rating rationale is done including interactions with the company as well as agency.

Typically we would avoid investing in securitization transaction (without specific risk mitigant strategies / additional cash/security collaterals/ guarantees) if we have concerns on the following issues regarding the originator / underlying issuer:

- High default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios - both on a standalone basis as well on a fated level/ group level. This is very important in case of single borrower loan sell down
- Higher proportion of re-schedulement of underlying assets of the pool or loan
- Higher proportion of overdue assets of the pool or the underlying loan
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan

3. Risk mitigation strategies for investments with each kind of originator

Risk Mitigation Strategies

Investments in securitized debt will be done based on the assessment of the originator which is carried out by the Fixed Income team based on the in-house research capabilities as well as the inputs from the independent credit rating agencies.

In order to mitigate the risk at the issuer/originator level, the Fixed Income team will consider various factors which will include:

- size and reach of the originator
- the infrastructure and follow-up mechanism
- quality of information disseminated by the issuer/originator; and
- the Credit enhancement for different type of issuer/originator
- the originator's track record in that line of business

4. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

Majority of securitized debt investments shall be in asset backed pools wherein the underlying assets could be Medium and Heavy Commercial

Vehicles, Light Commercial Vehicles (LCV), Cars, and Construction Equipment, Mortgages etc.

The Fund Manager will invest in securitized debt which are rated 'AA' (+/- or equivalent) or above by a credit rating agency recognized by SEBI. While the risks mentioned above cannot be eliminated completely, they may be minimized by considering the diversification of the underlying assets as well as credit and liquidity enhancements.

Table 1: illustrates the framework that will be applied while evaluating investment decision relating to a pool securitization transaction:

Characteristics/ Type of Pool	Mortgage Loan	Commercial Vehicle and Construction Equipment	CAR	2 wheelers	Micro Finance Pools	Personal Loans	Single Sell Downs	Others
Approximate Average maturity (in Months)	Up to 120 months	Up to 60 months	Up to 60 months	Up to 60 months	Up to 12 months	Up to 36 months	Case by case basis	Any other class of securitized debt would be evaluated on a case by case basis
Collateral margin (including cash , guarantees, excess interest spread, sub ordinate tranche)	In excess of 3%	In excess of 5%	In excess of 5%	In excess of 5%	In excess of 10%	In excess of 10%	Case by case basis	
Average Loan to Value Ratio	95% or lower	100% or lower*	95% or lower	95% or lower	Unsecured	unsecured	Case by case basis	
Average seasoning of the Pool	Minimum 3 months	Minimum 6 months	Minimum 6 months	Minimum 6 months	Minimum 1 month	Minimum 2 months	Case by case basis	
Maximum single exposure range	5%	5%	1%	1%	<1%	<1%	Case by case basis	
Average single exposure range %	<5%	<5%	<1%	<1%	<1%	<1%	Case by case basis	

* LTV based on chasis value

Note: The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same.

In addition to the framework as per the table above, we also take into account following factors, which are analyzed to ensure diversification of risk and measures identified for less diversified investments:

- Size of the loan: The size of each loan is generally analyzed on a sample basis and an analysis of the static pool of the originator is undertaken to ensure that the same matches with the static pool characteristics. It also indicates whether there is high reliance on very small ticket size borrower which could result in delayed and expensive recoveries.
- Average original maturity of the pool: The analysis of average maturity of the pool is undertaken to evaluate whether the tenor of the loans are generally in line with the average loans in the respective industry and repayment capacity of the borrower.
- Default rate distribution: The Fixed Income team generally ensures that all the contracts in the pool are current to ensure zero default rate distribution.
- Geographical Distribution: The analysis of geographical distribution of the pool is undertaken to ensure prevention of concentration risk.
- Risk Tranching: Typically, we avoid investing in Securitized debt in the form of sub ordinate tranche, without specific risk mitigant strategies / additional cash / security collaterals/ guarantees, etc.
- Credit enhancement facility - credit enhancement facilities in the form of cash collateral, such as fixed deposits, bank guarantee etc could be obtained as a risk mitigation measure.
- Liquid facility - these parameters will be evaluated based on the asset class as mentioned in the table above
- Structure of the pool of underlying assets - The structure of the pool of underlying assets would be either single asset class or combination of various asset classes as mentioned in the table above. We could add new asset class depending upon the securitization structure and changes in market acceptability of asset classes

Investment in the Single Loan Securitization would be done based on the assessment of credit risk associated with the underlying borrower as well as the originator. The Fixed Income team will adhere internal credit process and perform a detailed review of the underlying borrower prior to making investments.

5. Minimum retention period of the debt by originator prior to securitization

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements. In addition, RBI has proposed minimum holding period of between nine and twelve months for assets before they can be securitized. The minimum holding period depends on the tenor of the securitization transaction. The Fund will invest in securitized debt that are Compliant with the laws and regulations.

6. Minimum retention percentage by originator of debts to be securitized

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements, including maximum exposure by the originator in the PTCs. In addition, RBI has proposed minimum retention requirement of between five and ten percent of the book value of the loans by the originator. The minimum retention requirement depends on the tenor and structure of the securitization transaction. The Fund will invest in securitized debt that are compliant with the laws and regulations.

7. The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund

An investment by the scheme in any security is done after detailed analysis by the Fixed Income team and in accordance with the investment objectives and the asset allocation pattern of a scheme. All investments are made on an arm's length basis without consideration of any investments (existing/potential) in the schemes made by any party related/involved in the transaction. The robust credit process ensures that there is no conflict of interests when a scheme invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme. Normally the issuer who is securitizing instrument is in need of money and is unlikely to have long term surplus to invest in mutual fund scheme.

Furthermore, there is clear cut segregation of duties and responsibilities with respect to Investment function and Sales function. Investment decisions are being taken independently based on the above mentioned parameters and investment by the originator in the scheme is based on their own evaluation of the scheme vis a vis their investment objectives.

8. The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

The risk assessment process for securitized debt, as detailed in the preceding paragraphs, is same as any other credit. The investments in securitized debt are done after appropriate research by credit analyst. The ratings are monitored for any movement.

The resources for and mechanisms of individual risk assessment with the AMC for monitoring investment in securitized debt are as follows:

- Fixed Income Team - Risk assessment and monitoring of investment in Securitized Debt is done by a team comprising of Credit team.
- Ratings are monitored for any movement - Based on the cash-flow report and analyst view, periodic review of utilization of credit enhancement shall be conducted and ratings shall be monitored accordingly.
- Wherever the schemes portfolio is disclosed, the AMC may give a comprehensive disclosure of Securitized debt instruments held in line with SEBI requirement.

Note: The information contained herein is based on current market conditions and may change from time to time based on changes in such conditions, regulatory changes and other relevant factors. Accordingly, our investment strategy, risk mitigation measures and other information contained herein may change in response to the same..

PLANS AND OPTIONS

Regular Plan (For applications routed through Distributors)

- Growth Option
- Income Distribution cum capital withdrawal option (IDCW)

Direct Plan (For applications not routed through Distributors)

- Growth Option
- Income Distribution cum capital withdrawal option (IDCW)

Income Distribution option has sub-options of Payout of Income Distribution cum capital withdrawal option (IDCW- Payout), Reinvestment of Income Distribution cum capital withdrawal option (IDCW- Reinvestment).

Transfer of Income Distribution cum capital withdrawal option (IDCW-Transfer) facility also available for investors who opt for Reinvestment of Income Distribution cum capital withdrawal option (IDCW- Reinvestment).

Please note that the income distribution shall be distributed at the discretion of the Trustees subject to availability of distributable surplus.

Default Option: Investor should appropriately tick the 'option' (Income Distribution cum capital withdrawal option or growth) and sub-options (Payout of Income Distribution cum capital withdrawal option , Reinvestment of Income Distribution cum capital withdrawal option in the application form while investing in the Scheme. If no option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Direct Plan- Growth Option of the scheme. If no income distribution sub-option is mentioned / indicated in the application form by the investor then the units will, by default, be allotted under the Reinvestment of Income Distribution cum capital withdrawal option (IDCW-Reinvestment sub-option).

Compulsory Reinvestment of Income Distribution amount:

In order to reduce the expenses of the scheme and also for the convenience of the investors the income distribution amount shall be compulsorily reinvested within the scheme at the applicable ex-dividend. In case of reinvestment, the units will be allotted at applicable ex-dividend NAV in lieu of income distribution. If income distribution payable under Payout of Income Distribution cum capital withdrawal option is less than Rs. 100/-,

then amount would be compulsorily reinvested in the respective plan/option of the Scheme.

Regular Plan (For applications routed through Distributors)

Direct Plan (For applications not routed through Distributors)

Default Plan: Investors are requested to note the following scenarios for the applicability of "Direct Plan(application not routed through distributor) or Regular Plan(application routed through distributor)" for valid applications received under the plan of the scheme:

Scenario	Broker Code mentioned by the investor	Plan mentioned by the investor	Default Plan to be captured
1	Not mentioned	Not mentioned	Direct Plan
2	Not mentioned	Direct Plan	Direct Plan
3	Not mentioned	Regular Plan	Direct Plan
4	Mentioned	Direct Plan	Direct Plan
5	Direct Plan	Not Mentioned	Direct Plan
6	Direct Plan	Regular Plan	Direct Plan
7	Mentioned	Regular Plan	Regular Plan
8	Mentioned	Not Mentioned	Regular Plan

In cases of wrong/ invalid/ incomplete ARN codes mentioned on the application form, the application shall be processed under Regular Plan. The AMC shall contact and obtain the correct ARN code within 30 calendar days of the receipt of the application form from the investor/ distributor. In case, the correct code is not received within 30 calendar days, the AMC shall reprocess the transaction under Direct Plan from the date of application without any exit load.

APPLICABLE NAV (after the scheme opens for subscriptions and redemptions)

Applicable NAV for Subscription / Switch-in: Cut Off Timing 3.00 pm

Particulars	Applicable NAV
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are available for utilization before the cut-off time i.e. credited to the bank account of the scheme before the cut-off time.	The closing NAV of the same day.
Valid applications received (time-stamped) after 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme either on the same day or before the cut-off time of the next Business Day i.e. available for utilization before the cut-off time of the next Business Day.	The closing NAV of the next Business Day.
Valid applications received (time-stamped) upto 3.00 p.m. and where the funds for the entire amount are credited to the bank account of the scheme after the cut-off time on the same day i.e. available for utilization after the cut-off time of the Day.	The closing NAV of the next Business Day.
Where the application is time stamped any day before the credit of the funds to the scheme but the funds for the entire amount are credited to the bank account of the scheme before the cut-off time on any subsequent Business Day i.e. available for utilization before the cut-off time on such subsequent Business Day.	The closing NAV of such subsequent Business Day on which funds are available for utilisation.

Realisation of funds means funds available to the AMC Scheme Account and not date and time of debit from Investor's account.

In case application is time stamped after cut off timing on any day, the same will be considered as deemed to be received on the next business day.

In case funds are realised after cut-off timing on any day, the same will be considered as deemed to be realised / available for utilisation on the next business day.

For Switch-ins including Systematic Investment Plan (SIP), Systematic Transfer Plan (STP) of any amount:

For determining the applicable NAV, the following shall be ensured:

- Application for switch-in is received before the applicable cut-off time.
- Funds for the entire amount of subscription / purchase as per the switch-in request are credited to the bank account of the Scheme before the cut-off time, and the funds are available for utilization before the cut-off time.
- In case of switch/STP transactions, funds will be made available for utilization in the switch-in- scheme based on the redemption payout cycle of the switch out

Scheme Redemption /Switch Out: In respect of application received upto 3 p.m., closing NAV of the day of receipt of application shall be applicable and in respect of application received after 3 p.m. closing NAV of next business day.

Outstation cheques/demand drafts will not be accepted.

Valid application for "switch out" shall be treated as redemption and for "switch in" shall be treated as purchases and the relevant NAV of "Switch in" and "Switch Out" shall be applicable accordingly.

MINIMUM APPLICATION AMOUNT / NUMBER OF UNITS UNDER EACH PLAN

Purchase: Minimum subscription amount for the scheme: Rs 5,000/- and in multiple of Re.1/- thereafter

Additional Purchase: Rs.1000/-& in multiples of Re.1/-thereafter.

Redemption: Redemption request can be made for a minimum of Rs.500/50 units or folio balance whichever is lower.

The minimum redemption amount wherever specified in the concerned SIDs & KIMs will not be applicable for investment made in schemes of the Fund in compliance with the provision no. 6.10 of SEBI Master on Mutual Fund dated June 27, 2024 (Alignment of interest of Designated Employees of Asset Management Companies (AMCs) with the Unitholders of the Mutual Fund Schemes).

There is no minimum amount requirement, in case of investors opting to switch “all units” from any existing schemes of Tata Mutual Fund to this Scheme.

DESPATCH OF REDEMPTION REQUEST

The redemption proceeds will be dispatched to the unit holders within three working days from the date of redemption or repurchase, subject to exceptional circumstances as mentioned further in Scheme Information Document.

BENCHMARK INDEX

Nifty SmallCap 250 TRI Index (Tier 1)

DIVIDEND POLICY

Income Distribution cum Capital Withdrawal Policy

Growth Option:

The income / profits received / earned would be accumulated by the Fund as capital accretion, aimed at achieving capital growth.

Income Distribution cum capital withdrawal Policy:

The profits received / earned and so retained and reinvested may be distributed as income at appropriate rates (after providing for all relevant ongoing expenses, dividend distribution tax or statutory levy if any etc.) and at appropriate intervals as may be decided by the AMC and/or Trustee Company. It will be distributed to the unitholders who hold the units on the record date of declaration of the income distribution.

Please note that the income distribution and its frequency is subject to availability of distributable surplus and at the discretion of the trustees. The Fund reserves a right to modify the periodicity and manner of payout of such distribution amount as they deem fit without giving any further notice to unitholders.

Unitholders shall note that when units are sold, and sale price (NAV) is higher than face value of the unit, a portion of sale price that represents realized gains shall be credited to an Equalization Reserve Account and which can be used to pay income distribution amount. Hence income distribution amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.

Income distribution will be subject to availability of distributable surplus and at the discretion of the trustees from time to time.

The Fund does not assure any targeted annual return / income nor any capitalisation ratio. Accumulation of earnings and / or capitalisation of units and the consequent determination of NAV, may be suspended temporarily or indefinitely under any of the circumstances as stated in the clause “Suspension of Ongoing Sale, Repurchase or Switch out of Units”.

The payout for amount less than Rs 100/- will be compulsorily reinvested in the same sub-option at ex-dividend NAV.

Reinvestment of Income Distribution cum capital withdrawal option:

Unitholders under this Option also have the facility of reinvestment of the income so declared, if so desired. Income Distribution Warrants will not be dispatched to such Unitholders. The income declared would be reinvested in the Scheme on the immediately following ex-dividend date

Transfer of Income Distribution cum capital withdrawal plan

Under this facility investor can opt for reinvestment of income distribution amount into any other scheme of Tata Mutual Fund. This facility is available only for those investors who have opted for IDCW- reinvestment facility. This facility is not available to those investors who have opted for IDCW- payout facility. Under this facility, the net amount (i.e. net of statutory levy / taxes if any) will be automatically invested on the ex-dividend date into other scheme of Tata Mutual Fund specified by the investor at the applicable NAV of that scheme & accordingly equivalent units will be allotted in lieu of income distribution, subject to the terms of the schemes. The minimum and maximum amount is not applicable for this facility. No entry load or exit load will be levied on the units issued in lieu of income distribution. AMC reserves the right to modify or withdraw this facility without prior notice.

In case income distribution option is not mentioned than income distribution amount shall be compulsorily reinvested in the same scheme/option at applicable ex-dividend NAV.

NAME OF THE FUND MANAGER

Mr. Chandraprakash Padiyar (Managing Since 12/11/2018), Mr. Jeetendra Khatri, (Assistant Fund Manager, Managing since 03rd October, 2023)

3. Portfolio Disclosure - For Monthly/ Half Yearly portfolio disclosures of the schemes of Tata Mutual Fund in a user friendly and downloadable format. Kindly visit functional weblink:- <https://www.tatamutualfund.com/schemes-related>
3. Portfolio Turnover Ratio is 0.11 Times as on 31st March, 2025 (for 13 Months)

EXPENSES OF THE SCHEME**Load Structure****Continuous Offer**

Entry Load: Entry load: Not Applicable (Pursuant to provision no. 10.4.1.a of SEBI Master Circular on Mutual Fund dated June 27, 2024, no entry load will be charged by the Scheme to the investor).

Exit Load:

- 1) NIL - Redemption/Switch-out/SWP/STP on or before expiry of 12 Months from the date of allotment: If the withdrawal amount or switched out amount is not more than 12% of the original cost of investment.
- 2) 1% - Redemption/Switch-out/SWP/STP on or before expiry of 12 Months from the 1% date of allotment: If the withdrawal amount or switched out amount is more than 12% of the original cost of investment.
- 3) NIL - exemption/Switch-out/SWP/STP after expiry of 12 Months from the date of allotment.

Taxes (such as Capital Gain tax, STT, etc.) would be applicable for switch transaction (switch with/without exit load) as per the prevailing Income Tax Laws. Kindly refer Taxation section for further details.

Pursuant to AMFI's communication dated 09th April 2025, Exit Load will not be charged on any Switch/Systematic transfer transaction from Regular plan to Direct plan of the same scheme effective from 23rd April 2025

Slab wise break up depending on the assets under management:

As per provision no. 52.6.c of SEBI (Mutual Funds) Regulations, 1996 the total expense ratio of open-ended scheme shall not exceed the following limits. The AMC has estimated that upto 2.25 % (excluding additional permissible limits as per Regulation 52(6A)(b) & 52(6A)(c)) of the daily average net assets of the scheme will be charged to the scheme as expenses.

Assets under management Slab (In Rs. crore)	Total expense ratio limits for equity-oriented schemes	Total expense ratio limits for other than equity-oriented schemes
On the first Rs.500 crores of the daily net assets	2.25%	2.00%
On the next Rs.250 crores of the daily net assets	2.00%	1.75%
On the next Rs.1,250 crores of the daily net assets	1.75%	1.50%
On the next Rs.3,000 crores of the daily net assets	1.60%	1.35%
On the next Rs.5,000 crores of the daily net assets	1.50%	1.25%
On the next Rs.40,000 crores of the daily net assets	Total expense ratio reduction of 0.05% for every increase of Rs.5,000 crores of daily net assets or part thereof.	
On balance of the assets	1.05%	0.80%

For the actual current expenses being charged, the investor should refer to functional Weblink: <https://www.tatamutualfund.com/expense-ratio/total-expense-ratio>.

Annual Recurring expenses

Actual Expenses % to daily net assets for the F.Y. 2024-2025		
Tata Small Cap Fund	Direct Plan	Regular Plan
	0.30%	1.67%

The maximum limit of recurring expenses that can be charged to the Scheme would be as per Regulation 52 of the SEBI (MF) Regulation, 1996. Investors are requested to read "Section-Annual Scheme Recurring Expenses" in the SID.

TAX TREATMENT FOR THE INVESTORS (UNITHOLDERS)

Investor will be advised to refer to the details in the Statement of Additional Information and also independently refer to his tax advisor.

DAILY NET ASSET VALUE (NAV) PUBLICATION

The NAVs will be calculated and disclosed on every Business Day. The AMC will prominently disclose the NAVs under a separate head on the website of the Fund (www.tatamutualfund.com) and of the Association of Mutual Funds in India-AMFI (www.amfiindia.com) by 11 P.M. on every business day[^].

However, due to inability in capturing same day valuation of underlying investments, the NAV shall be disclosed by 11 P.M. of the next business day[^].

[^] If the NAVs are not available before the commencement of Business Hours on the following day (i.e., next day after the respective business day) due to any reason, the Mutual Fund shall issue a press release giving reasons for the delay and explain by when the Mutual Fund would be able to publish the NAV.

In case NAV of Corporate Debt Market Development Fund ("CDMDF") units is not available by 9:30 p.m. of same Business Day, NAV declaration timing for Mutual Fund Schemes holding units of CDMDF shall be 10 a.m. on next business day instead of 11 p.m. on same Business Day.
